Please accept the following comments from El Paso County Public Health (EPCPH) regarding the project referenced above:

- A record of an approved, permitted on-site wastewater treatment system (OWTS) for this property indicates the original OWTS was installed and approved in 2001 for a 4-bedroom house.
- Restroom facilities were not addressed for customer use and/or employees with the submittal. Please contact EPCPH with any questions or OWTS requirements.
- Please ensure all components of the OWTS are located and protected from vehicular traffic, livestock and other means of compaction. A secondary site on the property must be preserved for the possibility of repair, addition, or replacement of the existing soil treatment area. Fencing is preferred but other area identification methods accomplishing the same goal are approved.
- A horse manure management plan is encouraged and must include best management practices for manure accumulation, odor and insect control.
