Road Impact Fee Acknowledgement Form

Property in the unincorporated area of the El Paso County that receives Land Use Approval either in a public hearing or administratively, is subject to the payment of Road Impact Fees. After December 31, 2024, the fee is paid for new residential and non-residential uses and structures and expansions of non-residential uses and structures. For detailed information on the program see the El Paso County Road Impact Fee webpage at publicworks.elpasoco.com/road-impact-fees/.

Land Use Approval is defined as an approval or permit issued for a new use, new structure, or expansion of an existing use or structure (not to include expansion of single-family detached homes) on a parcel of property in unincorporated El Paso County that generates new trips for such parcel. Examples include, but are not limited to building permits, access permits, driveway permits, site plans, site development plans, special use approvals, and variance of use approvals.

Owner Authorization:

I hereby agree to abide by the rules and regulations of the Road Impact Fee program as adopted by the Board of County Commissioners. I acknowledge that it is my responsibility as the owner/developer to pay Road Impact Fees at the last Land Use Approval.

Road Impact Fee*: \$ **Indicate the fee of "\$4,101.00" for the new home**

Payment Due At: **At Building Permit** (Fees finalized at building permit application) **Check this box**

Do not check this box **Approval of Current Application**

(*) Road Impact Fee is subject to change based on the current Road Impact Fee Schedule at the time of last land use approval

Letter of Intent

Personal Kennel Permit for my Personal Pack of Adopted Domesticated Canines

Canine ONLY

Indicate here "PPR266"

Pallas Reichman Dame

Owner and Applicant

Property Address:

38435 Judge Orr Road

Calhan, CO 80808

Cell:

303-898-0393

Email:

pallas@creakydoor.net

Tax Schedule Number: r0300000005

Zoning: A35

Parking/Loading/Maneuvering

- This is not a commercial kennel facility offering services to external people or animals.
- This is not a kennel with employees.
- This kennel permit is for my personal adopted canines on my private property where my home/house resides.
- I don't require a parking lot at this time for myself or any volunteers helping me with my animals.

Lighting

- An
lig
- Th

Insert two new paragraphs here and name them as follows:

"Traffic Impacts: ECM Section B.1.2.D. No TIS required" discuss the Traffic Impact if any, and discuss RIF in the same paragraph indicating if you are adding any building square footage or not.

"Drainage Impacts:" Discuss if you are increasing the impervious areas or not, indicate the basin name "Little Horse Creek" and indicate "the Basin and Bridge fees are not applicable".

Square Feet of Office or USE Space in the Barn for road impact

- There will be no office or use space in any of the barns that is dedicated too, or connected with, the kennel permit. There are NO onsite employees.
- No barns or physical structures such as barns relate to the kennel permit.
- This is not a public business permit. There are NO services offered to external canines.
- *This kennel permit is so that I can legally care for all my adopted canines on my property.*
- There are no employees.
- The barns are multi-use for hay, grain, ranch equipment, etc. All the stuff you have and use on a 326 acre ranch. I have horses, goats, pigs and ducks as well which have nothing to do with the kennel permit on my Agricultural zoned land.

Meets ALL These Standards:

5.2.30. Kennel

(B) **Major.** (To be clear, this is a PERSONAL kennel permit for which I am applying).

(1) **Applicability.** A kennel in which 9 or more dogs or cats exist, and all of which exceed 4 months in age. Dogs or cats owned by the occupants of the premises shall be included In the count.

RV's: Clearing up former letter of intent.

- NO RV's are associated with this kennel permit.
 - Any old (winterized) RV's that were used temporarily over the winter to provide temporary shelter to the humans helping me care for my animals on the property are being removed from the property.
 - I live in Arvada with my kids, two hours away, and I had a group of friends helping me care for my animals while I was working through everything with the county.
 - I have 4 horses, dogs, goats, pigs, ducks..
- Any additional RV's remaining are my personal trailers to be used for camping, and traveling around the country, just like a car or truck, and not associated with anything the county is connected too.

What I Am Doing RE: the needs for a kennel permit

- I AM applying for a personal kennel permit for domesticated northern breed canines only.
- **I am ONLY applying for a kennel permit that will allow me to build my dog yards with 12-foot tall welded wire fencing so they can't escape. This is the only 'categorized' structure connected to this kennel permit.**
- I am obtaining a kennel permit for the sole purpose of being in compliance with El Paso County with the total number of personal domesticated dogs I have on my property. My animals will live with me forever.
- PACFA
 - I am approved by PACFA to have my canines on my property. To obtain PACFA certification requires strict adherence to rules and regulations governed by this organization. This ranges from how structures are built to contain animals, cleanliness, feeding, playtime, health management and so on.
 - PACFA governs animals classified as domesticated pets only.
 - PACFA is a required governing body for every kennel in the state of Colorado. The kennel permit is only HALF of the legal requirements to possess more than 15 dogs on your property in Colorado and El Paso County. PACFA certification is the other half.
 - I am working with Jessica Brannam from PACFA. (Pet Animal Care Facilities Act- which is required if you have above 15 canines on your property and have a kennel.)
- All of these dogs are my personal adoptions.
- The ONLY animals that will be housed under this kennel permit are my personal canine rescues which are northern breed huskies, malamutes, and mixes.
- I would like to have **up to a maximum of 50 personal canine adoptions** who will live permanently on my property with me and my family.
- My ranch land remains my personal residence zoned agricultural.

What I DON'T need and am NOT doing:

- **I am NOT starting a wildlife refuge. I am not applying for this kind of special use permit. This is for wildlife. I have domesticated dogs.**
- **I am NOT developing this land outside of what I have already done as my PRIMARY USE of being residential connected to my home that is actively under construction.**
- I don't need a parking lot. This is not a commercial public kennel facility that offers services for external canines.
- I am not developing my property into anything commercial. This is Ag land and natural, and I am keeping it this way. This is my private land for my kids, myself, my horses, and living a rural life.
- No employees.

- I am not running a commercial/public kennel for other peoples dogs.
- I do not have onsite employees. I do not require office space.
- NO barns or buildings anywhere on the property are connected to this kennel permit. My barns are multi-used permitted for everything I will use them for **personal** and private use on my 326 acre ranch, within the permitting of ‘multi-use’ structures.
 - The ONLY “sort of” structures connected to this kennel permit are the 12 ft welded wire fenced in enclosures/dog yards themselves.
- I am NOT breeding any canine animals. All animals are my lifetime pets that I adopted. No animals will be bred. Not Ever.
- I am not pouring concrete in the dog yard/enclosures for flooring. All of the enclosures/dog yards are natural with grass/dirt. The enclosures are simple. Normal outside dog yards but requiring a 12 foot welded wire fence so they can’t climb the fence and escape.

Permits NOT needed:

- **BACKGROUND**
 - *I bought this land LAST MAY in 2025. It was abandoned land and undeveloped Agricultural land that had been used exclusively for grazing for decades before I purchased it.*
 - *I have been building my house, two barns, getting power on the property, some driveways, and all the basics to get undeveloped land up and running and on the grid as my personal property, my personal ranch of 326ish acres.*
 - *I have been working closely with the county for nearly a year now and am at the end of my personal development/getting this land on the grid, so I can actually live there in my house with my kids and partner David, with power and water (normal life things) and care for my animals.*
 - *This huge undertaking and massively expensive project is nearing completion of a new construction build of my home and my barns*
 - *I have 4 horses, 2 mini pigs, 4 goats, some ducks and my dogs.*
 - *This land will remain my personal primary use of residential property where I live rurally. I’m tired of living in cities and suburban areas. That’s why I’m building all of this on that land and moving down there.*
- **I DO NOT require a special use animal refuge permit. This was never what I was asking for. I need a simple personal kennel permit for my personally adopted domesticated northern breed dogs.**
- **I DO NOT require permits for ANYTHING on my site map EXCEPT for the designated 12 ft tall welded wire fencing with hot wire for my dog yards which is noted on the site map. I need to build my dog yards with fencing of this height in order to contain my northern breed dogs not allow them to climb out.**
 - Everything you see on the site map has already been permitted by El Paso county and has been built or is in the process of being built. All on public record.

- All permits issued to get my land on the grid, classified as primary use residential due to my house, build my house, my barns, get power on the property, etc.. has followed the required order of operations of permits required by El Paso county and are already in place.
- My property has already been qualified as primary use as residential due to my house that is actively in a new construction build on this property. It is nearly completed with construction and soon to be signed of as a structure I can move into.
- There is nothing left to do permit wise for my property EXCEPT
 - Obtain the personal use kennel permit
 - Permit for 12 foot tall welded wire fencing for my dog yards.
 - 800ft set back approval off Judge Orr Road.
- The county has literally scoured my property and all I am doing inside out, upside down and backwards over this past year. Nothing is new.

Dog Waste:

- All dog waste will be physically removed from the property.
- It will be removed REGULARLY with our dump trailer and taken to the dump.

Permits and Approval Required:

- Kennel Permit
- 12-foot tall welded wire fencing permit for my outdoor dog yards/enclosures
- 800 foot off Judge Orr Setback Approval
 - Setback approval of where I will build my dog yards behind my barns. The dog yards will be built 800 feet back from Judge Orr Road behind my barns that are getting built.
- Individual Dog Yards/Enclosures – please see graphic below.
 - Each individual dog yard/enclosure will have 12-foot tall welded wire fencing which encloses the individual dog yards with hotwire on the top powered by solar to prevent the dogs from climbing the fencing and escaping.
 - Each of the 8 smaller circles constitutes an individual dog yard/enclosure on grass/dirt.
 - Each individual circle will house up to 2 dogs/bonded pair, in each enclosure.
 - Each (POD) as I'm calling it will have a maximum of 16 dogs. 2 per individual enclosure.
 - Each individual enclosure will have a doghouse.

- **PLAY YARD** - Large circle in the middle
 - 12 ft tall, welded wire fencing with hot wire on top powered by solar which creates the play yard space
 - The largest circle you see in the middle is a large play yard for monitored play time with dogs that are friends. NEVER full pack playtime.
 - Each individual enclosure connects to the main play yard.
- I am not pouring concrete in the dog yard/enclosures for flooring.
- All of the enclosures are the natural prairie grass/dirt. The enclosures are simple. Normal outside dog yards like at your own home, with tall fencing, for domesticated outdoor dogs, to keep them from climbing out. Northern breeds are tricky and very agile.

- **PERIMETER FENCE** - The largest “circle/octagon shape” OUTSIDE of the 8 smaller circles –
 - 12ft tall welded wire PERIMETER fence that surrounds the 8 individual dog yards.
 - The space between the dog yards/enclosures and the perimeter fence is the natural ground of prairie grass.
 - This perimeter fencing is required by PACFA (Pet Animal Care and Facilities Act) to surround all the individual dog enclosures/yards for safety purposes.
 - The perimeter fence has a gate on it that will remain closed all the time the way you open and close a gate for a horse pasture. Always closed except when you are entering or exiting.
 - This perimeter fence is in place to protect the dogs from
 - Any outside predatory animals or random wandering country dogs from other peoples homes that could fence fight with them.
 - Perimeter fencing prevents unauthorized humans or animals from entering to the dog enclosure pod.
 - In the highly off-chance situation that one of them were to escape their individual dog yard, they wouldn't be able to leave the pod itself due to the perimeter fence. .

- ~~**APPROVAL FOR 800Ft Setback from Judge Orr Road** for these dog yards/enclosures (SAFETY for my animals and RESEPECT for the rural neighbors)~~
 - ~~My land is 326 acres. I bought this land for privacy for myself and my animals.~~
 - ~~The 800ft setback for these dog yards/enclosures allows for privacy for myself and my animals and the ability to build out their yards over time for any new canines that I may adopt.~~
 - ~~The setback allows for additional safety for my animals from unwanted human impact ranging from the loud sounds of engines of cars, trucks, motorcycles, etc.. to human interference with my animals illegally, sneaking onto my property~~

There is no maximum setback. The requirement is that you are AT LEAST 200 ft from the property line, so just say that

without my permission and messing with them, which is sadly a very real potential out in the country.

- The 800ft setback allows for RESPECT to my rural neighbors by creating additional feet or miles away from:
 - The 800ft setback positions the animals further into the ranch and farther away from other neighbors a half mile or more away, therefore, dulling the sound of their barking and howling from them which carries due to lack of trees on the prairie.
- The 800ft setback protects my dogs from hearing gunshots right next to them by:
 - The neighbors on their personal gun range across the street from us.
 - Other neighbors at the intersection (approximately) of Judge Orr and Oil Well road. These individuals hunt on the land directly across the street (Judge Orr Road) from my land.
 - Nearby gunshots terrorize many of the dogs and its' cruel to subject them to it by forcing them to close to it. Especially because they are outside dogs and can't escape the sounds.

MINIMUM SET BACK FOR KENNEL Structures and outdoor areas used as part of a kennels operation adjoining a residential, forestry, or agricultural zoning district shall be setback a minimum of 200 feet from all property boundaries. The PCD Director may allow a reduction in the setback where appropriate actions are taken to mitigate potential impacts.

As stated above:

- This is not a public use kennel permit. This is a personal use kennel permit. This is for my own personal pack of adopted canines that live permanently with me on my property.
- My land is 326 acres. I bought this for privacy for myself and my animals.
- The 800ft setback for these dog runs/enclosures allows for privacy for myself and my animals
- The setback allows for additional safety for my animals from unwanted human impact ranging from the loud sounds of engines of cars, trucks, motorcycles, etc.. to human interference with my animals illegally, sneaking onto my property without my permission and messing with them, which is sadly a very real potential out in the country.
- The 800ft setback allows for RESPECT to my rural neighbors by creating additional feet or miles away from:
 - The 800ft setback positions the animals further into the ranch and farther away from other neighbors a half mile or more away, therefore, dulling the sound of their barking and howling from them which carries due to lack of trees on the prairie.
- The 800ft setback protects my dogs from hearing gunshots right next to them by:
 - The neighbors on their personal gun range across the street from us.

- Other neighbors at the intersection (approximately) of Judge Orr and Oil Well road. These individuals hunt on the land directly across the street (Judge Orr Road) from my land.
- Nearby gunshots terrorize many of the dogs and its' cruel to subject them to it by forcing them to close to it. Especially because they are outside dogs and can't escape the sounds.

(3) Overnight Boarding. Where overnight boarding occurs, animals shall not be allowed unsupervised outdoor access.

- I am NOT running a public facing commercial kennel.
- *I don't know if this classified under overnight boarding but adding for clarity.*
 - MY PERSONAL PACK of CANINES will ALWAYS be living onsite in inescapable outdoor enclosures with a dedicated doghouse and access to a large supervised play yard through a Sally Port from the main entrance into the individual enclosure.
 - All dogs are ALWAYS monitored with a human inside of the play yard.
 - We do not do group play unless all the dogs know each other and live that way in regular life.
 - When the dogs are not playing, they stay in their dedicated enclosures.

(4) Conducted in Accordance with Laws. The kennel shall be conducted in compliance with all applicable county, state and federal laws.

- This is NOT a public facing kennel facility, this is a private use kennel permit for which I am applying.
- Yes, I will be in compliance with all applicable county, state and federal laws.
- I/we are actively working with PACFA (Pet Animal Care Facilities Act), Jessica Branham. I am PACFA certified and in compliance with this regulatory structure. PACFA is required for me because my total number of canines exceeds 15.
- I require this kennel permit in order for me to be in compliance with El Paso County for the total number of dogs I have on my property.

SITE DEVELOPMENT PLAN

BACKGROUND – to reiterate as stated above

- *I bought this land LAST MAY in 2025. It was abandoned land and undeveloped Agricultural land that had been used exclusively for grazing for decades before I purchased it.*
- *I have been building my house, two barns, getting power on the property, some driveways, and all the basics to get undeveloped land up and running and on the grid as my personal property, my personal ranch of 326ish acres.*

- I have been working closely with the county for nearly a year now and am at the end of my personal development/getting this land on the grid, so I can actually live there in my house with my kids and partner David, with power and water (normal life things) and care for my animals.*
- This huge undertaking and massively expensive project is nearing completion of a new construction build of my home and my barns*
- I have 4 horses, 2 mini pigs, 4 goats, some ducks and my dogs.*
- This land will remain my personal primary use of residential property where I live rurally. I'm tired of living in cities and suburban areas. That's why I'm building all of this on that land and moving down there.*
- **I DO NOT require permits for ANYTHING on my site map EXCEPT for the designated 12 ft tall welded wire fencing with hot wire for my dog yards which is noted on the site map. I need to build my dog yards with fencing of this height in order to contain my northern breed dogs not allow them to climb out.**
 - Everything you see on the site map has already been permitted by El Paso county and has been built or is in the process of being built. All on public record.*
 - All permits issued to get my land on the grid, classified as primary use residential due to my house, build my house, my barns, get power on the property, etc.. has followed the required order of operations of permits required by El Paso county and are already in place.*
 - My property has already been qualified as primary use as residential due to my house that is actively in a new construction build on this property. It is nearly completed with construction and soon to be signed of as a structure I can move into.*
- There is nothing left to do permit wise for my property EXCEPT
 - Obtain the personal use kennel permit*
 - Permit for 12 foot tall welded wire fencing for my dog yards.*
 - 800ft set back approval off Judge Orr Road.*
- The county has literally scoured my property and all I am doing inside out, upside down and backwards over this past year. Nothing is new.
- I am ONLY building three pods of dog yards/enclosures to house my personal adopted canines for which I require this kennel permit, in order to be in compliance with El Paso County.
- The ONLY 'structures' being ADDED to the site plan and requiring a permit is the 12 ft tall welded wire fencing for the dog yards/enclosures with hot wire powered by solar.
 - I require this height of fencing to safely and securely keep my dogs from escaping.
 - According to the county, this is a structure.
 - These are the ONLY structures associated with the kennel permit and being added to the site map.
- This land is MY personal land and I am using a small portion of the acreage to house my adopted canines in their 12ft welded wire, dirt/grass natural prairie surface floor enclosures.

FIRE PREVENTION AND SAFETY Section 6.3.3

- The property already has an appropriate driveway/road for the fire truck. The fire department can access this road/driveway directly off Judge Orr Road. This is noted on the site map.
- The width of the gate to enter the property will be in accordance with the 16 ft wide entrance required.
- It is a gravel top road on flat surface that is already approved by the county as a (driveway) and actively being developed by my general contractor and will adhere to the 16ft requirements.
- The driveway/road goes to the barns (not associated with the kennel) and behind the barns to where the 12 ft welded wire dog enclosures on dirt surfaces will be with the 800 ft setback.
- The ONLY physical kennel are the welded wire dog yards/enclosures. There are NO building associated with the kennel permit.
- We will have a turnaround on this driveway/road that the firetrucks can easily use.
- I am also going to provide water tanks for our own fire mitigation. The water tanks will be accessible to the fire trucks and will be noted on the site map.
- I am actively looking for (ideally) either 2 ABOVE ground 15,000 gallon tanks or one 30,000 gallon tank.
- I have water rights to 4 wells on my property.
 - I currently have two active wells on my property.
 - 1 permitted for my home.
 - 1 active Ag well, that came with my property.
- The 3rd well, located near the driveway/road off Judge Orr, will be actively supplying water to these tanks for our personal use. This well is currently inactive but will be refurbished in the coming weeks by my well company, Barnhart. They have done my 2 previous wells.

MONUMENT SIGN

A monument sign with the name of the road and the address shall be posted at the beginning of the driveway and visible from the street. Letter and number shall be a minimum of 5 IN in height ½ IN stroke width.

- No problem. I will call it Wolf Song Way.

12 ft tall welded wire DOG YARDS/ENCLOSURES-

- ONLY Structures associated with the personal use kennel permit
- No barns or buildings are associated with this kennel permit.

This kennel permit is ONLY for my personal adopted canines who will live permanently on my ranch with me.

Materials

- 12 foot tall Welded Wire fencing to keep my dogs from scaling the fencing and escaping like huskies can do.
- Hot wire at the top of the welded wire powered by solar power
- Metal poles holding up the welded wire
- Gates
- Lighting- solar powered lighting such as you can buy from home depot, Big R, Tractor Supply, Hobby Lobby, etc..
- The fencing we will ultimately build will be 12 Ft tall, welded wire with hot wire at the top powered by solar. It is built with metal poles and welded wire. It does not obstruct vision through or around.
 - I have included some links to review below from another high-quality rescue in Ohio with fencing examples that we will emulate its' construction style.
 - The first video is an aerial view of the enclosures they have with the fencing **style not configuration** that we will use. I want my dog enclosures to have this fencing style so they can't escape.
 - Also, please note, these enclosures are created to resemble natural outdoor environments on dirt/grass, natural prairie surface.
 - I am not pouring concrete anywhere.
 - The fencing will allow me to give them large yards to play in, like traditional outdoor dogs in a traditional home.

FENCING AND ENCLOSURE EXAMPLES for my pack of domesticated northern breed dogs:

PLEASE SEE LINKS BELOW DEMONSTRATING FENCING STYLE AND OVERALL ENCLOSURE TYPE FOR OUTDOOR DOGS WITH NATURAL/PRAIRIE GRASS/DIRT AS THE FOUNDATION/FLOOR- LIKE ANY OTHER DOG YARD AT SOMEONES HOME. I WILL BE EMULATING THESE ENCLOSURES, BUT IN A DIFFERENT SHAPE AS NOTED ON THE SITE PLAN AND NOTES ABOVE RE: THE 12 FT TALL WELDED WIRE ENCLOSURES.

 - o The 800ft setback protects my dogs from hearing gunshots right next to them by:
 - The neighbors on their personal gun range across the street from us.
 - Other neighbors at the intersection (approximately) of Judge Orr and Oil Well road. These individuals hunt on the land directly across the street (Judge Orr Road) from my land.
 - Nearby gunshots terrorize many of the dogs and its' cruel to subject them to it by forcing them to close to it. Especially because they are outside dogs and can't escape the sounds.

MINIMUM SET BACK FOR KENNEL: Structures and outdoor areas used as part of a kennel operation adjoining a residential, forestry, or agricultural zoning district shall be setback a minimum of 200 feet from all property boundaries. The PCD Director may allow a reduction in setback where appropriate actions are taken to mitigate potential impacts.

- other peoples homes that could fence fight with them.
- Perimeter fencing prevents unauthorized humans or animals from to the dog enclosure pod.
- In the highly off-chance situation that one of them were to escape individual dog yard, they wouldn't be able to leave the pod itself to the perimeter fence.

- APPROVAL FOR 800FT Setback from Judge Orr Road** for these dog yards/enclosures (SAFETY for my animals and RESPECT for the rural neighbors)
 - My land is 326 acres. I bought this land for privacy for myself and my animals.
 - The 800ft setback for these dog yards/enclosures allows for privacy for my animals and the ability to build out their yards over time for any new canines that I may adopt.
 - The setback allows for additional safety for my animals from unwanted human impact ranging from the loud sounds of engines of cars, trucks, motorcycle to human interference with my animals illegally, sneaking onto my property.

- entering or exiting.
- This perimeter fence is in place to protect the dogs from:
 - Any outside predatory animals or animals wandering country dogs from other peoples homes that could fence fight with them.
 - Perimeter fencing prevents unauthorized humans or animals from entering to the dog enclosure pod.
 - In the highly off-chance situation that one of them were to escape their individual dog yard, they wouldn't be able to leave the pod itself due to the perimeter fence.

- APPROVAL FOR 800FT Setback from Judge Orr Road** for these dog yards/enclosures (SAFETY for my animals and RESPECT for the rural neighbors)
 - My land is 326 acres. I bought this land for privacy for myself and my animals.

- Branham. I am PACFA certified and in compliance with this regulatory structure. PACFA is required for me because my total number of canines exceeds 15.
- I require this kennel permit in order for me to be in compliance with El Paso County for the total number of dogs I have on my property.

SITE DEVELOPMENT PLAN

BACKGROUND - to reiterate as stated above

- I bought this land LAST MAY in 2025. It was abandoned and undeveloped agricultural land that had been used exclusively for grazing for decades before I purchased it.
- I have been building my home, my barns, getting power on the property, some driveways, and all the basics to get undeveloped land up and running and on the grid on my personal property, my personal ranch of 126ish acres.

one of my personal use kennel permits, in order to be in compliance with El Paso County's rules and regulations regarding the use of my property as a kennel facility. I live there in my house with my husband and partner, three dogs, and a small acreage.

- o This dog yarding and enclosure project is nearing completion of a new construction build of my house and my dogs.
- o I have 4 horses, 2 mini pigs, 4 goats, some ducks and my dogs.
- o This land will remain my personal primary use of residential property where I live normally. I'm tired of living in cities and suburban areas. That's why I'm building all of this on the land and moving down there.

I DO NOT require permits for ANYTHING on my site map EXCEPT for the designated 12 foot tall welded wire fencing with hot wire for my dog yards which is noted on the site map. I need to build my dog yards with fencing of this height in order to contain my dogs and prevent them from escaping.

- o Everything you see on the site map has already been permitted by El Paso county and has been built or is in the process of being built. All my public records.
- o All permits issued to get my land on the grid, classified as primary use residential due to my house, build my house, my barns, get power to the property, etc... has followed the required order of operations as required by El Paso county and are already in place.
- o My property has already been qualified as primary use as residential due to my house that is actively in a new construction build on this property. It's nearly completed with construction and soon to be signed of as a structure I can move into.

- There is nothing left to do permit wise for my property EXCEPT
 - o Obtain the personal use kennel permit
 - o Permit for 12 foot tall welded wire fencing for my dog yards.
 - o 800ft set back approval off Judge Orr Road.
- The county has literally scoured my property and all I am doing inside out, upside down and backwards over this past year. Nothing is new.
- I am ONLY building three pods of dog yards/enclosures to house my personal adopted canines for which I require this kennel permit, in order to be in compliance with El Paso County.

by "type of floor," he was wondering if you were pouring concrete because that factors into the Road Impact Fee calculation. Just label this "dirt floor."

Comments from last review still applicable:
- Please label structures as existing (E), proposed (P), or demolish (D)
Please use EPC standard detail SD_3-14. The new drive must be off the local roads Oil Well Road or Berridge Road; in addition, you must indicate the type of surface for the new drive and the connecting road (Pavement or Gravel) and you must show the details, and indicate the ROW width for the new drive and the connecting road and you must show the culvert under the new drive and indicate it's type and size in inches. no changes to the standard detail is allowed.
