Traffic Engineer's Statement

This traffic report and supporting information were prepared under my responsible charge and they comport with the standard of care. So far as is consistent with the standard of care, said report was prepared in general conformance with the criteria established by the County for traffic reports.

Developer's Statement

I, the Developer, have read and will comply with all commitments made on my behalf within this report.

RE: Mayberry Phase 1
Amendment to the Ellicott Town
Center Phase 1 PUD/Preliminary Plan
El Paso County, CO
Transportation Memorandum
EPC PCD File No.: PUDSP219
LSC #S214300

Dear Mr. Mick

LSC Transportation Consultants, Inc. has prepared this traffic technical memorandum for the proposed Preliminary Plan and PUD Amendment for Phase 1 of Ellicott Town Center. The site is located generally southwest of Highway 94 and Log Road in El Paso County, Colorado.

The land use and proposed street connections (access points) to Highway 94 have not changed from 2012. Filing 1 remains 98 lots and the Phase 1 Preliminary Plan including Filings 1 and 4 (formerly referred to as Filing 2) remains 240 lots.

Traffic analysis of this development was included in the June 2020 TIS report entitled *Ellicott Town Center Filing 2 Traffic Impact Study March 31, 2020** (*Note: Minor Revision June 2, 2020). The El Paso County reference numbers are PCD File Nos. CS192 and SF 1910. **Please refer to this document for analysis of traffic impacts and improvement recommendations.**

This memo identifies some minor modifications associated with the internal Mayberry Town Center plan and streets to become El Paso County public streets. The effects of these changes on the previous analysis of the state highway intersections is negligible. Therefore, the prior analysis at the state highway intersections remain valid. Additional detail specific to the internal development streets shown on the PUD (proposed future County streets) has been added to this report.

PRIOR TIS REPORTS:

- The prior report for this 240-lot Phase 1 Ellicott Town Center Preliminary Plan was the February 17, 2006 *Ellicott Town Center Preliminary Plan Updated Traffic Impact and Access Analysis Report*.
- *Ellicott Town Center Filing No. 1 Transportation Memo* dated January 11, 2019.
- Before the Phase 1 Preliminary Plan, LSC has prepared the following reports for the overall ETC PUD: the initial August 30, 2005 *Ellicott Town Center Traffic Impact and Access Analysis Report*; the Ellicott Town Center Updated Sketch Plan-Level Traffic Impact and Access Analysis Reports dated October 31, November 23, December 22, 2005, and April 4, 2006.
- Other “CDOT Access Permit Memorandums,” were prepared several years ago. These have been replaced by the June 2020 TIS report referenced in the third paragraph on Page 1.

LAND USE AND ACCESS

Proposed PUD/Preliminary Plan Amendment

Please refer to the attached plan. The plan includes the 240 lots for single-family homes. Access would be to two locations on Highway 94 at New Log Road and Springs Road. Please refer to the attached Exhibit 1 for minor changes in the internal street system. This exhibit is a modified version of Figure 13 from the June 2020 TIS report. The current PUD Amendment sheet is also attached for reference.

Current Status of Adjacent Filings 2 and 3

Zoning for Commercial Filings 2 and 3 has been approved. Filing No. 2 will be developed first. Filing No. 3 will be developed later. Site plans for Filing No. 3 have not been submitted.

TRAFFIC IMPACT ANALYSIS AND ROADWAY IMPROVEMENTS

Please refer to the June 2020 TIS report entitled *Ellicott Town Center Filing 2 Traffic Impact Study March 31, 2020** (*Note: Minor Revision June 2, 2020). The El Paso County reference numbers are PCD File Nos. CS192 and SF 1910.

This memo includes a copy of Table 12 from that report, with notations and additions specific to the internal development streets (proposed as future County streets) shown on the PUD. The copy of that table with notations/additions is called **Exhibit 1** in this report and is attached.

Mr. John Mick
Mayberry Phase 1

October 22, 2021

STREET CLASSIFICATION

The attached Exhibit 1 shows the proposed street classifications. This exhibit is a modified version of Figure 13 from the June 2020 TIS report. The figure has been modified to illustrate the minor street network modifications. These modifications include:

- Removal of local street connections through commercial Filings 2 and 3 (except Springs Road).
- Modification to Village Main Street. The segment through the residential areas of Filings 1 and 2 is now shown as an Urban Local street segment. This PUD has been updated to include a discontinuity between New Log Road and Springs Road. The resulting short segment west of Springs Road is now shown as Besseyi Way. This change will likely result in a shift of some traffic to Mayberry Drive, a Collector Street. This is actually an improvement in the plan, as it would shift through traffic to the collector street – such as future commercial traffic which will need to travel east/west internally to and from New Log Road due to the left-turn restriction at SH 94/Springs Road. This would not affect the SH 94 projections and intersection analysis because a minor shift in travel route to Mayberry Drive would not likely change the turning volumes at the SH 94 intersections.

In the interim (Filings 1 and 2), prior to construction of Mayberry Drive, a temporary 24-foot-wide, gravel road segment (to be paved once ADT exceeds 200 vehicles per day) connecting Filing 1 with Springs Road via the Village Main Street connection to Springs Road (between the east edge of Filing 1 and Springs Road – as shown on the approved CDs for Filing 1) will be used until Filing 4 is developed and Mayberry Drive is installed.

- Several deviations have been approved for variations to the standard ECM cross sections by classification. Copies are attached for reference.

APPROVED DEVIATIONS

Attached are several approved deviations which apply to this application. Proposed changes are indicated in **bold**.

- **Village Main Street** is ultimately classified as an Urban Non-Residential Collector through the Town Center area, and an Urban Residential Collector through the residential areas. The approved deviation consists of modified cross-section elements including a 36-foot asphalt width for the Non-Residential Collector and a 30-foot asphalt width for the Residential Collector road segments, as well as an interim gravel secondary access road section during the initial phase of development.

PROPOSED CHANGES: The segment through the residential areas is no longer proposed as a Residential Collector, rather an Urban Local. The interim secondary road is planned to gravel, initially, but must be paved once ADT exceeds 200 vehicles per day.

see above

Mr. John Mick
Mayberry Phase 1

Please explain the reasoning for the classification of the southerly portion of this road to urban local. October 22, 2021
Transportation Memorandum

- **New Log Road** is ultimately divided into two sections. The approved deviation consists of:
 - Modified cross-section elements including 15-foot shoulders, 10-foot sidewalks, bike lanes permitted, and on-street parking allowed for the ultimate road section, as well as an interim rural shoulder to support traffic during the initial phases of development.
 - The *ECM*-prescribed minimum horizontal-centerline radius for an Urban Minor Arterial is 565 feet. The approved deviation also allows for a slightly reduced minimum centerline radius of 527 feet at couplet transitions as depicted on the attached Plan & Profile Drawing.

PROPOSED CHANGES: None

- **Mayberry Boulevard** is classified as a Collector. The approved deviation consists of modified cross-section elements including an ultimate divided section with landscaped median and a Phase 1 half-section with a 29-foot asphalt width.

PROPOSED CHANGES: None.

- **Springs Road:** Prior PUD approvals addressed deviations for the 65' Springs Road ROW.
CURRENT NOTES (May reflect changes): The 65'-ROW segment for a Minor Collector (PUD classification) would extend from SH 94 to the south boundary of Filings 2 & 3. South of this point, the classification will be Urban Local with 60' of ROW.

CHANGES FROM THE JUNE 2020 TIS REPORT

- The classification figure, Figure 13 from the June 2020 TIS Report, has been revised. The updated version is presented in this memo as "**Exhibit 1**."
- The improvements Table, Table 12 from the June 2020 TIS Report, has been updated. The updated version is presented in this memo as "**Exhibit 2**."
- This PUD has been updated to include a discontinuity between New Log Road and Springs Road. The resulting short segment west of Springs Road is now shown as Besseyi Way. This change will likely result in a shift of some traffic to Mayberry Drive, a Collector Street. This is actually an improvement in the plan, as it would shift through traffic to the Collector street – such as Filings 2 and 3 future commercial traffic which will need to travel east/west internally to and from New Log Road and the SH 94/New Log Road intersection due to the left-turn restriction at SH 94/Springs Road. This would not affect the SH 94 projections and intersection analysis because a minor shift in travel route to Mayberry Drive would not likely change the turning volumes at the SH 94 intersections.
- The June 2020 TIS report did not specifically address the traffic calming circle intersection at Springs Road/Village Center (now Besseyi Way). Since the previous PUD Amendment submittal, this circle has been removed and is now shown as a conventional two-way, stop-sign controlled intersection.

- The June 2020 TIS report did not specifically address the intersection of Mayberry Drive/Springs Road. This intersection is planned to be designed and constructed as a one-lane mini-roundabout. This will be a Collector-Local intersection. For the proposed mini-roundabout, design analysis, including truck turning, fastest paths, etc. will be provided for review with the Filing No. 4 final plat.

For this PUD amendment, a mini roundabout that was recently approved for a project in El Paso County has been used as a template to show that the mini-roundabout overall footprint/ROW needs can be met given the lot and street layout. Should any adjustments with respect to the footprint/positioning of the roundabout, accompanying pedestrian facilities and ROW be needed based on the detailed design report, the intersection (and Mayberry Drive street legs/approaches) could be shifted south slightly to avoid encroaching into the Filing 4 lots shown on the PUD. This includes easements for mini-roundabout sight-distance lines for the yield-controlled approaches and stopping sight-distance lines of sight.

CDOT ACCESS PERMITS

The CDOT access permits for New Log Road and Springs Road public street connections (access points) to Highway 94 are 218053 and 218054. Both permits have been finalized. Note: The attached Exhibit 2 references these approved access permits for all CDOT-facility improvements.

ROADWAY IMPROVEMENT FEE PROGRAM

This project will be required to participate in the El Paso County Road Improvement Fee Program. The development will be annexed into the ten-mil PID. The 2019 ten-mil PID building permit fee portion associated with this option is \$1,221 per single-family dwelling unit. Based on 240 lots, the total building permit fee would be \$293,040.

Roadway Functional Classifications
Ellicott Town Center Rezone (LSC# 194060)

Exhibit 2 ¹ : Roadway Improvements			
Item #	Improvement	Timing	Responsibility
El Paso County Roadway Segment Improvements			
1	New Log Road (Highway 94 south into the project) construct as an Urban Minor Arterial per the PUD	With Filing No. 1 Note: Phased half-section (northbound couplet) for Filing 1 and full couplet segments beyond Filing 1 per the PUD plans.	Applicant
2	Springs Road (Highway 94 south into the project) construct as a gravel, secondary access road	With Filing No. 1	Applicant
3	Springs Road (Highway 94 south into the project to Cattlemen Run) construct as an Urban Non-Residential Collector	With Filing No. 2 - The north segment of Springs Road is shown as a Minor Collector (PUD-specific classification) with 65' of ROW. The Minor Collector segment will extend south to south boundary of the Filings 2 & 3. With Filing No. 1 - A paved street connection will be provided with Filing No. 1	Applicant
4	Cattlemen Run west of Springs Road into Filing 2 as a Local Street	With Filing No. 2 [For reference only - not part of this PUD Amendment]	Applicant
5	Cattlemen Run east of Springs Road into Filing 3 as a Local Street	With Filing No. 3 [For reference only - not part of this PUD Amendment]	Applicant
6	Springs Road south of Cattlemen Run Road into Filing 3 as an Urban Residential Collector	With Filing No. 3 or With Filing No. 4 - The south segment of Springs Road is shown as an Urban Local. The Urban Local segment will extend from south boundary of the Filings 2 & 3 to Mayberry Drive.	Applicant
7	Mayberry Drive & Springs Road	With Filing No. 4. - Construct as a one-lane, mini-roundabout Urban Local/Collector intersection	Applicant
8	Per CDOT: It is requested that 80-foot pavement section with 4-foot shoulders on EB/WB travel lanes along the property frontage to Hwy 94 be preserved for future highway expansion in accordance with the El Paso County 2060 Corridor Preservation Plan.	With Filing No. 4. - Construct as a four-leg, conventional, Urban Local/Collector TWSC intersection	Applicant
CDOT - New Log Road/SH 94 Intersection Improvements			
9	Eastbound Right Turn Deceleration Lane	As per the approved Access Permits	Applicant
10	Westbound Left Turn Deceleration Lane - 525' to accommodate Filings 1,2 and 3		Applicant
11	A left-turn acceleration lane will be required for the northbound to westbound movement.		Applicant
12	Lengthening of the above westbound left turn deceleration lane lengthening to accommodate additional stacking for future development - length TBD with future TIS reports		Applicant
13	Eastbound Right Turn Acceleration Lane		Applicant
CDOT - Springs Road/SH 94 Intersection Improvements			
14	Eastbound Right Turn Deceleration Lane	As per the approved Access Permits	Applicant
15	Construct a raised center median on SH 94 to prohibit westbound and northbound left-turns at the SH 94/Springs Road intersection required with construction of the eastbound right turn deceleration lane.		Applicant
16	Eastbound Right Turn Acceleration Lane		Applicant
CDOT - Peyton Highway/SH 94 Intersection Improvements			
17	Westbound Left Turn Deceleration Lane - 525' plus taper	As per the approved Access Permits	Applicant
18	Eastbound Left Turn Deceleration Lane		To be
19	Westbound Right Turn Acceleration Lane (for southbound to westbound right turning traffic)		To be constructed by
20	Westbound Right Turn Deceleration Lane - 500' plus taper		Applicant
21	Escrow fair share percentage of the cost of future westbound right turn and left turn deceleration lanes; estimated cost: \$125,000 (allocated \$75,000 to left and \$50,000 to right).Please refer to separate Escrow Tables 8 and 9 for details.		Applicant
22	Escrow fair share percentage of the cost of a future traffic signal; current signal cost are about \$500,000.Please refer to separate Escrow Table 7 for details.		Applicant
CDOT - Ellicott Highway/SH 94 Intersection Improvements			
23	Eastbound Right Turn Deceleration Lane and Taper	As per the approved Access Permits	Applicant
24	Escrow fair share percentage of the cost of a 273-ft eastbound right turn lane. Please refer to separate Escrow Table 11 for details.		Applicant
25	Escrow fair share percentage of the cost of a future traffic signal; current signal cost are about \$500,000. Please refer to separate escrow Table 10 for details)		Applicant
CDOT - Future ROW Preservation for SH 94			
26	Per CDOT: It is requested that 80-foot pavement section with 4-foot shoulders on EB/WB travel lanes along the property frontage to Hwy 94 be preserved for future highway expansion in accordance with the El Paso County 2060 Corridor Preservation Plan.	As per the approved Access Permits	Applicant

*Prior CDOT comments from 2006 indicate that the left-turn deceleration lane should be designed to accommodate future year left-turn volume. However, the applicant would prefer to phase the lane length with development phasing.

OWNER, APPLICANT, AND ENGINEER DECLARATION

To the best of my knowledge, the information on this application and all additional or supplemental documentation is true, factual and complete. I am fully aware that any misrepresentation of any information on this application may be grounds for denial. I have familiarized myself with the rules, regulations and procedures with respect to preparing and filing this application. I also understand that an incorrect submittal will be cause to have the project removed from the agenda of the Planning Commission, Board of County Commissioners and/or Board of Adjustment or delay review until corrections are made, and that any approval of this application is based on the representations made in the application and may be revoked on any breach of representation or condition(s) of approval.

DEVIATION REQUEST (Attach diagrams, figures, and other documentation to clarify request)

A deviation from the standards of or in Section **2.3.2** of the Engineering Criteria Manual (ECM) is requested.

Identify the specific ECM standard which a deviation is requested:

ECM Section 2.3.2 Design Standards by Functional Class (Table 2-7 Roadway Design Standards):

Village Main Street is ultimately classified as an Urban Non-Residential Collector through the Town Center area, and an Urban Residential Collector through the residential areas. The proposed deviations consist of modified cross-section elements including a 36-foot asphalt width for the Non-Residential Collector and a 30-foot asphalt width for the Residential Collector road segments, as well as an interim gravel secondary access road section during the initial phase of development. The proposed deviations are depicted on the Typical Road Section Drawings (Sections A-C, Sh. TY1).

State the reason for the requested deviation:

The proposed roadway design deviations are requested based on the new urbanist development program which seeks to create a pedestrian-friendly community. The proposed typical road cross-sections were included in the previously approved Ellicott Town Center PUD.

Explain the proposed alternative and compare to the ECM standards (May provide applicable regional or national standards used as basis):

Village Main Street is ultimately classified as an Urban Non-Residential Collector through the Town Center area, and an Urban Residential Collector through the residential areas. The proposed deviations consist of modified cross-section elements including a 36-foot asphalt width for the Non-Residential Collector and a 30-foot asphalt width for the Residential Collector road segments, as well as an interim gravel secondary access road section during the initial phase of development. The proposed deviations are depicted on the Typical Road Section Drawings (Sections A-C, Sh. TY1).

The current ECM standard is a 48-foot asphalt width for an Urban Non-Residential Collector and a 36-foot asphalt width for an Urban Residential Collector. The narrower road widths are consistent with new urbanist land planning as approved in the Ellicott Town Center PUD. Minimum travel lane widths of 12 feet are provided in accordance with current ECM standards.

The proposed deviations will reduce traffic speeds and provide for enhance traffic calming.

LIMITS OF CONSIDERATION

(At least one of the conditions listed below must be met for this deviation request to be considered.)

- The ECM standard is inapplicable to the particular situation.
- Topography, right-of-way, or other geographical conditions or impediments impose an undue hardship and an equivalent alternative that can accomplish the same design objective is available and does not compromise public safety or accessibility.
- A change to a standard is required to address a specific design or construction problem, and if not modified, the standard will impose an undue hardship on the applicant with little or no material benefit to the public.

Provide justification:

The requested deviations are justified by the previously approved Ellicott Town Center PUD and LSC Traffic Study, which demonstrates that traffic operations will provide acceptable levels of service.

Denial of the deviation request would result in significant revisions to the previously approved PUD development plan, requiring PC and Board of County Commissioners re-approvals.

CRITERIA FOR APPROVAL

Per ECM section 5.8.7 the request for a deviation may be considered if the request is not based exclusively on financial considerations. The deviation must not be detrimental to public safety or surrounding property. The applicant must include supporting information demonstrating compliance with all of the following criteria:

The deviation will achieve the intended result with a comparable or superior design and quality of improvement.

The proposed deviations will result in a comparable or superior roadway design, consistent with El Paso County standards and the approved Ellicott Town Center PUD. The previously approved PUD seeks to create a high-quality community enhancing property values in eastern El Paso County. The proposed deviations support the pedestrian-friendly nature of the overall development plan, resulting in a superior design.

The deviation will not adversely affect safety or operations.

The proposed roadway improvements will be constructed to County standards, and the requested deviations will not adversely affect safety or operations. The LSC Traffic Study for this project demonstrates that traffic operations through the proposed couplet will provide an acceptable level of service while creating the desired Town Center entry to the project. The proposed roadway deviations will generally improve pedestrian safety and will not adversely affect traffic operations.

The proposed deviations will result in decreased traffic speeds and enhanced traffic calming, improving traffic safety.

The deviation will not adversely affect maintenance and its associated cost.

Maintenance will not be adversely affected based on the proposed deviations. The proposed road cross sections and site layout will provide ample access and clearance for maintenance, and all pavement designs will be subject to County approval.

The deviation will not adversely affect aesthetic appearance.

Aesthetic appearance will not be adversely affected based on the proposed deviations. The proposed deviations in typical road cross sections will enhance the streetscape resulting in improved aesthetic appearance.

The deviation meets the design intent and purpose of the ECM standards.

The proposed deviations consist of relatively minor changes to County standard road sections, consistent with the previously approved Ellicott Town Center PUD.

The deviation meets the control measure requirements of Part I.E.3 and Part I.E.4 of the County's MS4 permit, as applicable.

This deviation request has no impact on control measure requirements of the County's MS4 permit.

REVIEW AND RECOMMENDATION:

Approved by the ECM Administrator

This request has been determined to have met the criteria for approval. A deviation from Section 2.3.2 of the ECM is hereby granted based on the justification provided.

Denied by the ECM Administrator

This request has been determined not to have met criteria for approval. A deviation from Section _____ of the ECM is hereby denied.

L

J

ECM ADMINISTRATOR COMMENTS/CONDITIONS:

The interim gravel segment shall be paved to a 20-foot minimum width, plus 2-foot gravel shoulders, upon traffic counts exceeding 200 ADT.

Paving of Village Main Street shall be provided by the developer at the time traffic counts exceed 200 ADT. Traffic counts shall be performed upon buildout of each phase/filing of the overall development or sooner if determined by the ECM Administrator.

1.1. PURPOSE

The purpose of this resource is to provide a form for documenting the findings and decision by the ECM Administrator concerning a deviation request. The form is used to document the review and decision concerning a requested deviation. The request and decision concerning each deviation from a specific section of the ECM shall be recorded on a separate form.

1.2. BACKGROUND

A deviation is a critical aspect of the review process and needs to be documented to ensure that the deviations granted are applied to a specific development application in conformance with the criteria for approval and that the action is documented as such requests can point to potential needed revisions to the ECM.

1.3. APPLICABLE STATUTES AND REGULATIONS

Section 5.8 of the ECM establishes a mechanism whereby an engineering design standard can be modified when if strictly adhered to, would cause unnecessary hardship or unsafe design because of topographical or other conditions particular to the site, and that a departure may be made without destroying the intent of such provision.

1.4. APPLICABILITY

All provisions of the ECM are subject to deviation by the ECM Administrator provided that one of the following conditions is met:

- The ECM standard is inapplicable to a particular situation.
- Topography, right-of-way, or other geographical conditions or impediments impose an undue hardship on the applicant, and an equivalent alternative that can accomplish the same design objective is available and does not compromise public safety or accessibility.
- A change to a standard is required to address a specific design or construction problem, and if not modified, the standard will impose an undue hardship on the applicant with little or no material benefit to the public.

1.5. TECHNICAL GUIDANCE

The review shall ensure all criteria for approval are adequately considered and that justification for the deviation is properly documented.

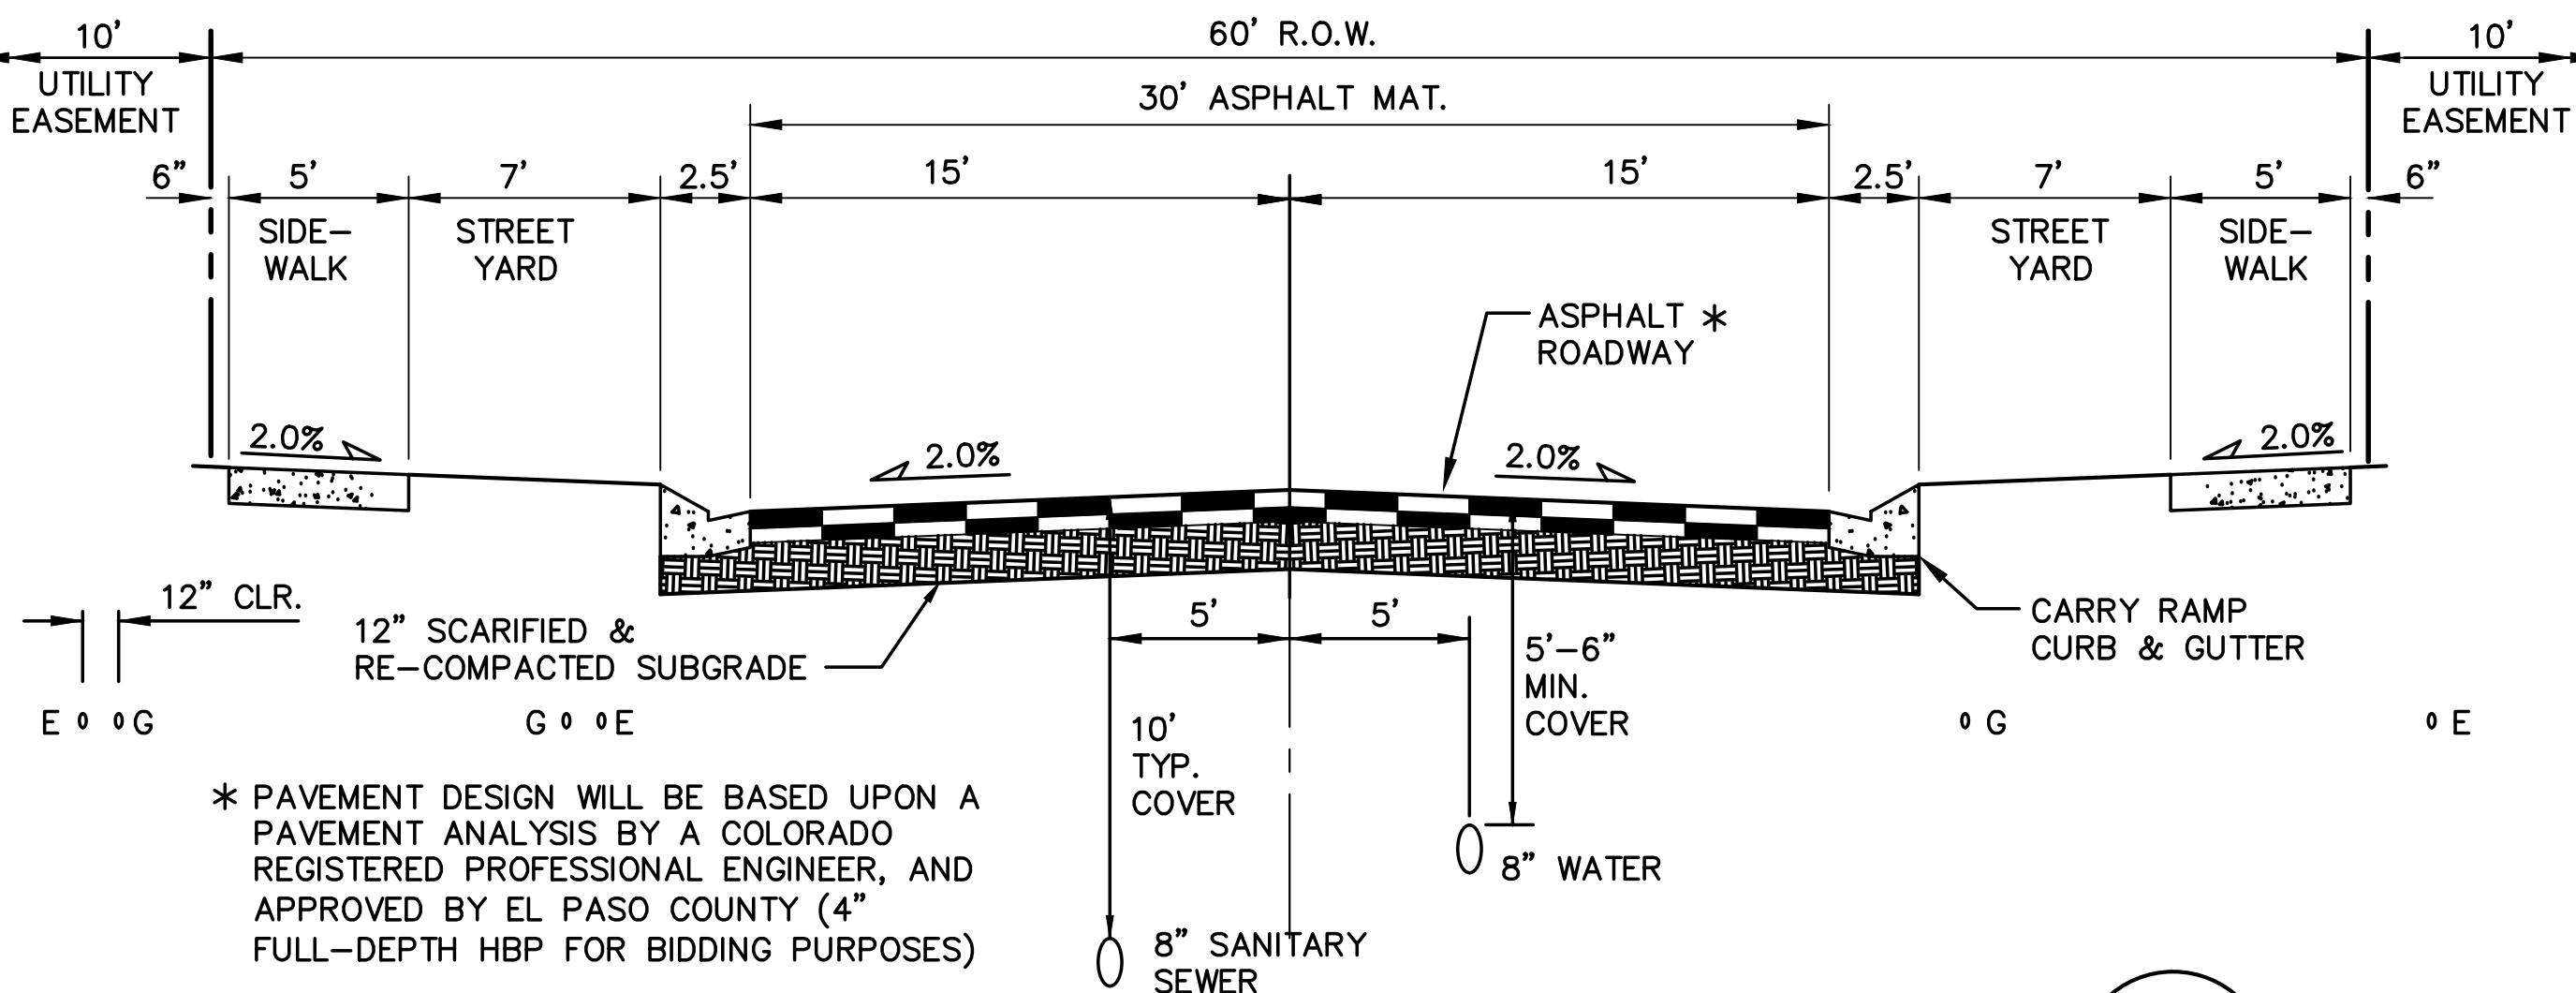

1.6. LIMITS OF APPROVAL

Whether a request for deviation is approved as proposed or with conditions, the approval is for project-specific use and shall not constitute a precedent or general deviation from these Standards.

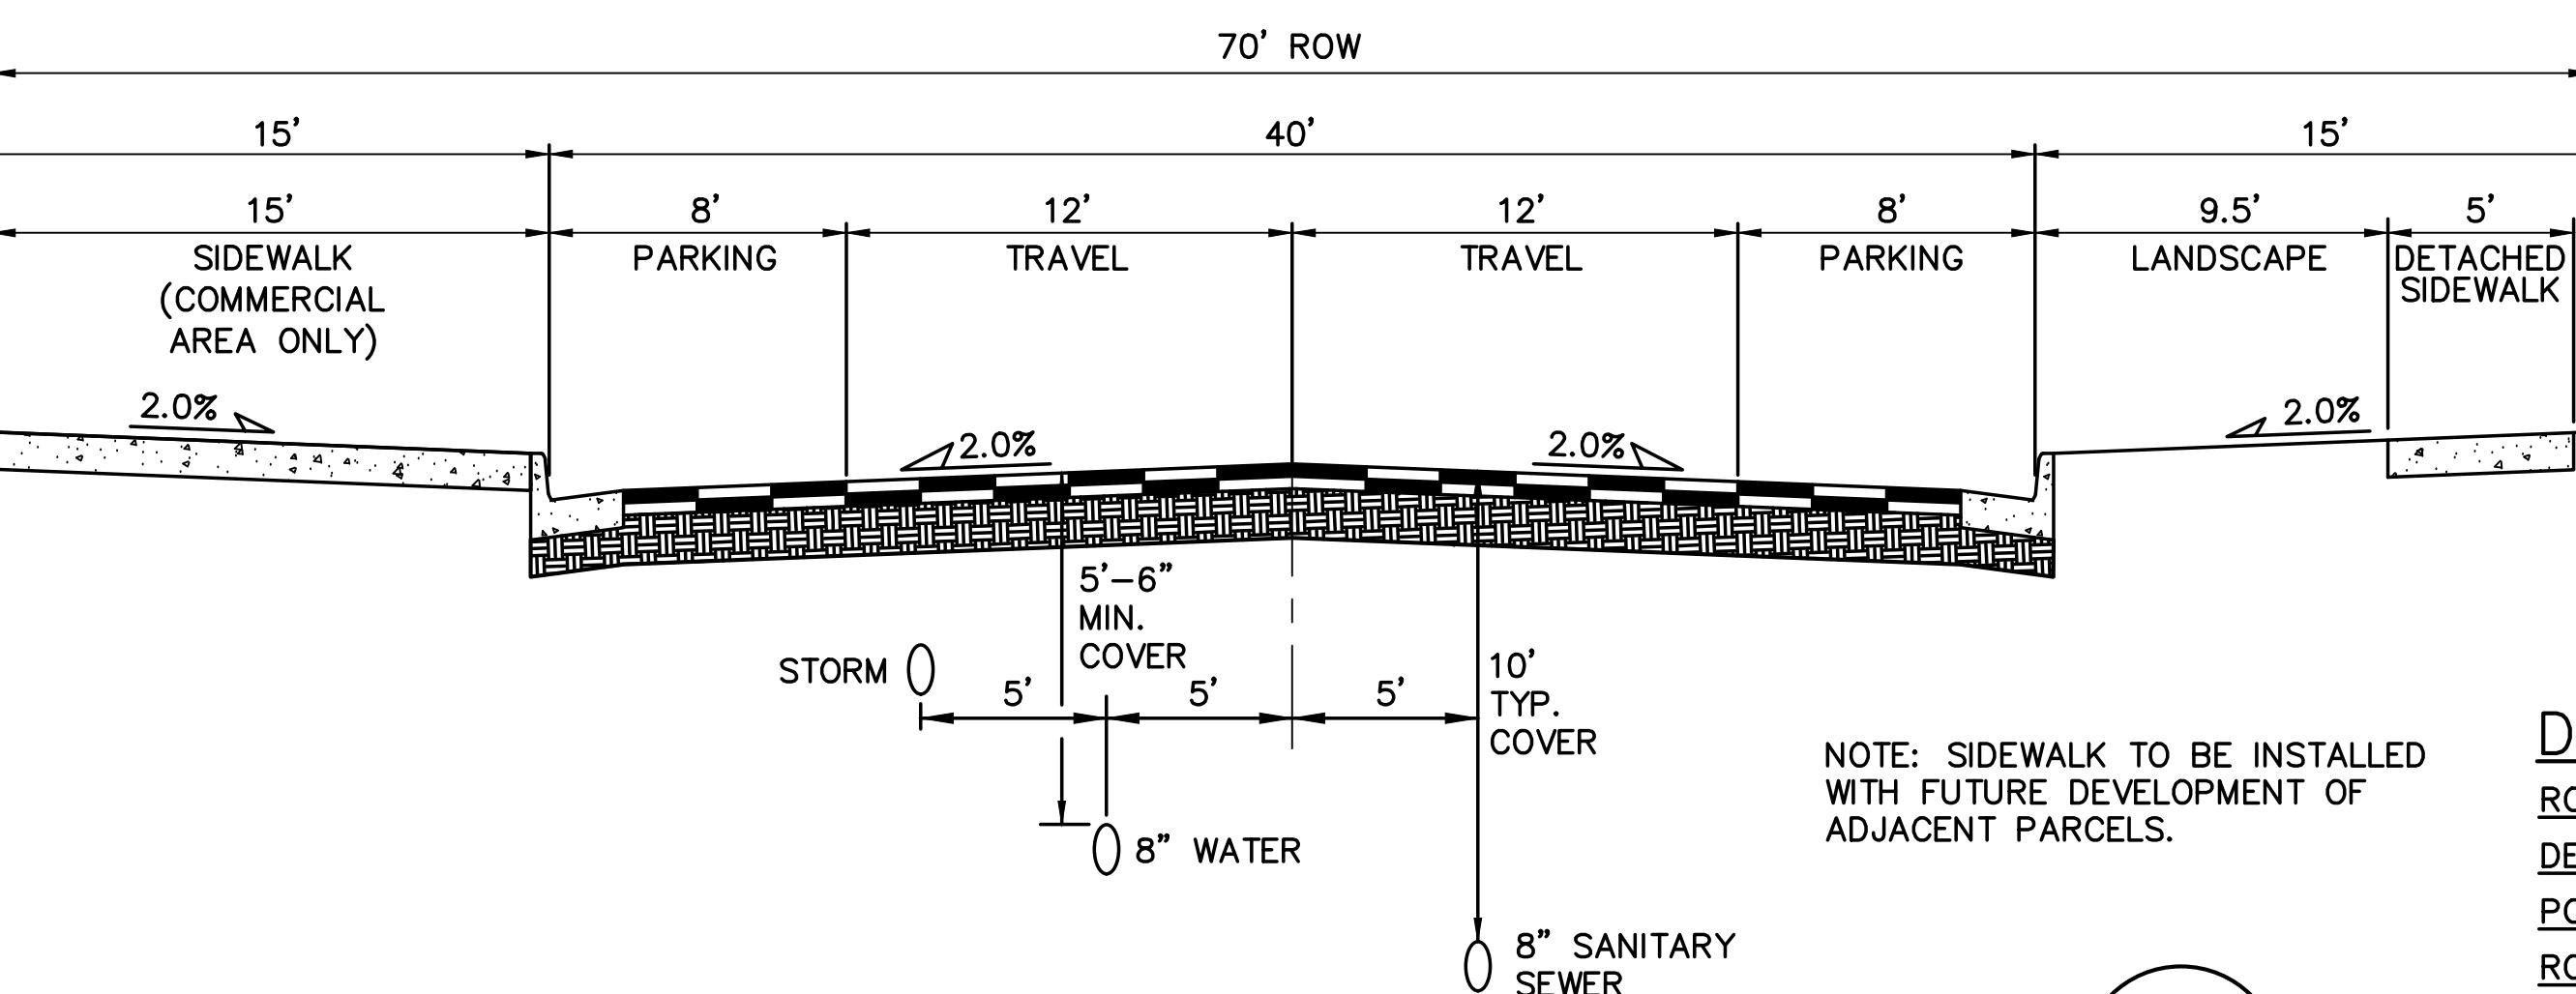

1.7. REVIEW FEES

A Deviation Review Fee shall be paid in full at the time of submission of a request for deviation. The fee for Deviation Review shall be as determined by resolution of the BoCC.

NOTE: STREET TREES MAY BE PLANTED IN STREET YARD WITHIN ROW SUBJECT TO COUNTY STANDARDS

DEVIATION REQUEST (Attach diagrams, figures, and other documentation to clarify request)

A deviation from the standards of or in Section **2.3.2** of the Engineering Criteria Manual (ECM) is requested.

Identify the specific ECM standard which a deviation is requested:

ECM Section 2.3.2 Design Standards by Functional Class (Table 2-6 Roadway Design Standards):

New Log Road is ultimately classified as an Urban Minor Arterial roadway. The proposed deviations consist of modified cross-section elements including 15-foot attached sidewalks, bike lanes permitted, and on-street parking allowed for the ultimate road section, as well as an interim rural asphalt road section during the initial phase of development. The proposed deviations are depicted on the Typical Road Section Drawings (Sh. TY1-TY2).

The ECM-prescribed minimum horizontal centerline radius for an urban minor arterial is 565 feet. This deviation request also allows for a slightly reduced minimum centerline radius of 527 feet at couplet transitions as depicted on the attached Plan & Profile Drawing (Sh. PP1).

State the reason for the requested deviation:

The proposed roadway design deviations are requested based on the new urbanist development program which seeks to create a pedestrian-friendly community. The proposed typical road cross-sections were included in the previously approved Ellicott Town Center PUD.

Explain the proposed alternative and compare to the ECM standards (May provide applicable regional or national standards used as basis):

The ultimate road section of New Log Road consists of a 2-lane, 1-way Couplet through the Town Center area in accordance with the approved Ellicott Town Center PUD, as depicted in Section A, Sheet TY2.

The interim road cross section consists of a 2-lane rural residential road section during Filing No. 1. The interim rural road section depicted on Section F, Sheet TY1 conforms to County standards for rural local roads.

The proposed minimum centerline radius of 527 feet is only a slight reduction compared to the standard minimum radius of 565 feet.

The proposed deviation will reduce traffic speed and provide for enhanced traffic calming.

The proposed access spacing along Log Road will be further evaluated and approved by the County in conjunction with future development of the adjoining commercial tracts.

LIMITS OF CONSIDERATION

(At least one of the conditions listed below must be met for this deviation request to be considered.)

- The ECM standard is inapplicable to the particular situation.
- Topography, right-of-way, or other geographical conditions or impediments impose an undue hardship and an equivalent alternative that can accomplish the same design objective is available and does not compromise public safety or accessibility.
- A change to a standard is required to address a specific design or construction problem, and if not modified, the standard will impose an undue hardship on the applicant with little or no material benefit to the public.

Provide justification:

The requested deviations are justified by the previously approved LSC Traffic Study and the Ellicott Town Center PUD. The traffic study demonstrates that traffic operations will provide acceptable levels of service.

Denial of the deviation request would result in significant revisions to the previously approved PUD development plan, requiring PC and Board of County Commissioners re-approvals.

CRITERIA FOR APPROVAL

Per ECM section 5.8.7 the request for a deviation may be considered if the request is not based exclusively on financial considerations. The deviation must not be detrimental to public safety or surrounding property. The applicant must include supporting information demonstrating compliance with all of the following criteria:

The deviation will achieve the intended result with a comparable or superior design and quality of improvement.

The proposed deviations will result in a comparable or superior roadway design, consistent with El Paso County standards and the approved Ellicott Town Center PUD. The previously approved PUD seeks to create a high-quality community enhancing property values in eastern El Paso County. The proposed deviations support the pedestrian-friendly nature of the overall development plan, resulting in a superior design.

The deviation will not adversely affect safety or operations.

The proposed roadway improvements will be constructed to County standards, and the requested deviations will not adversely affect safety or operations. The LSC Traffic Study for this project demonstrates that traffic operations through the proposed couplet will provide an acceptable level of service while creating the desired Town Center entry to the project. The proposed roadway deviations will generally improve pedestrian safety and will not adversely affect traffic operations.

The proposed deviations will reduce traffic speed and provide for enhanced traffic calming, resulting in improved traffic safety.

The deviation will not adversely affect maintenance and its associated cost.

Maintenance will not be adversely affected based on the proposed deviations. The proposed road cross sections and site layout will provide ample access and clearance for maintenance, and all pavement designs will be subject to County approval.

The deviation will not adversely affect aesthetic appearance.

Aesthetic appearance will not be adversely affected based on the proposed deviations. The proposed deviations in typical road cross sections will enhance the streetscape resulting in improved aesthetic appearance.

The deviation meets the design intent and purpose of the ECM standards.

The proposed deviations consist of relatively minor changes to County standard road sections, consistent with the previously approved Ellicott Town Center PUD.

The deviation meets the control measure requirements of Part I.E.3 and Part I.E.4 of the County's MS4 permit, as applicable.

This deviation request has no impact on control measure requirements of the County's MS4 permit.

REVIEW AND RECOMMENDATION:

Approved by the ECM Administrator

This request has been determined to have met the criteria for approval. A deviation from Section _____ of the ECM is hereby granted based on the justification provided

2.3.2

Denied by the ECM Administrator

This request has been determined not to have met criteria for approval. A deviation from Section _____ of the ECM is hereby denied.

ECM ADMINISTRATOR COMMENTS/CONDITIONS:

1.1. PURPOSE

The purpose of this resource is to provide a form for documenting the findings and decision by the ECM Administrator concerning a deviation request. The form is used to document the review and decision concerning a requested deviation. The request and decision concerning each deviation from a specific section of the ECM shall be recorded on a separate form.

1.2. BACKGROUND

A deviation is a critical aspect of the review process and needs to be documented to ensure that the deviations granted are applied to a specific development application in conformance with the criteria for approval and that the action is documented as such requests can point to potential needed revisions to the ECM.

1.3. APPLICABLE STATUTES AND REGULATIONS

Section 5.8 of the ECM establishes a mechanism whereby an engineering design standard can be modified when if strictly adhered to, would cause unnecessary hardship or unsafe design because of topographical or other conditions particular to the site, and that a departure may be made without destroying the intent of such provision.

1.4. APPLICABILITY

All provisions of the ECM are subject to deviation by the ECM Administrator provided that one of the following conditions is met:

- The ECM standard is inapplicable to a particular situation.
- Topography, right-of-way, or other geographical conditions or impediments impose an undue hardship on the applicant, and an equivalent alternative that can accomplish the same design objective is available and does not compromise public safety or accessibility.
- A change to a standard is required to address a specific design or construction problem, and if not modified, the standard will impose an undue hardship on the applicant with little or no material benefit to the public.

1.5. TECHNICAL GUIDANCE

The review shall ensure all criteria for approval are adequately considered and that justification for the deviation is properly documented.

1.6. LIMITS OF APPROVAL

Whether a request for deviation is approved as proposed or with conditions, the approval is for project-specific use and shall not constitute a precedent or general deviation from these Standards.

1.7. REVIEW FEES

A Deviation Review Fee shall be paid in full at the time of submission of a request for deviation. The fee for Deviation Review shall be as determined by resolution of the BoCC.

PCD File No. SF-18-025

DEVIATION REQUEST (Attach diagrams, figures, and other documentation to clarify request)

A deviation from the standards of or in Section I.7.3 of the Engineering Criteria Manual (ECM) is requested.

Identify the specific ECM standard which a deviation is requested:

Appendix I - Stormwater Quality Policy & Procedures

Section I.7.3 - Stormwater Detention Basins

This deviation request accounts for non-standard design aspects of the proposed Temporary Detention Basin C2.8. This detention basin has been designed as a temporary full-spectrum detention basin which will mitigate developed drainage impacts from parts of Filing No. 1 and No. 2 during the initial phases of development. Once the downstream Detention Basin D is constructed during future phases of development, this temporary detention basin will no longer be needed. Based on the temporary nature of this interim detention pond, the design does not include a forebay that would be included in a permanent detention pond, but a concrete trickle channel will be provided. The non-standard design components are justified by the temporary nature of this detention basin.

State the reason for the requested deviation:

Temporary Detention Basin C2.8 has been designed as an interim full-spectrum detention basin which will mitigate developed drainage impacts from parts of Filing No. 1 and No. 2 during the initial phases of development. Once the downstream Detention Basin D is constructed during future phases of development, this temporary detention basin will no longer be needed. The non-standard design components are justified by the temporary nature of this detention basin.

Explain the proposed alternative and compare to the ECM standards (May provide applicable regional or national standards used as basis):

Based on the temporary nature of this interim detention pond, the design does not include a forebay that would be included in a permanent detention pond, but a concrete trickle channel will be provided. The non-standard design components are justified by the temporary nature of this detention basin.

LIMITS OF CONSIDERATION

(At least one of the conditions listed below must be met for this deviation request to be considered.)

- The ECM standard is inapplicable to the particular situation.
- Topography, right-of-way, or other geographical conditions or impediments impose an undue hardship and an equivalent alternative that can accomplish the same design objective is available and does not compromise public safety or accessibility.
- A change to a standard is required to address a specific design or construction problem, and if not modified, the standard will impose an undue hardship on the applicant with little or no material benefit to the public.

Provide justification:

Forebays are standard requirements for permanent detention basins, but construction of these features would be wasteful for an interim detention basin, which will ultimately be removed when the larger downstream detention pond is constructed. The proposed temporary detention basin will include a concrete trickle channel, standard FSD outlet structure, and associated discharge facilities to properly mitigate drainage impacts from the applicable development area.

CRITERIA FOR APPROVAL

Per ECM section 5.8.7 the request for a deviation may be considered if the request is not based exclusively on financial considerations. The deviation must not be detrimental to public safety or surrounding property. The applicant must include supporting information demonstrating compliance with all of the following criteria:

The deviation will achieve the intended result with a comparable or superior design and quality of improvement.

The proposed temporary detention basin will include a concrete trickle channel, standard FSD outlet structure, and associated discharge facilities to properly mitigate developed drainage impacts from the applicable development area.

The deviation will not adversely affect safety or operations.

The requested deviation will not adversely affect safety or operations.

The deviation will not adversely affect maintenance and its associated cost.

The proposed stormwater detention facilities will be privately owned and maintained by the metropolitan district. The proposed deviation will have no impact on County maintenance.

The deviation will not adversely affect aesthetic appearance.

Aesthetic appearance will not be adversely affected based on the proposed deviation.

The deviation meets the design intent and purpose of the ECM standards.

The proposed deviation meets the design intent and purpose of the ECM standards by providing appropriate stormwater detention and water quality facilities. No deviations are proposed to the pond outlet structure and discharge facilities.

The deviation meets the control measure requirements of Part I.E.3 and Part I.E.4 of the County's MS4 permit, as applicable.

The proposed deviation meets applicable control measure requirements.

REVIEW AND RECOMMENDATION:

Approved by the ECM Administrator

This request has been determined to have met the criteria for approval. A deviation from Section 1.7.3 of the ECM is hereby granted based on the justification provided.

DEVIATION REQUEST (Attach diagrams, figures, and other documentation to clarify request)

A deviation from the standards of or in Section **2.3.2** of the Engineering Criteria Manual (ECM) is requested.

Identify the specific ECM standard which a deviation is requested:

ECM Section 2.3.2 Design Standards by Functional Class (Table 2-7 Roadway Design Standards):

Mayberry Boulevard is classified as an Urban Residential Collector. The proposed deviations consist of modified cross-section elements including an ultimate divided section with landscaped median, and a Phase 1 half-section with a 29-foot asphalt width. The proposed deviations are depicted on the Typical Road Section Drawings (Sections B-C, Sh. TY2).

State the reason for the requested deviation:

The proposed roadway design deviations are requested based on the new urbanist development program which seeks to create a pedestrian-friendly community. The proposed typical road cross-sections were included in the previously approved Ellicott Town Center PUD.

Explain the proposed alternative and compare to the ECM standards (May provide applicable regional or national standards used as basis):

Mayberry Drive is classified as an Urban Residential Collector. The proposed deviations consist of modified cross-section elements including an ultimate divided section with landscaped median, and a Phase 1 half-section with a 29-foot asphalt width. The proposed deviations are depicted on the Typical Road Section Drawings (Sections B-C, Sh. TY2).

The current ECM standard is a 36-foot asphalt width for an Urban Residential Collector. The narrower road widths are consistent with new urbanist land planning as approved in the Ellicott Town Center PUD. Minimum travel lane widths of 12 feet are provided in accordance with current ECM standards.

LIMITS OF CONSIDERATION

(At least one of the conditions listed below must be met for this deviation request to be considered.)

- The ECM standard is inapplicable to the particular situation.
- Topography, right-of-way, or other geographical conditions or impediments impose an undue hardship and an equivalent alternative that can accomplish the same design objective is available and does not compromise public safety or accessibility.
- A change to a standard is required to address a specific design or construction problem, and if not modified, the standard will impose an undue hardship on the applicant with little or no material benefit to the public.

Provide justification:

The requested deviations are justified by the previously approved Ellicott Town Center PUD and LSC Traffic Study, which demonstrates that traffic operations will provide acceptable levels of service.

CRITERIA FOR APPROVAL

Per ECM section 5.8.7 the request for a deviation may be considered if the request is not based exclusively on financial considerations. The deviation must not be detrimental to public safety or surrounding property. The applicant must include supporting information demonstrating compliance with all of the following criteria:

The deviation will achieve the intended result with a comparable or superior design and quality of improvement.

The proposed deviations will result in a comparable or superior roadway design, consistent with El Paso County standards and the approved Ellicott Town Center PUD. The previously approved PUD seeks to create a high-quality community enhancing property values in eastern El Paso County. The proposed deviations support the pedestrian-friendly nature of the overall development plan, resulting in a superior design.

The deviation will not adversely affect safety or operations.

The proposed roadway improvements will be constructed to County standards, and the requested deviations will not adversely affect safety or operations. The LSC Traffic Study for this project demonstrates that traffic operations through the proposed couplet will provide an acceptable level of service while creating the desired Town Center entry to the project. The proposed roadway deviations will generally improve pedestrian safety and will not adversely affect traffic operations.

The deviation will not adversely affect maintenance and its associated cost.

Maintenance will not be adversely affected based on the proposed deviations. The proposed road cross sections and site layout will provide ample access and clearance for maintenance, and all pavement designs will be subject to County approval.

The deviation will not adversely affect aesthetic appearance.

Aesthetic appearance will not be adversely affected based on the proposed deviations. The proposed deviations in typical road cross sections will enhance the streetscape resulting in improved aesthetic appearance.

The deviation meets the design intent and purpose of the ECM standards.

The proposed deviations consist of relatively minor changes to County standard road sections, consistent with the previously approved Ellicott Town Center PUD.

The deviation meets the control measure requirements of Part I.E.3 and Part I.E.4 of the County's MS4 permit, as applicable.

This deviation request has no impact on control measure requirements of the County's MS4 permit.

REVIEW AND RECOMMENDATION:**Approved by the ECM Administrator**

This request has been determined to have met the criteria for approval. A deviation from Section _____ of the ECM is hereby granted based on the justification provided.

2.3.2

APPROVED
Engineering Department

*11/05/2020 2:16:12 PM
dsdnijkamp*

**EPC Planning & Community
Development Department**

Denied by the ECM Administrator

This request has been determined not to have met criteria for approval. A deviation from Section _____ of the ECM is hereby denied.

ECM ADMINISTRATOR COMMENTS/CONDITIONS:

All median cover designs shall be submitted to PCD Engineering for approval prior to instalation. No loose rock or other loose material will be allowed. All medians less than 10' shall provide plow-able median noses per EPC criteria. Approval of this deviation does not constitute approval of the installation of trees in the public ROW (either in the median or adjacent to the road at the sidewalk). If trees are to be approved in the public ROW specific sight visibility criteria will be required to be addressed.

The median cover shall be installed and maintained by the Metro District, and a License agreement for such plantings shall be required prior to installation of the plantings, and preliminary acceptance of the street improvements.

1.1. PURPOSE

The purpose of this resource is to provide a form for documenting the findings and decision by the ECM Administrator concerning a deviation request. The form is used to document the review and decision concerning a requested deviation. The request and decision concerning each deviation from a specific section of the ECM shall be recorded on a separate form.

1.2. BACKGROUND

A deviation is a critical aspect of the review process and needs to be documented to ensure that the deviations granted are applied to a specific development application in conformance with the criteria for approval and that the action is documented as such requests can point to potential needed revisions to the ECM.

1.3. APPLICABLE STATUTES AND REGULATIONS

Section 5.8 of the ECM establishes a mechanism whereby an engineering design standard can be modified when if strictly adhered to, would cause unnecessary hardship or unsafe design because of topographical or other conditions particular to the site, and that a departure may be made without destroying the intent of such provision.

1.4. APPLICABILITY

All provisions of the ECM are subject to deviation by the ECM Administrator provided that one of the following conditions is met:

- The ECM standard is inapplicable to a particular situation.
- Topography, right-of-way, or other geographical conditions or impediments impose an undue hardship on the applicant, and an equivalent alternative that can accomplish the same design objective is available and does not compromise public safety or accessibility.
- A change to a standard is required to address a specific design or construction problem, and if not modified, the standard will impose an undue hardship on the applicant with little or no material benefit to the public.

1.5. TECHNICAL GUIDANCE

The review shall ensure all criteria for approval are adequately considered and that justification for the deviation is properly documented.

1.6. LIMITS OF APPROVAL

Whether a request for deviation is approved as proposed or with conditions, the approval is for project-specific use and shall not constitute a precedent or general deviation from these Standards.

1.7. REVIEW FEES

A Deviation Review Fee shall be paid in full at the time of submission of a request for deviation. The fee for Deviation Review shall be as determined by resolution of the BoCC.

Mayberry Phase 1 PUD Amendment Plan Sheet

DEVELOPMENT GUIDELINES

A1. Applicability
The provisions of this PUD shall run with the land. The landowners, their successors, heirs, or assigns shall be bound by this Development Plan, as amended and approved by the Planning and Community Development Department Director or Board of County Commissioners.

A2. PUD District Purpose & Intent

Mayberry is a new community based upon smart growth principles to create a vibrant and attractive community. The pedestrian friendly focus of the design is intended to allow for residents to live, work, and play within reasonable walking distance. The community will have residential, retail, civic, and park features that will enhance the quality of life for the residents as well as surrounding community.

B1. Principal Permitted Uses: (MDR-12)

1. Residential Child Care Facility
2. Group Home
3. Public Park and Open Space
4. Recreation Facilities
5. Religious Institutions
6. Single-Family Residential
7. Multi-Family Residential (two or more attached units)

B2. Use Subject to Special Review: (MDR-12)

1. Adult Care Facility
2. Educational Facility
3. Emergency Facility
4. Private Tower
- 1) Accessory Uses and Buildings
Detached Private Parking Garage or Carport; Storage Shed; Gazebo; Deck (Attached or Detached, Covered or Uncovered); Swimming Pool, Hot Tub, Tennis Court or Similar Private Recreational Facility; Private Greenhouse; Fence, Wall and Hedge.
2. Home Occupation as defined by the Land Development Code meeting all requirements and conditions contained therein.
3. Development Requirements for accessory buildings shall match development standards for specific lot types.

Projections into Setbacks

1. For property located in residential zone districts containing a minimum required lot size of one half (1/2) acre or less:
 - a. A porch, four (4) feet by four (4) feet or less, may project into a required front or rear yard setback.
 - b. Open and Unenclosed Patios, Decks, Platforms, Landings or Ramps may extend into required front, side or rear yard setbacks provided such Patio, Deck, Platform, Landing or ramp does not exceed eighteen (18) inches in height measured from the finished floor to any adjacent point of the finished grade.
 - c. Awnings, Chimneys and Flues, Sills, Belt Courses, Cornices, Eaves and other similar architectural features may project not more than two (2) feet into required front, side or rear yard setbacks.

C1. Development Requirements for Lot Type A (Lots under 55 FT Width):

1. Maximum lot coverage: 70 %
2. Maximum building height: 40 feet.

3. Setback minimums:

- a. Front yard: ten (10) feet.
- b. Side yard: four (4) feet.
- c. Rear yard: seven and one half (7.5) feet.

4. Accessory building must comply with the setbacks established above, except that the rear yard setback may be reduced to seven and one half (7.5) feet for any lots that do not abut a public street. Accessory structures shall be governed by architectural covenants regarding building colors and materials to be consistent with the primary structure of the site.

C2. Development Requirements for Lot Type B (Lots over 55 FT Width):

1. Maximum lot coverage: 70 %
2. Maximum building height: 40 feet.

3. Setback minimums:

- a. Front yard: ten (10) feet.
- b. Side yard: five (5) feet.
- c. Corner lot: the side yard setback for the side street side shall be seven and one half (7.5) feet.
- d. Rear yard: seven and one half (7.5) feet.

4. Accessory building must comply with the setbacks established above, except that the rear yard setback may be reduced to seven and one half (7.5) feet for any lots that do not abut a public street. Accessory structures shall be governed by architectural covenants regarding building colors and materials to be consistent with the primary structure of the site.

D. Lot Sizes

The Preliminary Plan | PUD Development Plan and the Final Plat establish the lot sizes for each lot.

E. Streets

Streets within Mayberry Phase 1 PUD provide general vehicular circulation throughout the development. All streets shall be publicly owned and maintained. Construction will be to El Paso County Standards except for deviations approved separately by Planning and Community Development. Sidewalks shall be provided on both sides of all streets illustrated on this plan unless specifically excluded.

F. Architectural Control Committee Review/Covenants

Covenants for Mayberry Phase 1 PUD have been created by separate documents. The Covenants establish rules and regulations for the property within the subdivisions and establish the governance mechanism of the subdivision, including the creation of the Architectural Control Committee.

G. Authority

This PUD is authorized by Chapter 4 of the El Paso County Land Development Code, adopted pursuant to the Colorado Planned Unit Development Act of 1972, as amended.

H. Adoption

The adoption of this development plan shall evidence the findings and decisions of the El Paso County Board of County Commissioners that this Development Plan for Mayberry Phase 1 PUD is in general conformity with the El Paso County Master Plan, El Paso County Policy Plan and applicable Small Area Plan(s); is authorized under the provision of the El Paso County Land Development Code; and that the El Paso County Land Development Code and this development plan complies with the Colorado Planned Unit Development Act of 1972, as amended.

I. Relationship to County Regulations

The provisions of this Development Plan shall prevail and govern the development of Mayberry Phase 1 PUD, provided, however, that where the provisions of this Development Plan do not address a particular subject, the relevant provisions of the El Paso County Land Development Code, as amended and in effect at the time of the PUD plan approval (or owner acknowledge the PUD changes with the Code), or any other applicable resolutions or regulations of El Paso County, shall be applicable. To further the mutual interest of the residents, occupants, and owners of the PUD and of the public in the preservation of the integrity of this development plan, the provisions of this plan relating to the use of land and the location of common open space shall run in favor of El Paso County and shall be enforceable at law or in equity by the County without limitation on any power or regulation otherwise granted by law.

Where there is more than one provision within the development plan that covers the same subject matter, the provision which is most restrictive or imposes higher standards or requirements shall govern.

The total number of dwellings or the total commercial, business, or industrial intensity shown on the development plan for development within the specified planning area is the maximum development requested for plotting or construction (plus any approved density transfers). The actual number of dwellings or level of development may be less due to subdivision or Site Development Plan requirements, land carrying capacity, or other requirements of the Board of County Commissioners.

At the time of any final plat application, the applicant shall provide a summary of the development, to date, to Planning and Community Development Department, in order to assure maximum development limits are not exceeded.

AN AMENDMENT TO ELLICOTT TOWN CENTER PHASE 1 PUD / PRELIMINARY PLAN

SHEET INDEX MAP

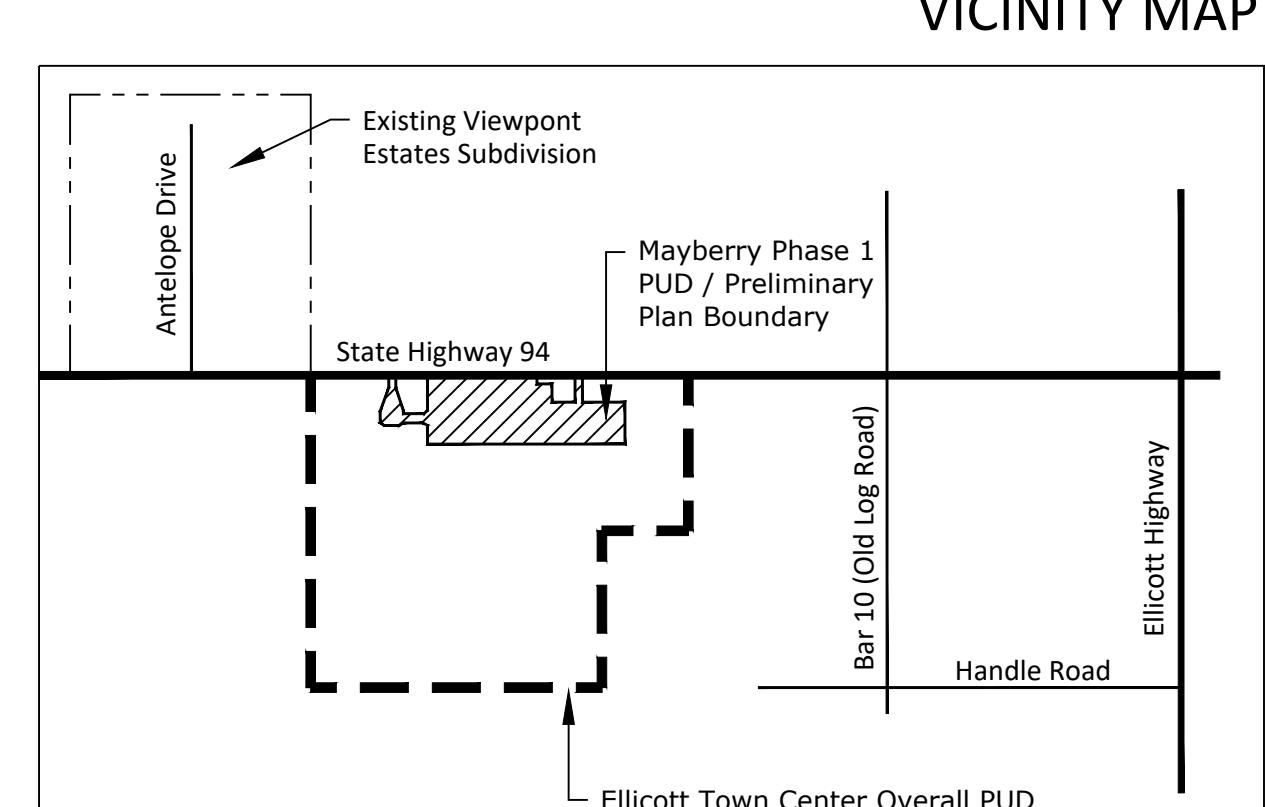

APPROVED FILING 1 AMENDMENT AREA

GENERAL PROVISIONS

1. All streets shall be constructed to El Paso County standards, dedicated to El Paso County for and upon acceptance by El Paso County shall be maintained by El Paso County Department of Transportation except landscaping as indicated in note #2.
2. Landscape entry features, open space tracts, parks and trails shall be owned (when appropriate) and maintained by the Home Owners Association or Metropolitan District. All double frontage lots shall receive a combination of berming, fencing, and landscape between the property line and the curb. All medians shall be landscaped and maintained by the Home Owners Association or Metropolitan District. All double frontage streets shall have a minimum of one tree per 30 feet of frontage. These trees can be clustered along the frontage as determined by the subdivider.
3. Contour interval shown on plan 2'.
4. No residential lots shall have access to State Highway 94.
5. Minimum public utility/drainage easements shall be provided on all lots as follows:
 - a. Front: eight (8) feet.
 - b. Side: Four (4) feet.
 - c. Rear: seven and one-half (7.5) feet
6. All open space/trail/landscape tracts shall be limited to non-motorized use only, except for maintenance and emergency vehicles.
7. This site, State Highway 94 and New Log Road is not within a designated F.E.M.A. Floodplain as determined by the flood insurance rate map, community panel number 08041C0810G, effective 12.07.2018.
8. The parties responsible for this plan have familiarized themselves with all current accessibility criteria and specifications and the proposed plan reflects all site elements required by the applicable ADA design standards and guidelines as published by the United States Department of Justice. Approval of this plan by El Paso County does not assure compliance with the ADA or any regulations or guidelines enacted or promulgated under or with respect to such laws.
9. Geologic Hazard Note:

The site has been found to be impacted by geologic hazards. Mitigation measures and a map of the hazard area can be found in the Preliminary Geotechnical Investigation Ellicot Town Center by CTL Thompson on 07.13.2006 in file PUDSP 21-009 available at the El Paso County Planning and Community Development Department. These can be mitigated by Site-specific, design level Soils and Foundation investigation to provide design criteria for foundations and floor systems for proposed residential buildings. Subgrade investigation and design after grading, Construction testing and observation during site development and residential building construction. Foundations drains should be anticipated for all basement areas. Due to high groundwater in the area, all foundations shall incorporate an underground drainage system.
10. Development of the property shall be in accordance with the overall PUD Development Plan Approval. Minor modifications may be subject to the limitations contained in the El Paso County Load Development Code.
11. Development Plan shall adhere to the requirements of the El Paso County Land Development Code and revisions reflected in the Preliminary Plan conditions.
12. Mayberry Phase 1 shall be limited to a total maximum density as illustrated on the plan.
13. Access to lots adjacent to the traffic circles shall be located as far away from the traffic circles as possible.

MAYBERRY PHASE 1

EL PASO COUNTY, COLORADO

AN AMENDMENT TO ELLICOTT TOWN CENTER PHASE 1 PUD / PRELIMINARY PLAN

LANDSCAPE NOTES

1. ALL PRESERVATION AREAS CONTAINING VEGETATION DESIGNATED TO BE PRESERVED, SHALL BE FENCED OFF DURING CONSTRUCTION TO MINIMIZE DISTURBANCE IN THESE AREAS. ALL FENCING SHALL BE INSTALLED AROUND PRESERVED VEGETATION PRIOR TO ANY GRADING ON THE PROPERTY. A 4-FOOT, ORANGE, CONSTRUCTION SAFETY FENCE SHALL BE USED IN THIS APPLICATION.
 2. SOIL AMENDMENT - INCORPORATE 3 CUBIC YARDS/1000 SF AREA OF "PREMIUM 3 ORGANIC COMPOST", OR APPROVED EQUAL, ON BLUEGRASS TURF AREAS. INCORPORATE 2 CUBIC YARDS/1000 SF AREA OF ORGANIC COMPOST (DECOMPOSED MANURE) TO ALL NATIVE SEED AREAS. TILL INTO TOP 8" OF SOIL. FOR PLANTING PIT AMENDMENTS, SEE RECOMMENDED SOILS AMENDMENT BELOW: .

RECOMMENDED SOIL AMENDMENT:
TRI-MIX III as supplied by C&C Sand
-To be applied as backfill in planting pits
 3. CONTRACTOR TO APPLY EROSION CONTROL BLANKET TO ALL SEED AREAS WITH GREATER THAN 3:1 SLOPES.
 4. FOR ALL SEED AREAS REFER TO SEED MIXES SPECIFIED ON THIS SHEET.
 5. ALL NATIVE SEED AREAS SHALL HAVE A TEMPORARY ABOVE-GROUND SPRAY IRRIGATION SYSTEM UTILIZED UNTIL SEED IS ESTABLISHED, AND ALL TREES AND SHRUBS WITHIN NATIVE SEED AREAS SHALL HAVE A PERMANENT DRIP IRRIGATION SYSTEM.
 6. A FULLY AUTOMATED SPRINKLER IRRIGATION SYSTEM WILL DRIP IRRIGATE ALL TREE, SHRUB, AND GROUND COVER PLANTINGS, AND SPRAY ALL TALL FESCUE SOD AND LOW ALTERNATIVE TURF AREAS. AN IRRIGATION PLAN WILL BE PREPARED AT A LATER DATE AND WILL INCLUDE AN IRRIGATION SCHEDULE THAT NOTES APPLICATION RATES BASED ON TURF TYPE, RATES FOR NEWLY INSTALLED PLANTS VS. ESTABLISHED PLANTS, AND GENERAL RECOMMENDATIONS REGARDING SEASONAL ADJUSTMENTS.
 7. SOD TO BE TALL FESCUE BLEND.
 8. NO SOD SHALL BE PLANTED ON SLOPES IN EXCESS OF 6:1 GRADIENT.
 9. CONTRACTOR TO UTILIZE STOCKPILED TOPSOIL FROM GRADING OPERATION AS AVAILABLE. TILL INTO TOP 6" OF SOIL.
 10. FOR GRADES REFER TO CIVIL ENGINEERING DRAWINGS.
 11. NO TREES AND NO PLANTS OVER 2 FEET TALL SHALL BE INSTALLED WITHIN 5 FEET OF ANY FIRE HYDRANTS.
 12. ALL PLANTS TO RECEIVE 3 INCH DEPTH OF GORILLA HAIR SHREDDED CEDAR WOOD MULCH UNLESS OTHERWISE SPECIFIED. FOLLOW PLANTING DETAILS FOR MULCH RING DIMENSIONS WITHIN ROCK, SOD, OR SEED AREAS.
 13. COBBLE: 2-4" WHITE SPECKLED RIVER ROCK, AT 3-4" DEPTH, AT ALL INTERSECTION CORNERS BETWEEN HANDICAP RAMPS. INSTALL GEOTEXTILE FABRIC UNDER ALL COBBLE AREAS.
 14. ROCK: 3/4" SADDLEBACK SWIRL, AT 3-4" DEPTH. INSTALL GEOTEXTILE FABRIC UNDER ALL ROCK AREAS.
 15. ALL SHRUB BEDS TO BE ENCLOSED BY SOLID STEEL EDGING, AS A SEPARATOR FROM SOD, SEED, AND ALTERNATIVE TURF. SEPARATION BETWEEN SOD AND SEED, AND BETWEEN ALTERNATIVE TURF AND SEED SHALL BE A MOWED STRIP, WITHOUT STEEL EDGING.
 16. SE: SOLID STEEL EDGING TO BE: "DURAEDGE" (1/8" THICK x 4" WIDE) STEEL LANDSCAPE EDGING, DARK GREEN COLOR, WITH ROLLED EDGE AND STEEL STAKES. USE SOLID STEEL EDGING EXCEPT WHERE NOTED ON THE PLANS.
 17. ALL PLANTS NOT LABELED AS FULFILLING A COUNTY LANDSCAPE REQUIREMENT ARE "EXTRA" PER COUNTY STANDARDS, AND WILL BE INSTALLED AT THE OWNER'S DISCRETION.
 18. ANY FIELD CHANGES OR DEVIATIONS TO THESE PLANS WITHOUT PRIOR COUNTY APPROVAL OF AN AMENDED SITE DEVELOPMENT PLAN MAY RESULT IN A DELAY OF FINAL APPROVAL AND ISSUANCE OF A CERTIFICATE OF OCCUPANCY.
 19. THESE PLANS ARE FOR COUNTY APPROVALS ONLY AND ARE NOT TO BE UTILIZED FOR CONSTRUCTION.
 20. ALL TREES TO BE STAKED FOR A MINIMUM OF 18 MONTHS. REMOVE STAKING MATERIALS ONCE TREE IS ESTABLISHED, WHICH MAY DEPEND ON TREE SPECIES, MATURITY AND SITE CONDITIONS.

GROUND COVER SCHEDULE

-		

Seed Mix A

15% Western Wheatgrass
15% Big Bluestem
15% Thickspike Wheatgrass
10% Sideoats Grama
15% Little Bluestem
15% Blue Grama
15% Annual Rye

APPLICATION RATE: Native Grass Mix: 3 lbs./1,000s.f. or 130 lbs./acre
Hydromulch: 2200 lbs./acre mulch, 100 lbs./acre tackifier

APPLICATION METHOD: Broadcast seed by hand or with a drop spreader.
Manually rake seed into prepared soil.
After seeding apply green hydromulch and takifier.

Seed Mix B with Wildflowers

30% Ephraim Crested Wheatgrass Note: Low Gro Mix available from
25% Dwarf Perennial Ryegrass Arkansas Valley Seed Solutions
20% SR3200 Blue Fescue (877) 957-3337
15% Ruebens Canada Bluegrass
10% Chewings Fescue Wildflower Mix available from:
15% Blue Grama Applewood Seed Co.
Wildflowers: 615 Western Mix (202) 421-7322

APPLICATION RATE: Native Grass Mix: 40 lbs./acre (or as recommended by supplier)
Wildflower Mix: 6 oz./1,000 s.f. or 8- 10 lbs./acre
Hydromulch: 2200 lbs./acre mulch, 100 lbs./acre tackifier

APPLICATION METHOD: Broadcast seed by hand or with a drop spreader.
Manually rake seed into prepared soil.
After seeding apply green hydromulch and tackifier.

ANT SCHEDULE

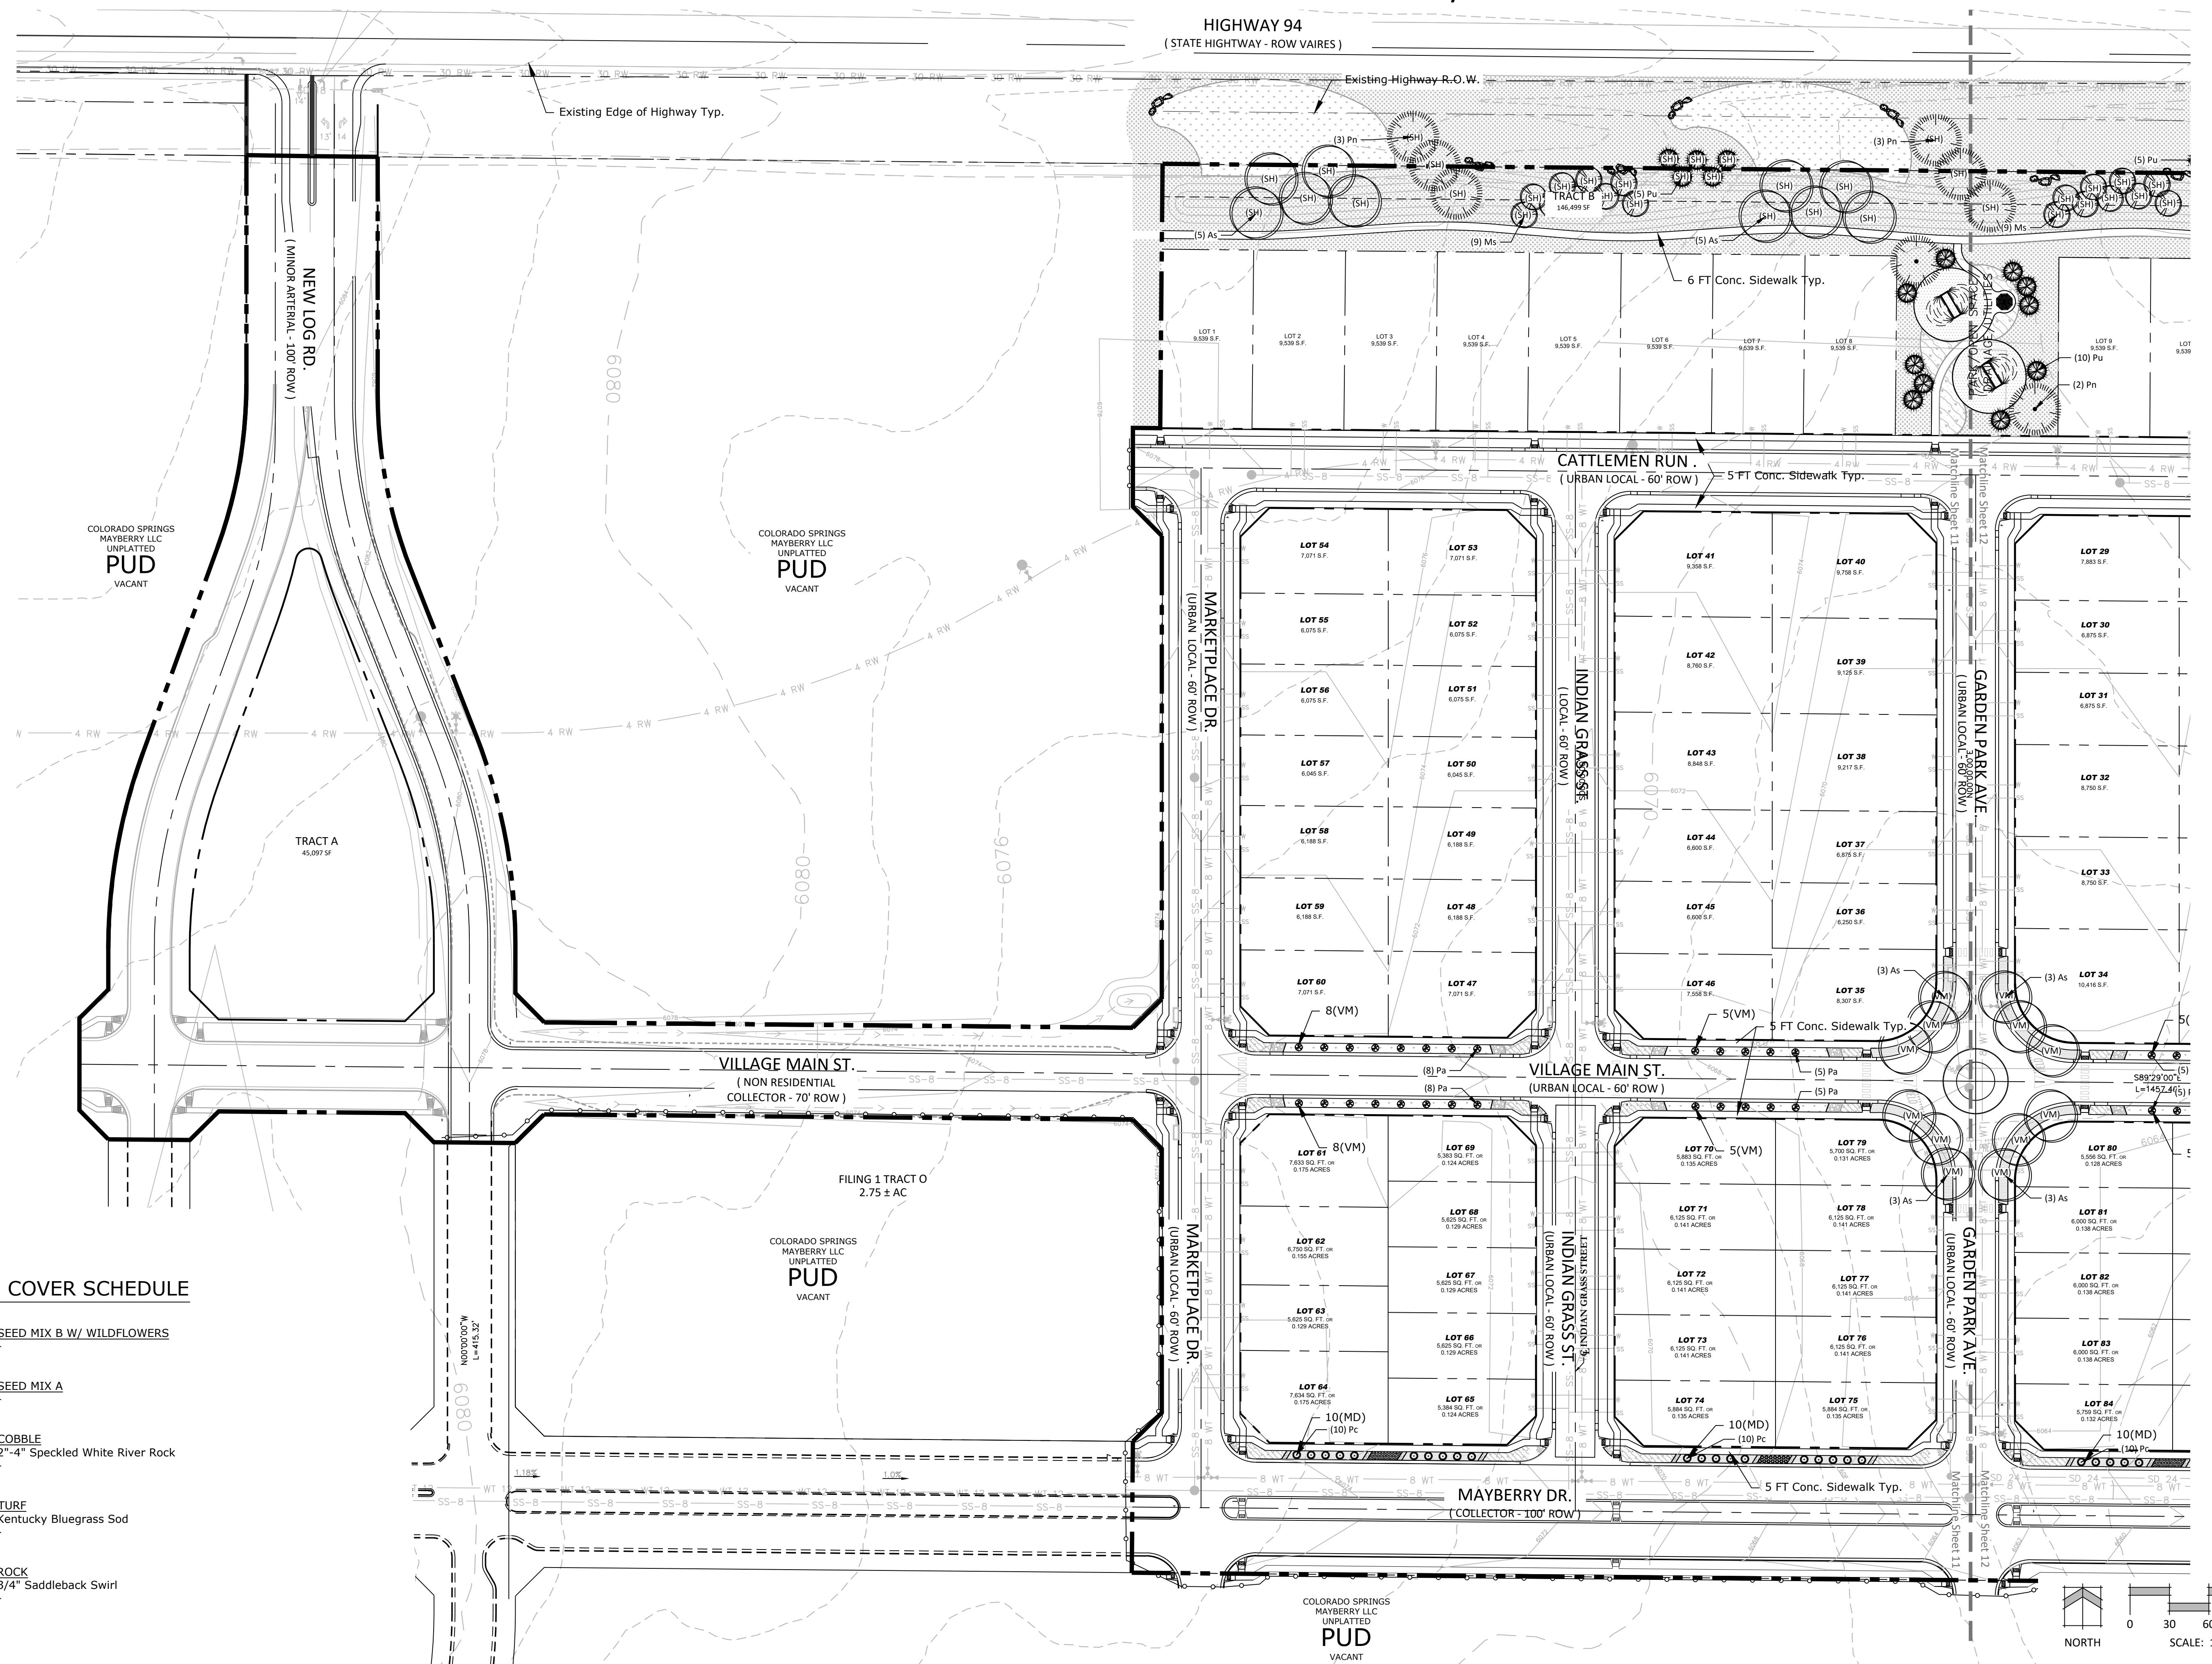

<u>IDUOUS TREES</u>	<u>CODE</u>	<u>QTY</u>	<u>BOTANICAL / COMMON NAME</u>	<u>HEIGHT</u>	<u>WIDTH</u>	<u>SIZE</u>	<u>COND</u>
	Ag	6	Acer tataricum `GarAnn` TM / Hot Wings Tatarian Maple	20'	20'	1.5" Cal.	B&B
