Doug,

Per our conversations transmitted is our notice to build seven stormwater ponds within Lorson Ranch East. We have included a memo, non-jurisdiction water impoundment forms, grading plans, and a drainage report for your review.

Let me know if you have questions during your review since this is the first time we have filled out these forms.

Rich

It did come across, I will unzip it and see if anything else is needed to review these structures.

Doug,

I just sent you our notice to build a stormwater detention pond in Lorson Ranch East in El Paso County, CO. Can you let me know if that zip file came through? It was 28mb and we are not sure the email system can handle a file that big.

Thanks for your help.
