

Note that EPC has not completed a PA walk of this pond yet, as one has yet to be requested by the developer/contractor. We have reached out to them to see if they want to get one scheduled. Regardless, EPC Stormwater will at least schedule a walk for ourselves to check out this pond so we can see what punchlist items there are. And depending on those findings, I may have more comments on these as-builts and calcs. But in the meantime, I have provided some prelim/general comments on what you submitted. Thanks for getting these submitted nice and early, very helpful.

Re: **Citizen on Constitution Filing No. 1 - Detention Pond Certification Letter  
El Paso County, Colorado**

Dear Mr. Hopper:

This letter serves as the certification for the Detention Pond at Citizen on Constitution Filing No. 1, El Paso County, CO consistent with El Paso County Engineering Manual ("ECM") Section 5.10.B, **which states** that Engineering Record Drawings shall be accompanied by a certification letter from the Engineer of Record **which shall state** that the site and adjacent properties (as affected by work performed under the County permit) are stable and that the improvements (public improvements, common development improvements, site grading and paving) meet or exceed the minimum design requirements.

Based upon this information and information gathered during periodic site visits to the site during significant/key phases of the infrastructure installation, Kimley-Horn is of the opinion that the detention pond work performed under the County Permit, per Section 5.10.B of the ECM, have been constructed in general compliance with the approved Construction Plans as filed with the County dated November 21, 2022.

Attached to this letter are Record Drawings which certify that the public improvements meet or exceed the minimum design requirements, except as noted on the Record Drawings, and do not adversely affect the adjacent properties.

**Statement Of Engineer In Responsible Charge:**

I, Mitchell O. Hess, a registered Professional Engineer in the State of Colorado, in accordance with Sections 5.2 and 5.3 of the Bylaws and Rules of the State Board of Registration for Professional Engineers and Professional Land Surveyors, do hereby certify that I or a person under my responsible charge periodically observed the construction of the above-mentioned project. Based on the on-site field observations and review of pertinent documentation, it is my professional opinion that the required infrastructure improvements have been installed and are in general compliance with the approved Construction Plans as filed with El Paso County.

Mitchell O. Hess, P.E.  
Colorado No. 53916

Maybe just sympanctics, but to me, this comes off as you just stating what a Pond Cert letter should state. But you aren't actually stating it about this particular site. Please revise to not just quote the ECM, but to actually make the statement about the pond in question.

Revise statement to:  
"The site and adjacent properties (as affected by work performed under the County permit) are stable with respect to settlement and subsidence, sloughing of cut and fill slopes, revegetation or other ground cover, and that the improvements (public improvements, common development improvements, site grading and paving) meet or exceed the minimum design requirements."

For sites including detention and/or water quality facilities, the certification letter shall include a statement that the facilities provide the **required storage volume** and will meet the required **release rates** (as documented by an attached MHFD design form submitted with the original application), the stage areas, elevations, and outlet dimensions.

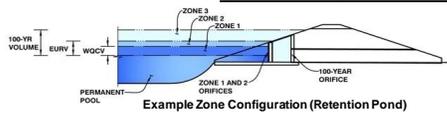

So reference that the updated MHFD calcs have been attached to this letter and why they were needed (ie: some of the inputs changed due to as-built conditions)
