COLORADO SPRINGS, CO 80917

LOCATION, ACREAGE, PARCEL ID INFO, & ZONING

The 5.11-acre site (Parcel ID: 83221-01-001) is located at 5250 Pikes Peak Highway and is legally described as Lot 1 Black Bear Inn Subdivision. Approval of a rezone from the RT to the CC zone is pending review and approval. The site is approximately 0.88 miles northwest of the intersection of Pikes Peak Highway and US 24 West in the Cascade/Chipita Park area of the unincorporated El Paso County.

The neighborhood is characterized by a mix of low impact rural residential and supporting commercial services that serve the local community and draw consumers from, El Paso and Teller Counties, Colorado Springs, and surrounding municipalities and communities. The North Pole – Santa's Workshop is a Christmas themed amusement park on ±28-acres south of the current Sandstone Care facility on the property south of the rezone parcel. An (The) entrance to Pikes Peak National Park is located and Pikes Peak – America's Mountain located within 700-feet north of the property, separated by a ±4-acre single family rural residential (RR-2.5) property.

REQUEST

Sandstone Care COS LLC requests approval of a site development plan to document the reuse of the existing ±5,615 SF, four (4) bedroom, 2.5 bathroom residence as a private hospital that will provide inpatient addiction rehabilitation, recovery, and treatment services for youth in a private residential style campus environment and to verify compliance with zoning district requirements, parking, landscaping, and lighting standards of the Code.

The external aesthetic character of the residence will not be altered nor are any external site improvements planned. The site is intended to be preserved in its existing residential character and appearance to provide a residential environment context for patients during treatment and recovery periods.

The facility program will have a maximum capacity of up to 12 patients. The hospital will comply with occupancy limitations set by the Regional Building Department, State Health Department, and/or other agencies regulating inpatient hospital uses as defined and permitted by the State of Colorado.

Treatment activities will occur entirely inside the existing “residence”.

Parking

Employee parking will occur within the existing two car garages. ADA parking will be provided at the end of the driveway in front of the main entrance.

Landscaping Setbacks and Buffers

The development plan identifies a 15' roadway landscape buffer against the Pikes Peak Highway frontage and 15' non-residential/residential use buffer against the RT zoned properties to the north and west of the site. Per the Code, 5 trees are required within 1 tree/30 linear feet of roadway frontage ($134.88' \text{ frontage} / 30 = 4.46 \text{ trees}$). 1 tree/25 linear feet is required within “use” buffer area. A total of 16 trees are required along the northern 691.9' boundary and 16 trees are required along the western 389.72' boundary. the existing mature trees on site more than exceed the required number of buffer trees required. the applicant requests that the existing tree cover be counted to satisfy the various categories of landscaping buffer requirements.

This will require a justification of alternative landscaping per LDC Sec. 6.2.2(A)(4). Please provide specific justification for an alternative landscape request per this section of the Code.
