Colorado Springs, CO 80910

**Subject: Verizon Wireless Antenna Installation – Type C Application Form**  
**Site Address: 10005 Lucky 4 Road, Green Mountain Falls, CO 80819**

Dear Sir or Madam,

Verizon Wireless is proposing to install antennas on an existing monopole facility located at the address referenced above in order to ensure that adequate and uninterrupted service is maintained at all times per Verizon Wireless' License Agreement with the Federal Communications Commission (FCC) as well as to provide the residents of El Paso County with new and faster wireless data and voice services.

The proposed installation shall only include the following:

- 1) Installation of six (6) panel antennas. The proposed antennas shall be mounted to an existing Crown Castle owned tower at a RAD center of 40', as depicted on the attached drawings. Installation of the Verizon antennas will not increase the height or width of the existing tower.
- 2) Installation of seven (7) small equipment boxes (RRHs). The proposed RRHs shall be mounted at the same height as the antennas, and this modification shall not result in a height increase to the site.
- 3) Installation of two ground cabinets and one 30kw diesel generator on a new 10' by 14' concrete pad within the existing fenced compound.
- 4) Installation of fiber service to the ground equipment within new 4" conduit from a new fiber hand hole at Highway 24
- 5) Installation of new electric service from an existing utility pole in the dirt access road to the new ground equipment.

Please let me know if you have any questions or concerns, or if you are in need of additional information. Please forward any correspondence/permits to my attention at the address provided below. Thank you for your assistance in this matter.

Sincerely,

Shawn Turk  
Consultant for Verizon Wireless
