Lorson Ranch East, Filing 4, SF-19-008

Please accept the following comments from El Paso County Public Health regarding the project referenced above:

- The 58.5-acre site with 246 residential lots development project will have water provided by Widefield Water and Sanitation District. There is a finding for sufficiency in terms of water quality for this Colorado Department of Public Health and Environment regulated and approved district. (CO0121900). The planned underdrain system for the project will be owned and maintained by Lorson Ranch Metropolitan District.
- Wastewater service will be provided by Widefield Water and Sanitation District. Per the 02Feb2019 Letter of Commitment from Widefield Water and Sanitation District, there is adequate capacity at the wastewater treatment facility for the anticipated wastewater flow generated from this development project.
- Radon resistant construction building techniques/practices are encouraged to be used in this area. The EPA has determined that Colorado, and the El Paso County area, have potentially higher radon levels than other areas of the country.
- Earthmoving activities greater than 25 acres requires a Construction Activity Permit from the Colorado Department of Public Health and Environment, Air Pollution Control Division. Go to <https://www.colorado.gov/pacific/cdphe/APENforms> for permit information.
- El Paso County Public Health encourages planned walk-ability of residential communities. Please consider appropriate connections to commercial areas through the use of sidewalks, and bike trails. Walk-ability features help reduce obesity and associated heart diseases.
