Shoup Rd

Please provide a cross-section of the proposed berm. Indicate where the soil for this berm is coming from? If soil from the property is to be used, please show the limits of disturbance on the site plan (include the total amount of area disturbed). Note that if the total land disturbance is 1 acre or greater additional engineering documents such as a grading and erosion control plan would be required. Additionally, please indicate that the berm will be seeded and provide erosion control blankets if the slopes of the berm will be greater than 3:1.
