Reigning Hope, BOA-18-001

Please accept the following comments from El Paso County Public Health regarding the project referenced above:

- **El Paso County Public Health on-site wastewater treatment system (OWTS) records indicate there is one permitted and approved OWTS on the property. The OWTS was installed in 1974 with an addition to the soil treatment area installed in 2002. No record of an OWTS for the barn could be found on file. Please provide any permits or documentation regarding the barn OWTS to our office regarding this OWTS.**
- **Components of the two OWTS's and a secondary soil treatment area for each OWTS are required to be protected from compaction by vehicular traffic and livestock. Fencing and/or landscaping are examples of soil treatment area protection methods.**
- **Horse waste must be managed to help reduce the potential for rodents, insects, and nuisance odors.**
