

Howdy Elena,

Appologies if that is not your name, pulling from your email address. My name is Alex Smith (not made up I swear haha) and I am emailing you to voice my support for the projects planned at the Shire near Old Ranch Rd.

Seeing something with an eye towards green life and ecological security on that side of town is a morale boost and bulwark for the Springs.

I am admittedly a friend of the Phelan family, I have found them to be honest and passionate about sustainability in horticulture, in this county. That said, nobody had to talk me into spending the last hour piecing this plee together. As a former volunteer for Pikes Peak Urban Gardens and a current Colorado Master Gardener Apprentice I have witnessed the increased interest and lack of access to excitable horticultural projects in the area. This site and mission fits the bill.

Sorry to bother, just another thumbs up for the Shire and all its potential for the Northeast End!
