

The two lights on site are shut off at night, but can be set up to run off of motion so if the homeless try to break in

A photometric plan is required for all illuminating devices, proposed and existing, depicting location, height, lighting levels in foot candles throughout the property, at property lines, and along adjacent rights-of-way. Refer to Section 6.2.3. of the Land Development Code for specific lighting standards. If requesting an Alternative Lighting plan, include the analysis of that proposed plan in the Letter of Intent. You can reference section 6.2.3.E in the Land Development Code.
