Subject: Utility Trench Backfill, Subgrade Preparation and Base Course Placement  
Within the Public Streets Rights of Ways of:

Jackson Creek Parkway & State Highway 105  
Monument, Colorado  
Entech Job No. 221459

Dear Mr. Sherwood:

Representatives of Entech Engineering, Inc. (Entech) periodically visited the site and performed field density testing during the subject construction processes. Testing was performed within the Town of Monument right-of-way (ROW), El Paso County ROW, and Colorado Department of Transportation (CDOT) ROW. Results of field density tests have previously been provided. Field density tests were taken by Entech personnel from August 14, 2025 to February 10, 2026. Results indicate the testing was performed in general compliance with the project specifications.

Representatives of Entech also periodically observed the sub-grade soil types and granular road base material placed for the street improvements. These materials appeared to be in general compliance with the project specifications.

We trust this has provided you with the information you require. If you have any questions or need additional information, please do not hesitate to contact us.

Respectfully Submitted,

ENTECH ENGINEERING, INC.
