

Signage Plan

Pete Lien & Sons plans to place one sign at the proposed entrance off of Stapleton to help delivery drivers identify the access point. Signs are typically constructed of concrete and made in house or purchased from precast or concrete construction companies. An example of the type of sign used is shown below. The final design including size, shape and location of the sign will comply with applicable regulation.

Pete Lien & Sons plans no further signage for ready mix business advertising on this site.
