Noxious weeds are a major resource concern for the El Paso County Conservation District and weeds need to be managed and controlled prior to going to seed either by chemical, mechanical, or biological control. Please contact the El Paso County Conservation District for fact sheets on specific weed control measures for each noxious weed present on the site.

Vehicle tracking control stations need to be installed at all entrance and exit points on the site. The station should consist of a pad of 3 to 6-inch rock or a vehicle control pad/mat to strip mud from tires prior to vehicles leaving the construction site to prevent spreading of noxious weeds.
