

Letter of Intent

For Ammunition1 MFG LLC

We plan to use the intended space for initial R&D of extremely small scale ammunition testing. Until we move into a commercial space in the near future.

We will not have signage, will be single employee with no traffic planned, but parking is available. Providing a zero impact to the local community.

The occupation is conducted in compliance with all the applicable building, fire, health, and environmental laws, codes, and regulations.
