RE: Site Development Plan Amendment – Golden West Wind Farm – Wind/Meteorological  
Measuring Facility (COM-17-022)

Parcel No. 13000-00-422

To whom it may Concern:

A request was submitted to Planning and Community Development for approval of an site plan approval to authorize the placement of a meteorological station in support of the functions of the existing Meteorological Monitoring Tower No. 7 within the Golden West Wind Energy Wind and Solar Energy Overlay (WSE-O) Plan (WSE-O-14-002). The facility, known as the Wilson Farms Meteorological Monitoring Pole, was approved as a special use (PCD File No. AL-07-015) by the Board of County Commissioners on February 14, 2008 (Resolution No. 08-082). The site was subsequently incorporated into the approved Golden West Wind Energy WSE-O Plan (Resolution No. 15-055) and depicted on the approved Golden West Wind Energy Project Circuit 15 Site Development Plan (PPR-15-019). Since the facility has been previously approved through these processes, the proposed improvements are considered as an appurtenant improvement to the site and are hereby approved in accordance with the attached site plan and letter of intent.

Respectfully submitted,

Craig Dossey, Executive Director  
El Paso County Planning and Community Development
