RE: Site Development Plan - Monument Glamping I

Elevation & Floor Plans

EPC has said we need a “general” elevation and floor plan so that they can verify that we meet the height requirements of the zone and that the floor plan reflects the size allowed per the special use. The elevation/floor plan depicted are only intended to represent a typical unit. Individual units will vary and may be replaced or improved as needed. Building permits will be obtained for any units requiring a permit per Pikes Peak Regional Building Department.

Attachments Included

- Elevation & Floor Plan for Safari Tent. One of our plans for the safari tent structures, the highest and largest tent structures of our tents.
- Elevation & Floor Plan for Hard-sided Structure. One of our plans for a proposed hard-sided structure.
