

WORKING

Project Name: FOREST LAKES BRIDGES

11-04-2021

STRUCTURES INC

For the attention of: PROJECT MANAGER

Re: TEMPORARY BRIDGE ERECTION SUPPORT

Regarding the above contract, the following working drawings are issued for your review and/ or construction use.

Drawing No.(s) PNA011011-04, REV. B, PAGES 1-3 + HILOAD ID/SAFETY SHEET

RMD Kwikform is responsible for its sealed Working Drawings that it issues for construction to the extent of the design criteria information [Customer] provides on which the design is based, assuming the work is erected according to the Working Drawings. It is the customer's responsibility to ensure that the design criteria information it provides to RMD Kwikform is current, correct and in accordance with site requirements, the requirements of the Project Contract and [Customer's] planned construction means, methods and sequences. Such design criteria information includes, for example, dimensions, height/span ranges, and applied loads. Please refer to the general, product and application notes on the drawings.

Since RMD Kwikform has no way of verifying such design criteria information, [Customer's] placing of an order based on a scheme submitted by RMD Kwikform is [Customer's] verification that the design criteria information it supplied was current and correct.

The attached drawings supersede all previous issues, which should no longer be referred to.
