

Based on the scale provided, the property boundary measurements appear inaccurate.

Please list the building square footages and depict the building setbacks from the property lines. It may be necessary to create a second page if you believe the page is too cluttered. Revised

Show the location of the existing signage. Revised

Layout of the parking area? How many parking spaces does this accommodate? Parking computation is required. How will the traffic circulate through the parking area? ADA parking/pathways/etc? There is no indication of accessibility for ADA on this plan.

Per the comment review meeting, this detail will be provided at the PPR stage. Parking will be provided to allow for up to 325 vehicles.

The scale appears to have been altered when flattened. If this occurs again, the calibration tool will work. Either way, a note has been added to indicate a survey will be submitted at the PPR stage. Additionally, the items are all movable and may be relocated on the property provided they are not within the setbacks.

Remove access from site plan since deviation was denied for temporary access.

One of the most important details associated with this request is the proposed number of guests and how they will circulate on the property. Please provide this level of detail at the special use stage. In rural areas, parking lots of more than 25 cars shall be paved. How will this be addressed? Dust from the unpaved components is already a noted concern on this property.

One of the neighbors identified that they desired a setback from the property line for all activities. this is to accommodate that request.

What is this? Why is it only on the west side of the property? It is also not dimensioned on this plan.

What kind of fence? Please note that a chain link fence will not provide adequate screening. Revised

Vicinity Map
Revised, however vicinity maps are not required to be to-scale
