Subject: NOI Application - Haven School - Rain Garden A2

Hello Elizabeth,

We have been informed by El Paso County that we need to submit the attached NOI Application for a Rain Garden embankment (spillway height of 1.1 feet per attached Sh. C3.1). Please review and let me know if you have any questions or need any additional information.

Thanks,
John

 Contractor: Telephone/E-Mail: () /

STRUCTURE INFORMATION

Name of Dam: Haven School - Rain Garden A2 Water Division: Water District:

Location: (Provide Section, Township, Range, and GPS Point taken at crest of dam above streamline/outlet)

- Section: 13, Township: 12S, Range: 66W, 6th P.M.
 - Northing Lat 39°00'02" meters, Easting Long 104°43'43" meters (Datum should be UTM, NAD 83)

Dam Dimensions:

- Vertical Height²: 1.1 ft., Length: 200 ft., Crest Width: 8 ft., Slopes: U/S: 4 (H:1V), D/S 4 (H:1V)

Reservoir:

- Surface Area¹: 0.1 acres, Capacity¹: 0.15 acre-feet, Drainage Area*: 6.2 acres
 *(If drainage area is unknown leave blank and a spillway size will be assigned):

Emergency Spillway: (See Table 1, Spillway Sizing Guidelines)

- Bottom Width: 4 ft., Side Slopes: 4 H:1V, Freeboard³: 0.9 ft

Outlet Conduit Type: HDPE Pipe, Size: 18 inches, Location: NW Corner

Stream Name or Water Source⁴: Kettle Creek Proposed Water Use: Stormwater Quality

Water Court Case or WDID :
 (Water District Identification Number)

[Signature] 6/2/06
 Signature of Owner (Engineer) Date

Office Use Only

DIVISION ENGINEER'S REQUIREMENTS:

Dam I.D. _____ Signature of Division Engineer _____ Date _____

¹ A "Non-Jurisdictional Structure" is a dam creating a reservoir with a capacity of 100 acre-feet or less and a surface area of 20 acres or less and a vertical height (footnote 2) of 10 feet or less. Non-jurisdictional size dams are regulated and subject to the authority of the State Engineer consistent with sections 37-87-102 and 37-87-105 C.R.S.
² "Vertical Height" is measured from the elevation of the lowest point of the natural surface of the ground or the invert of the outlet conduit (whichever is lower) where that point occurs along the longitudinal centerline of the dam up to the crest of the emergency spillway of the dam.
³ "Freeboard" is the vertical distance from the bottom of spillway to the crest of the dam. Minimum Freeboard is 3 feet.
⁴ If construction in reservoir intercepts groundwater, a well permit is required. (Well permit applications can be found at dwr.colorado.gov)
