Please accept the following comments from El Paso County Public Health regarding the project referenced above:

- Records of 2 permitted soil treatment areas were on file for the 4-bedroom house on the property. The permits are for the original system installed in 1994, and an additional soil treatment area installed in 2015. The OWTS component locations on file at El Paso County Public Health and accessible through the El Paso County Assessor's Office website property search page. Please make sure that components of the OWTS are protected from vehicular traffic and other means of compaction.
- Please reserve a secondary site on the property for the possibility of a repair, addition, or replacement of the existing soil treatment areas.
- El Paso County Public Health recommends storing animal food in impervious containers with lids in an effort to minimize rodents and insects.
- Animal waste should be managed properly to help control odors and minimize flies and other insects.
