UTM COORDINATES (Meters, Zone: 13, NAD83)

Easting:      Northing:

PERMIT TO CONSTRUCT A WELL

ISSUANCE OF THIS PERMIT DOES NOT CONFER A WATER RIGHT

CONDITIONS OF APPROVAL

- 1) This well shall be used in such a way as to cause no material injury to existing water rights. The issuance of this permit does not ensure that no injury will occur to another vested water right or preclude another owner of a vested water right from seeking relief in a civil court action.
- 2) The construction of this well shall be in compliance with the Water Well Construction Rules 2 CCR 402-2, unless approval of a variance has been granted by the State Board of Examiners of Water Well Construction and Pump Installation Contractors in accordance with Rule 18.
- 3) Approved pursuant to CRS 37-90-137(2) on the condition that this well is operated in accordance with the Fredrick D. Martin substitute water supply plan approved by the State Engineer on May 16, 2005. This well shall not be operated unless it is included in a substitute water supply plan approved by the State Engineer or a plan for augmentation approved by the water court (pending case no. 05CW55). The subject water supply plan is currently valid through February 28, 2006, and if not extended or if a court approved plan for augmentation is not in operation, diversion of ground water from this well must cease immediately.
- 4) The use of ground water from this well is limited to commercial and industrial purposes.
- 5) The pumping rate of this well shall not exceed 50 GPM.
- 6) The average annual amount of ground water to be appropriated shall not exceed 7 acre-feet.
- 7) A totalizing flow meter must be installed on this well and maintained in good working order. Permanent records of all diversions must be maintained by the well owner (recorded at least annually) and submitted to the Division Engineer upon request.
- 8) The owner shall mark the well in a conspicuous place with well permit number and court case number. The owner shall take necessary means and precautions to preserve these markings.
- 9) This well shall be constructed not more than 200 feet from the location specified on this permit.
- 10) This well shall be constructed at least 600 feet from any existing well, completed in the same aquifer, that is not owned by the applicant.
