PERMIT TO USE AN EXISTING WELL

ISSUANCE OF THIS PERMIT DOES NOT CONFER A WATER RIGHT
CONDITIONS OF APPROVAL

- 1) This well shall be used in such a way as to cause no material injury to existing water rights. The issuance of this permit does not ensure that no injury will occur to another vested water right or preclude another owner of a vested water right from seeking relief in a civil court action.
- 2) The construction of this well shall be in compliance with the Water Well Construction Rules 2 CCR 402-2, unless approval of a variance has been granted by the State Board of Examiners of Water Well Construction and Pump Installation Contractors in accordance with Rule 18.
- 3) Approved pursuant to Sections 37-90-107(7), CRS, and the Findings and Order of the Colorado Ground Water Commission dated November 29, 2006, for Determination of Water Right No. 1068-BD, and pursuant to Section 37-90-107.5, CRS, and the Findings and Order of the Commission dated April 8, 2020, for approval of a replacement plan. In the event the well is not operated in accordance with the conditions of this determination and replacement plan, it will be subject to administration, including orders to cease diverting ground water.
- 4) The issuance of this permit hereby cancels permit no. 214120.
- 5) The use of ground water from this well is limited to use in 1 single family residence, stock and domestic animal watering, the irrigation of lawns and gardens, hot tub/swimming pool and augmentation. The place of use shall be limited to the 37.7 acre land area, claimed in the above described Order of the Commission dated April 8, 2020.
- 6) The pumping rate of this well shall not exceed 15 GPM.
- 7) The allowed average annual amount of groundwater that may be withdrawn by this well under this permit may not exceed 1.0 acre-feet, subject to the conditions of the Replacement Plan for Determination of Water Right no. 1068-BD including but not limited to the allowed maximum annual amount of withdrawal.
- 8) The total amount of groundwater that may be withdrawn by this well under this permit may not exceed a volume of 300 acre-feet, subject to the conditions of the Replacement Plan for Determination of Water Right no. 1068-BD.
- 9) Production from this well is restricted to the Dawson aquifer.
- 10) A totalizing flow meter or Commission approved measuring device must be installed on this well and maintained in good working order. Permanent records of all diversions must be maintained by the well owner (collected at least annually) and submitted to the Upper Black Squirrel Creek Ground Water Management District and the Ground Water Commission upon request.
- 11) The owner shall mark the well in a conspicuous location with the well permit number and name of aquifer as appropriate, and shall take necessary means and precautions to preserve these markings.
- 12) The return flows from the inhouse supply component of this well use have been claimed as a replacement source, pursuant to the Findings and Order of the Commission dated April 8, 2020. As a result, the return flow from the use of this well must be through an individual waste water disposal system of the non-evaporative type where the water is returned to the same stream system in which the well is located.
- 13) This well shall be located within 200 feet of the location specified on this permit. This well shall not be located within 600 feet of another large-capacity well completed in the Dawson aquifer.

WELL PERMIT NUMBER 85058-F

RECEIPT NUMBER 10007883

NOTE: This well is withdrawing water from a non-renewable aquifer. While the withdrawals from this aquifer are administered based on a 100 year aquifer life, water level declines may prevent this well from diverting the permitted amounts for that 100 years.

NOTE: This well is located within the Upper Black Squirrel Creek Ground Water Management District where local District Rules apply which may further limit the withdrawal and use of designated ground water as authorized under this permit.

Date Issued: 1/21/2021

Expiration Date: N/A
