There are no existing building structures or facilities currently owned or maintained by the Lorson Ranch Metropolitan District. The existing SDS (Southern Delivery System) easement and waterline crosses the property from north to south which shall remain in place.

The proposed LR East Filing 4 Plat includes 246 single family detached lots on approximately 58.471 acres for a density of 4.2 DU/ Acre. The school site and adjacent streets (Fontaine Blvd, Lorson Blvd, Lamprey Dr) have been previously platted and were not included in the density calculations. This density is in line with existing approvals on file including the Sketch Plan, PUD/ Preliminary Plan and the Overall Development & Phasing Plan.

The site layout for Lorson Ranch East includes three lot types: 45' x 85' (3,825 SF); 50' x 110' (5,500 SF); and 60' x 110' (6,600' SF). Corner lots were designed with additional lot width to accommodate the increased corner lot setback requirements. Both Fontaine Blvd. and Lorson Blvd. bridges have been constructed across the Jimmy Camp Creek East Tributary offering two access points as part of Lorson Ranch East.

The Filing 4 Plat, supporting documents, and reports are in conformance with the review and approval criteria for final plats. Findings of conformity with the Master Plan as well as findings of sufficient water quality, quantity, and dependability were made with the PUD/preliminary plan approvals. However, the following policies from the El Paso County Policy Plan have been provided with a summary analysis of each for reference:

Policy 6.1.3 Encourage new development which is contiguous and compatible with previously developed areas in terms of factors such as density, land use and access.

Lorson Ranch East Filing 4 conforms to the approved sketch plan and Lorson Ranch East PUD/ Preliminary Plan. The Lorson Ranch East Filing 4 is east of the Pioneer Landing/The Meadows Filings and located east and south of the Lorson Ranch East Filing 1 development. The proposed Filing 4 is compatible and similar in nature to these previously approved developments. There are no vacant parcels to the north as this land is platted.

Policy 6.1.6 Direct development toward areas where the necessary urban-level supporting facilities and services are available or will be developed concurrently.

The Filing 4 is within the overall Lorson Ranch development for which utility and infrastructure improvements have been provided to meet existing and planned development needs. Additional extensions of these facilities will be provided with the development of this final plat area. The proposed density and lot sizes are similar and compatible to existing residential development within Lorson Ranch. The proposed facilities and public services can support the proposed housing units as these services were designed, planned, and constructed to accommodate proposed densities.

Policy 6.1.8 Encourage incorporating buffers or transitions between areas of varying use or density where possible.

Buffers are provided per the PUD/Preliminary Plan as well as additional areas of open space and transitions to the south and north. To the west the Jimmy Camp Creek East Tributary creates a natural amenity and buffer between Lorson Ranch neighborhoods.

Policy 6.1.15 Recognize the need for new development and redevelopment to respond to changes in demographic, market and technological conditions.
