### **Turbo RV Renewal, VR-19-034**

Please accept the following comments from El Paso County Public Health for the plat amendment request referenced above:

- Water service for the lot is an individual private well.
- Wastewater service for the 5-acre lot is by an on-site wastewater treatment system (OWTS) installed and approved for a 3-bedroom house in 1986. No record of other wastewater service for the property is on file at El Paso County Public Health. The soil treatment area for the existing system is located slightly north and east of the residence. This area must be protected from compaction by vehicular traffic. A map of the OWTS can be found on the El Paso County Assessor's Office website.
- Although not a part of the services provided per the Letter of Intent, should RV waste, petroleum, anti-freeze or other waste products be generated in the future, then operation must comply with all local, state and/or federal regulations.
