Attn: Brad Walters
Inspections Supervisor

Re: ***Eagle Rising Filing No. 1 – Permanent Control Measures***
Project No. 61145 (PCD File No. SF2225)

Dear Mr. Walters:

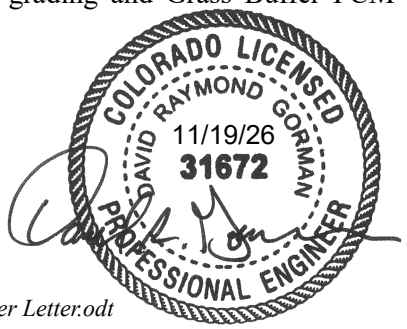

The permanent Stormwater Permanent Control Measures (PCMs) for Eagle Rising Filing No. 1 consists of Grass Buffers PCMs for Runoff Reduction water quality treatment adjacent to Eagle Wing Drive, which is the public paved cul-de-sac terminus, and Eagle Wing View, which is the private gated gravel road and cul-de-sac. The PCMs are indicated on the approved Grading and Erosion Control Plan for Eagle Rising Filing No. 1 (PCD File No. SF2225).

Statement Of Engineer In Responsible Charge:

I, Charles C. Crum, a Registered Professional Engineer in the State of Colorado, in accordance with Sections 5.2 and 5.3 of the Bylaws and Rules of the State Board of Registration for Professional Engineers and Professional Land Surveyors, do hereby certify that I or a person under my responsible charge periodically observed the construction of the above-mentioned project. Based on the on-site field observations and review of pertinent as-built documentation of the recently constructed Grass Buffer PCMs, it is my professional opinion that these new facilities have been installed, and are in general compliance with the previously approved Final Drainage Report and Grading and Erosion Control Plan for Eagle Rising Filing No. 1 as filed with El Paso County. The As-Built drawings accurately depict the final installation of the Grass Buffer PCMs.

The site and adjacent properties (as affected by work performed under the County permit) are stable with respect to settlement and subsidence, sloughing of cut and fill slopes, revegetation or other ground cover, and that the improvements consisting of the site grading and Grass Buffer PCM meet or exceed the minimum design requirements.

M.V.E., Inc.
