RE: Widefield Water and Sanitation District

Rolling Hills Tank Inlet Pipeline – Financial Assurance

Dear Ms. Nijkamp:

A Financial Assurance Estimate has been provided for the Widefield Water and Sanitation District Inlet Pipeline project as required. However, as noted in the Letter of Intent submitted for this project, the District should not be required to provide a bond for this project. The District is a governmental entity. Its projects are fully funded, 100% insured, and 100% bonded in accordance with State statutes.

The improvements proposed are not related to land development nor are they open to the public. Additionally, bonding companies struggle to generate a bond for a governmental entity. They are not setup to do it because the District is already required by State statute to have bonds in place for its projects.

Requiring the District to provide a bond per the Financial Assurance Estimate included would effectively require ratepayers within the District to pay for "double-bonding" of the project.

Sincerely,

JDS-HYDRO CONSULTANTS, INC. on behalf of the Widefield Water and Sanitation District.

Gwen Dall, P.E.
