Please add a statement to your sign plan confirming that your lighting complies w/ Ch.6 Lighting Standards (maximum light levels) per the below snip from the Code, and also noting that you understand that the PCD Director could request a full photometric plan.

- (d) **Maximum Levels.**
Maximum on-site lighting levels shall not exceed 10 foot candles, except for loading and unloading platforms where the maximum lighting level shall be 20 foot candles.
- (e) **Measurement at Property Boundaries.**
Light levels measured at the property line of the development site adjacent to residential property or public right of way shall not exceed 0.1 foot candles as a direct result of the on-site lighting. All light fixtures mounted within 15' of any residential property line of the site shall be classified as IES Type II or Type III, or fixture demonstrated to provide similar distribution patterns and shielding properties. Fixtures shall be fitted with "house side shield" reflectors on the sides facing the residential property line.
