CHANGE/EXPANSION OF USE OF AN EXISTING WELL

ISSUANCE OF THIS PERMIT DOES NOT CONFER A WATER RIGHT

CONDITIONS OF APPROVAL

- 1) This well shall be used in such a way as to cause no material injury to existing water rights. The issuance of this permit does not ensure that no injury will occur to another vested water right or preclude another owner of a vested water right from seeking relief in a civil court action.
2) The construction of this well shall be in compliance with the Water Well Construction Rules 2 CCR 402-2, unless approval of a variance has been granted by the State Board of Examiners of Water Well Construction and Pump Installation Contractors in accordance with Rule 18.
3) Approved as a change or increase in use of an existing well constructed under permit no. 238092.
4) Approved pursuant to CRS 37-90-137(4) on the condition that this well is operated in accordance with the augmentation plan approved by the Division 1 Water Court in Case No. 11CW45. If the well is not operated in accordance with the terms of said decree, it will be subject to administration including orders to cease diverting water.
5) The use of ground water from this well is limited to use in one single family dwelling, irrigation of 10,000 square feet of home gardens and lawns, and the watering of domestic animals and livestock.
6) The pumping rate of this well shall not exceed 15 GPM.
7) The average annual amount of ground water to be appropriated shall not exceed 1 acre-foot.
8) Production is limited to the Dawson aquifer.
9) The entire length of the hole shall be geophysically logged as required by Rule 9 of the Statewide Nontributary Ground Water Rules prior to installing casing.
10) The owner shall mark the well in a conspicuous place with well permit number(s), name of the aquifer, and court case number(s) as appropriate. The owner shall take necessary means and precautions to preserve these markings.
11) A totalizing flow meter must be installed on this well and maintained in good working order. Permanent records of all diversions must be maintained by the well owner (recorded at least annually) and submitted to the Division Engineer upon request.
12) This well shall be constructed not more than 200 feet from the location specified on this permit.
13) This well is subject to administration by the Division Engineer in accordance with applicable decrees, statutes, rules, and regulations.
14) The issuance of this permit hereby cancels permit no. 238092.
15) The return flow from the use of this well must be through an individual waste water disposal system of the non-evaporative type where the water is returned to the same stream system in which the well is located.

NOTE: The ability of this well to withdraw its authorized amount of water from this non-renewable aquifer may be less than the 100 years upon which the amount of water in the aquifer is allocated, due to anticipated water level declines.

NOTE: To ensure a maximum productive life of this well, perforated casing should be set through the entire producing interval of the approved zone or aquifer indicated above.

NOTE: Standards for determining your annual water usage are 0.3 acre-feet per single family dwelling, 0.05 acre-feet for every four (4) large animals (or portion thereof) and 0.05 acre-feet for every 1,000 square feet of home gardens and lawns.

State Engineer's Office
Attn: Ms. Jolene Mackay
1313 Sherman Street, Room 818
Denver, CO 80203

RE: Transaction No. 3652346
Gary L. and Brenda L. Brinkman

Dear Ms. Mackay:

After receipt of your letter dated November 3, 2011 to Gary L. Brinkman and Brenda L. Brinkman, several events occurred.

First, a survey of the Brinkman's well indicated that the correct location of the Brinkmans' well is 1015 feet from the north section line and 1160 feet from the east section line. I am attaching a portion of the plat map which shows that information. I have made that correction on a newly completed GWS-44, which is enclosed.

Based on the corrected location, I believe that only one well is located within 600 feet of the Brinkmans' well. That well is owned by Bernard Hyland, permit no. 74484-F.

I mailed GWS-38 to Mr. and Mrs. Hyland and asked them if they would consent to the issuance of the new permit. Mr. Hyland indicated in a phone call that he would not do so unless it was proved to his satisfaction that no harm would occur to his well. Because I am not certain how one would go about proving that negative, I am operating under the assumption that his consent will not be given.

For that reason, I completed the enclosed GWS-44 and deleted the request for commercial use. As a result, I believe that this application may be evaluated pursuant to CRS § 37-90-137(2)(b)(II)(C). As I am sure you are aware, this section of the statute provides that no hearing is required when a well permit application affects a well located within 600 feet of an existing well, "If the proposed well will serve an individual residential site and the proposed pumping rate will not exceed fifteen gallons per minute...." The new application satisfies those criteria.

In regard to whether or not the application should be granted, I direct your attention to C.R.S. § 37-90-137(4)(c), which states: "Material injury to vested nontributary ground water rights shall not be deemed to result from the reduction of either hydrostatic pressure or water level in the aquifer."

I have requested that Mr. and Mrs. Brinkman resubmit the entire packet of material that they received from you with your November 3, 2011 letter, on the theory that you may disregard anything that is not required, rather than delaying the process by having to request material that was not provided.

Sincerely yours,

Henry D. Worley
