Summary

Details			
Name	DRLbridge Consulting, LLC		
Status	Good Standing	Formation date	02/01/2013
ID number	20131078403	Form	Limited Liability Company
Periodic report month	February	Jurisdiction	Colorado
Principal office street address	370 Gold Claim Terrace, Colorado Springs, CO 80905, United States		
Principal office mailing address	n/a		

Registered Agent	
Name	David Russell Lethbridge
Street address	370 Gold Claim Terrace, Colorado Springs, CO 80905, United States
Mailing address	n/a

STATE OF COLORADO

COLORADO DEPARTMENT OF PUBLIC HEALTH AND ENVIRONMENT

Water Quality Control Division

CDPS GENERAL PERMIT
STORMWATER DISCHARGES ASSOCIATED WITH
CONSTRUCTION ACTIVITY
AUTHORIZATION TO DISCHARGE UNDER THE
COLORADO DISCHARGE PERMIT SYSTEM (CDPS)

In compliance with the provisions of the Colorado Water Quality Control Act, (25-8-101 et seq., CRS, 1973 as amended) and the Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 et seq.; the "Act"), this permit authorizes the discharge of stormwater associated with construction activities (and specific allowable non-stormwater discharges in accordance with Part I.A.1. of the permit) certified under this permit, from those locations specified throughout the State of Colorado to specified waters of the State.

Such discharges shall be in accordance with the conditions of this permit. This permit specifically authorizes the facility listed on the certification to discharge in accordance with permit requirements and conditions set forth in Parts I and II hereof. All discharges authorized herein shall be consistent with the terms and conditions of this permit.

This permit becomes effective on April 1, 2019, and shall expire at midnight March 31, 2024.

Issued and signed this 1st day of November 2018.

COLORADO DEPARTMENT OF PUBLIC HEALTH AND ENVIRONMENT

Ellen Howard Kutzer, Permits Section Manager
Water Quality Control Division

Permit History

Originally signed and issued October 31, 2018; effective April 1, 2019.

Table of Contents

Part I 1

- A. COVERAGE UNDER THIS PERMIT..... 1
 - 1. Authorized Discharges 1
 - 2. Limitations on Coverage..... 1
 - 3. Permit Certification and Submittal Procedures 2
- B. EFFLUENT LIMITATIONS 6
 - 1. Requirements for Control Measures Used to Meet Effluent Limitations 6
 - 2. Discharges to an Impaired Waterbody..... 9
 - 3. General Requirements 10
- C. STORMWATER MANAGEMENT PLAN (SWMP) REQUIREMENTS 11
 - 1. SWMP General Requirements 11
 - 2. SWMP Content 11
 - 3. SWMP Review and Revisions 13
 - 4. SWMP Availability..... 14
- D. SITE INSPECTIONS..... 14
 - 1. Person Responsible for Conducting Inspections 14

 - 4. Reduced Inspection Frequency 15
 - 5. Inspection Scope..... 16
- E. DEFINITIONS 17
- F. MONITORING..... 20
- G. Oil and Gas Construction 21

Part II: Standard Permit Conditions..... 22

- A. DUTY TO COMPLY..... 22
- B. DUTY TO REAPPLY 22
- C. NEED TO HALT OR REDUCE ACTIVITY NOT A DEFENSE 22
- D. DUTY TO MITIGATE 22
- E. PROPER OPERATION AND MAINTENANCE 22
- F. PERMIT ACTIONS 22
- G. PROPERTY RIGHTS 22
- H. DUTY TO PROVIDE INFORMATION 23
- I. INSPECTION AND ENTRY 23
- J. MONITORING AND RECORDS 23
- K. SIGNATORY REQUIREMENTS 24

Permittees must keep a record of SWMP changes made that includes the date and identification of the changes. The SWMP must be amended when the following occurs:

- a. a change in design, construction, operation, or maintenance of the site requiring implementation of new or revised control measures;
- b. the SWMP proves ineffective in controlling pollutants in stormwater runoff in compliance with the permit conditions;
- c. control measures identified in the SWMP are no longer necessary and are removed;
and
- d. corrective actions are taken onsite that result in a change to the SWMP.

For SWMP revisions made prior to or following a change(s) onsite, including revisions to sections addressing site conditions and control measures, a notation must be included in the SWMP that identifies the date of the site change, the control measure removed, or modified, the location(s) of those control measures, and any changes to the control measure(s). The permittee must ensure the site changes are reflected in the SWMP. The permittee is noncompliant with the permit until the SWMP revisions have been made.

4. SWMP Availability

A copy of the SWMP must be provided upon request to the division, EPA, and any local agency with authority for approving sediment and erosion plans, grading plans or stormwater management plans within the time frame specified in the request. If the SWMP is required to be submitted to any of these entities, the submission must include a signed certification in accordance with Part I.A.3.e., certifying that the SWMP is complete and compliant with all terms and conditions of the permit.

All SWMPs required under this permit are considered reports that must be available to the public under Section 308(b) of the CWA and Section 61.5(4) of the CDPS regulations. The permittee must make plans available to members of the public upon request. However, the permittee may claim any portion of a SWMP as confidential in accordance with 40 CFR Part 2.

D. SITE INSPECTIONS

Site inspections must be conducted in accordance with the following requirements. The required inspection schedules are a minimum frequency and do not affect the permittee's responsibility to implement control measures in effective operating condition as prescribed in the SWMP. Proper maintenance of control measures may require more frequent inspections. Site inspections shall start within 7 calendar days of the commencement of construction activities on site.

1. Person Responsible for Conducting Inspections

The person(s) inspecting the site may be on the permittee's staff or a third party hired to conduct stormwater inspections under the direction of the permittee(s). The permittee is responsible for ensuring that the inspector is a qualified stormwater manager.

2. Inspection Frequency

1. Qualified Stormwater Manager

Your plan must identify the qualified stormwater manager(s) for the site.

Definition: Qualified Stormwater Manager

An individual knowledgeable in the principles and practices of erosion and sediment control and pollution prevention, and with the skills to assess conditions at construction sites that could impact stormwater quality and to assess the effectiveness of stormwater controls implemented to meet the requirements of this permit.

2. Spill Prevention and Response Plan

Your plan must include procedures for preventing, responding to and reporting spills and leaks.

In general, spill prevention and response procedures should include the following:

- Notification procedures to be used in the event of an accident. At the very least, the Qualified Stormwater Manager should be notified. Depending on the nature of the spill and the material involved, the Colorado Department of Public Health and Environment (24-hour spill reporting line - 877-518-5608), downstream water users, or other agencies may also need to be notified;
- Instructions for clean-up procedures, and identification of spill kit location(s);
- Provisions for absorbents to be made available for use in fuel areas, and for containers to be available for used absorbents; and
- Procedures for properly washing out concrete truck chutes and other equipment in a manner and location so that the materials and wash water cannot discharge from the site, and never into a storm drain system or stream.

Specifically, a release of any chemical, oil, petroleum product, sewage, etc., which may enter waters of the State of Colorado (which include surface water, ground water and dry gullies or storm sewers leading to surface water) must be reported. More guidance is available on the division's website.

The division's toll-free 24-hour number for environmental hazards and chemical spills and releases is 1-877-518-5608.

3. Materials Handling

Your plan must describe and locate all control measures implemented at the site to minimize impacts from handling significant materials that could contribute pollutants to runoff.

These handling procedures can include control measures for pollutants and activities such as:
