

## Barn Description

We would like to build a 32' wide x 24' deep x 16' 8" high (peak) pole barn with two stalls in order to have our horses on our property. There will also be a 10' x 24' open lean-to on the east side allowing for cover for the horses. The interior of the barn will consist of two 10' x 12' stalls a 12' x 24' breezeway, a 6' x 10' tack room, and a 10' x 12' hay storage room. There will be 2 sliding barn doors (6' wide x 10' tall) on both ends of the breezeway. There will also be Dutch doors in the stalls that allow for airflow and access to the covered lean-to. The barn will have two 36" x 80" exterior doors, two (3'H x 4'W) windows, and two 2'H x 4' wide windows above the sliding barn doors.
