Water in the Denver Basin Aquifers is allocated based on a 100 year aquifer life, however, for El Paso County planning purposes, water in the Denver Basin Aquifers is evaluated based on a 300 year aquifer life. Applicants, the Homeowners Association and all future owners in the subdivision should be aware that the economic life of a water supply based on wells in a given Denver Basin aquifer may be less than either the 100 years or 300 years indicated due to anticipated water level declines. Furthermore, the water supply plan should not rely solely upon non-renewable aquifers. Alternative renewable water resources should be acquired and incorporated in a permanent water supply plan that provides future generations with a water supply.
- The monumentation of the perimeter of UNIT 1, 3, 7 and 9 through 15, inclusive (intended to envelop the existing foundation footprint), is the corner or a point on the foundation of each dwelling unit.
- Limited Common Elements (LCE), shown or not shown, consist of driveways which are assigned for the exclusive use of the unit to which such element is appurtenant.
- All portions of TRACT "A" which are not considered LCE are General Common Elements (GCE). Any buffer excess area of Unit property within the platted Unit lines on the exterior as-built structure foundation lines will be transferred, via individual Quitclaim document at time of sale closing, to the HIGH PINES PATIO HOME ASSOCIATION, INC.
- Due to wildfire concerns, the applicants and subsequent homeowners are encouraged to incorporate wildfire fuel break provisions as recommended by the Colorado State Forest Service and illustrated through the State Forest Service. Fire protection is provided by TRI-LAKES MONUMENT FIRE PROTECTION DISTRICT (TLMPFD).
