**Less than Six-Inch Rise Certification:**

I certify that I am a duly qualified registered Professional Engineer or Architect licensed in the state of Colorado.

Using standard Engineering practice I have evaluated the unstudied A zone floodplain in the area of the proposed project and I have determined pre-project 100-year flood depths. I certify that the cumulative effects of the proposed project **Colorado Kids Ranch – 105 Access Improvements** as detailed on construction drawings **CDRXXXX** will result in less than a six inch rise in the 100-year flood elevations that I have determined for **Unnamed Tributary to West Cherry Creek** which is shown on FEMA map **08041C0285G**. This certification is intended as proof of meeting the requirements set forth in the Federal Code 44CFR Chp. 1, 60.3.c.10.

I offer the following documentation in accordance with standard Engineering practice to support my findings:

a) Colorado Kids Ranch – 105 Access Improvements Final Drainage Report
