

City of Colorado Springs Redistricting 2020

The 2019 district map is being updated to reflect four redistricting possibilities. The goals are to ensure the districts have roughly equal population, are contiguous, are representative of their respective populations, and comply with all applicable laws. The following is the City Clerk option. Select the option from the layer list on the right.

To do a **swipe comparison**, select the **swipe tool** located under the search tool. Users may select multiple options, but show only the top two layers selected from the layer list are visible for comparison. **Note: Make sure only one layer is selected in the swipe widget. That will be the default layer on the left side. The second layer on the right side will be the next top layer as selected from the layer list.**

To search for specific information, use the **search bar** and press the down arrow to filter search content.

The District Process Advisory Committee and the City Clerk need your input

We need your feedback to the proposed changes to the district boundaries. By participating in the redistricting process, you are helping ensure that the City Council boundaries are fair and equitable.
