

Soils and Geology Report

In future, please don't upload documents in a format that can not be redlined.

1. I'm not able to find in the report where Appendix E is referenced in the report.
2. Page 1, Paragraph 4 - you reference individual well on Lots 1 and 3. That should say shared well.
3. page 4, Paragraph 6 - FEMA map is referred to as Figure 8, it is Figure 7.

4. Information regarding the wells is inconsistent in all documents.

The Water Resources Report states existing well is on Lot 2 and will share with Lot 1.

The Well Use Agreement states existing well is on Lot 1 and will share with lot 2.

Soils and Geology Report states existing well is on Lot 2 and a new well will be shared with Lots 1&3.

The final review of this project
will be a completed as a first
review to ensure consistency.
