Dayton-

The State Engineer's Office has identified in a letter dated November 8, 2018 that your development is required to tie into Cherokee's water line, so that accrued flows into the same steam system. Because your development is an existing development serving less than 250 units, you will not need to amend your 1041 permit (AASI 18-5) issued on October 31, 2018. Please obtain a work in the right of way permit from the County's Public Works Department before earth disturbance.

Best Regards,

Kari Parsons, Planner II
