RE: MDG Project No. 20.1105.004 – Grandwood Ranch: Certification Letter

Dear Sir or Madam,

The site and adjacent properties (as affected by work performed under the County permit) are stable with respect to settlement and subsidence, sloughing of cut and fill slopes, revegetation and other ground cover. The improvements (public improvements, common development improvements, site grading and paving) meet or exceed the minimum design requirements.

This letter certifies substantial compliance for dimensions, elevations and volumes of the Grandwood Ranch Pond 1 and Pond 2 within the west side of the development and Pond 3 and Pond 4 within the east side of the development. This certification letter is to confirm the full spectrum detention basins substantially comply with the approved plan documents and Final Drainage Report (FDR: Approved April 16, 2021).

As-built survey of the four ponds by a third-party Professional Land Surveyor and a detention pond site walkthrough indicate that the pond volume, trickle channels, two forebays, emergency spillway and outlet structure, as constructed and surveyed, are in substantial conformance with the construction plans.

Caveats: Because the certifier was not involved with construction administration of the pond, the compaction of earthwork in the pond embankment, placement of buried rip rap in the emergency spillway, and/or any other items not specifically mentioned are not certified in this letter. Submittal reviews during the construction phase of the project indicate that the appropriate material submittals were made, but do not certify that these actual materials were placed or whether appropriate means of storage were utilized prior to installation.

From the Colorado Springs Pond certification checklist (“Yes” indicates substantial compliance):

	<u>Pond 1, 2, 3, &4</u>
Grading	
• Grading and Slopes Completed per approved plans	Yes
Soil Mixes	
• Proper storage of soil mix prior to placement (<i>see above</i>)	N/A
• Soil Mix Correct per approved plans (<i>See above</i>)	N/A

Forebay

- Built per approved plans Yes
- Forebay Volume per approved plans Yes

Outlet Works

- Built per approved plans Yes

Spillway structure

- Built per approved plans Yes

WQCV and Elevations

- WQCV per approved plans Yes
- All elevations per approved plans Yes

As built Plans for Permanent BMP

- Built per approved plans Yes
