Traffic Engineer's Statement

The attached traffic report and supporting information were prepared under my responsible charge and they comport with the standard of care. So far as is consistent with the standard of care, said report was prepared in general conformance with the criteria established by the County for traffic reports.

Eli Farney, P.E. #41677

Executive Summary

JR Engineering (JR) has completed a review of the traffic impacts resulting from the proposed development of the Esteban Rodriguez Site (Project) in El Paso County, Colorado (County). A master traffic impact study was completed by LSC Transportation Consultants, dated July 31, 2024.

The objectives of this Traffic Impact Study (TIS, Study) are:

- Collect Year 2024 existing traffic count data at nearby intersections.
- Estimate site-generated traffic and route trips onto adjacent streets.
- Perform traffic operations analysis for Year 2029 Opening Day and Year 2045 Future scenarios.
- Make recommendations for roadway improvements to accommodate new traffic.

The methodology, content, and findings of this TIS are consistent with the following documents:

- *El Paso County Engineering Criteria Manual*, Appendix B: Transportation Impact Study Guidelines
- *Esteban Rodriguez Subdivision Master TIS* by LSC Transportation Consultants, dated July 31, 2024

Key Findings of this TIS

- Levels of Service: 2024 Existing condition levels of service are LOS B or better. In the 2029 Opening Day condition, all movements are expected to operate at LOS C or better with total traffic volumes. In the 2045 Future Year condition, all movements are expected to operate at LOS C or better with total traffic.
- Queue Lengths: Queuing is expected to be minimal at both intersections in the Existing, Opening Day, and Future Year conditions. No operational issues with queuing are anticipated.
- Recommendations: JR recommends adding both left and right turn lanes at each of the Study intersections to accommodate turning traffic by 2029 Opening Day. These turn lanes are not triggered solely by the Esteban Rodriguez site, but along with the surrounding background developments.

Introduction

JR has completed a review of the existing and forecasted traffic operations in the vicinity of the Esteban Rodriguez Site. A vicinity map is included in **Figure 1**.

Proposed Land Use

The majority of the development is anticipated to contain low-density residential land use. Additionally, warehousing and retail land uses are expected along Judge Orr Road on the north side of the site. For the purpose of estimating site-generated traffic volumes using *ITE Trip Generation Manual*, 11th Edition, the following land uses were assumed:

- Warehousing (ITE 150) – 190,000 square feet
- Single-Family Detached Housing (ITE 210) – 144 dwelling units
- Strip Retail Plaza (<40k SF) (ITE 822) – 10,000 square feet

A site plan is included in **Appendix A**.

Study Intersections

The Study analyzes two intersections:

- Judge Orr Road & Elbert Road (E1)
- Judge Orr Road & Northeast Site Access (A1)

Proposed Roadway Improvements

The following improvements are proposed in order to accommodate forecasted traffic volumes:

- Add left and right turn lanes at the Study intersections
 - Based on El Paso County criteria for required turn lanes

Table 7 of the Master TIS lists roadway improvements and right-of-way requirements identified in the El Paso County *Major Transportation Corridors Plan* (MTCP), adopted July 18, 2024. The improvements table is included in **Appendix B**.

Proposed lane geometry and intersection control are shown in **Figure 4**.

Judge Orr Road Classification

Judge Orr Road is classified as a Rural Minor Arterial roadway in the El Paso County MTCP. It is proposed to have 2 lanes in the year 2045. Judge Orr Road was modeled accordingly in this Study.

Phase 1 Traffic Analysis

In addition to analyzing the entire Esteban Rodriguez development, JR analyzed an interim condition in which only Phase 1 of the Project is complete.

Phase 1 includes 15 single-family detached homes, which would generate the following trips:

- Average Daily Trips: 176
- AM Peak Entering Site: 3
- AM Peak Exiting Site: 10
- PM Peak Entering Site: 11
- PM Peak Exiting Site: 6

Traffic volumes generated by Phase 1 only are small compared to traffic generated by the entire Project. Therefore, JR does not anticipate any operational issues to result from Phase 1 traffic.

US 24 & Stapleton Road Future Signal

The US 24 & Stapleton Road intersection is planned to be signalized in the future. CDOT has indicated that nearby projects will be required to escrow a fair share amount toward this traffic signal. Cost estimates and escrow amounts for the Esteban Rodriguez development should be determined at the final plat stage.

 J.R. ENGINEERING

Existing Conditions

Existing Land Use

The Project site is currently vacant. The site does not generate trips in the existing condition.

Existing Traffic Volumes

Existing traffic volumes were obtained on Wednesday, February 21, 2024 by All Traffic Data Services at the intersection of Judge Orr Road & Elbert Road. Existing traffic volumes and lane geometry are shown in **Figure 2**. Traffic counts are included in **Appendix C**.

Traffic Volumes and Distribution

Background Traffic Growth Rate

To determine background traffic volumes, JR considered traffic studies for other developments in the vicinity of the Project site. The site-generated trips from these nearby studies were considered as background traffic in year 2029:

- *Saddlehorn Ranch Filing No. 2 TIS* by LSC Transportation Consultants, dated April 11, 2023
- *Davis Ranch Subdivision Master TIS* by LSC Transportation Consultants, dated July 7, 2023
- *BOCES Campus TIS* by JR Engineering

Additionally, a growth rate was applied to existing traffic volumes to account for other future regional development. JR applied 3% annual growth for the first 6 years, consistent with the Master TIS. JR applied 1% annual growth thereafter. Future background traffic volumes are shown in **Figure 5** (2029) and **Figure 7** (2045).

Site-Generated Traffic Volumes

Site-generated traffic volumes for the 2029 build-out condition were estimated using *ITE Trip Generation Manual, 11th Edition*. The residential and commercial development is expected to produce the following trips:

- Average Daily Trips: 2,292
- AM Peak Entering Site: 76
- AM Peak Exiting Site: 98
- PM Peak Entering Site: 141
- PM Peak Exiting Site: 126

Site-generated traffic volumes are shown in **Figure 3**. A trip generation report is included in **Appendix D**.

Distribution of Site-Generated Traffic

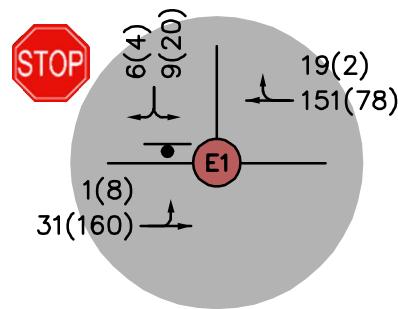

Site-generated traffic was routed onto adjacent streets according to the distribution shown in **Figure 3**. This distribution is similar to what was assumed in the Master TIS.

Total Traffic

Total traffic is the sum of background and site-generated traffic. JR forecasted total traffic volumes at the Study intersections in the years 2029 (Opening Day) and 2045 (Future Year). Total traffic volumes are shown in **Figure 6** (2029) and **Figure 8** (2045).

Traffic Operations Analysis

Traffic operations were analyzed using *Highway Capacity Manual*, 7th Edition methodology. Synchro reports are included in **Appendix E**.

Levels of Service

JR analyzed each of the Study intersections for peak hour level of service (LOS). **Table 1** includes the LOS for each movement in the existing condition (year 2024). **Table 2** includes the forecasted LOS for background traffic and total traffic in the year 2029. **Table 3** includes the forecasted LOS for background traffic and total traffic in the year 2045.

Table 1: 2024 Existing Levels of Service

| Intersection | Movement | AM Peak LOS | PM Peak LOS |
|-----------------------------------------------------------------------------------------------------------------------|------------------|-------------|-------------|
| E1: Judge Orr Rd & Elbert Rd  | EB Left/Through | A | A |
| | WB Through/Right | N/A | N/A |

| | SB Through | N/A | B | N/A | B |
| | SB Right | B | B | A | A |

Discussion on Levels of Service

In the 2024 Existing condition, movements at the Judge Orr & Elbert intersection operate at LOS B or better.

In the 2029 Opening Day condition, all movements are expected to operate at LOS C or better with only background traffic. With total traffic volumes, some movements are expected to degrade, but do not become worse than LOS C.

In the 2045 Future Year condition, all movements are expected to operate at LOS C or better with total traffic volumes.

Queue Lengths

JR analyzed each of the Study intersections for 95th percentile queue lengths. **Table 4** includes the queue lengths for the year 2024 with existing traffic. **Table 5** includes the queue lengths for the year 2029 with total traffic. **Table 6** includes the queue lengths for the year 2045 with total traffic.

Table 4: 2024 Existing 95th Percentile Queue Lengths

| Intersection | Movement | AM Peak Queue (ft) | PM Peak Queue (ft) |
|------------------------------|------------------|--------------------|--------------------|
| E1: Judge Orr Rd & Elbert Rd | EB Left/Through | <25 | <25 |
| | WB Through/Right | N/A | N/A |
| | SB Left/Right | <25 | <25 |

Table 5: 2029 Opening Day 95th Percentile Queue Lengths

| Intersection | Movement | AM Peak Queue (ft) | PM Peak Queue (ft) |
|------------------------------|------------|--------------------|--------------------|
| E1: Judge Orr Rd & Elbert Rd | EB Left | <25 | <25 |
| | WB Left | <25 | <25 |
| | NB Left | <25 | <25 |
| | NB Through | <25 | <25 |
| | NB Right | <25 | <25 |
| | SB Left | <25 | <25 |
| | SB Through | <25 | <25 |
| | SB Right | <25 | <25 |
| A1: NE Access & Judge Orr Rd | EB Left | <25 | <25 |
| | WB Left | <25 | <25 |
| | NB Left | <25 | <25 |
| | NB Through | <25 | <25 |
| | NB Right | <25 | <25 |
| | SB Left | <25 | <25 |
| | SB Through | <25 | <25 |
| | SB Right | <25 | <25 |

Table 6: 2045 Future Year 95th Percentile Queue Lengths

| Intersection | Movement | AM Peak Queue (ft) | PM Peak Queue (ft) |
|------------------------------|-----------------|---------------------------|---------------------------|
| E1: Judge Orr Rd & Elbert Rd | EB Left | <25 | <25 |
| | WB Left | <25 | <25 |
| | NB Left | <25 | <25 |
| | NB Through | <25 | <25 |
| | NB Right | <25 | <25 |
| | SB Left | <25 | <25 |
| | SB Through | <25 | <25 |
| | SB Right | <25 | <25 |
| A1: NE Access & Judge Orr Rd | EB Left | <25 | <25 |
| | WB Left | <25 | <25 |
| | NB Left | <25 | <25 |
| | NB Through | <25 | <25 |
| | NB Right | <25 | <25 |
| | SB Left | <25 | <25 |
| | SB Through | <25 | <25 |
| | SB Right | <25 | <25 |

Discussion on Queue Lengths

Queue lengths are expected to be minimal at each intersection in the Existing, Opening Day, and Future Year conditions. This is a result of low traffic volumes in the vicinity of the Project. No operational issues with queuing are anticipated.

Conclusion

Below is a summary of the conclusions and findings of this TIS.

Levels of Service

2024 Existing condition levels of service are LOS B or better. In the 2029 Opening Day condition, all movements are expected to operate at LOS C or better with total traffic volumes. In the 2045 Future Year condition, all movements are expected to operate at LOS C or better with total traffic.

Queue Lengths

Queue lengths are expected to be minimal at both intersections in the Existing, Opening Day, and Future Year conditions. No operational issues with queuing are anticipated.

Recommendations

JR recommends adding both left and right turn lanes at each of the Study intersections to accommodate turning traffic by 2029 Opening Day. These turn lanes are not triggered solely by the Esteban Rodriguez site, but along with the surrounding background developments.

Road Impact Fee Program

This development is subject to the road impact fee program. Payment option will be determined at the subdivision stage.

Appendix A: Site Plan

Appendix B: Roadway Improvement Table from Master TIS

Table 7*: Roadway Improvements

Esteban Rodriguez Sketch Plan

| CDOT Intersections | | | | |
|-------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Item # | Location/Roadway Segment | Improvement | Timing | Responsibility |
| US Highway 24/Judge Orr Intersection | | | | |
| 1.1 | Judge Orr Road at US Highway 24 | Realignment of Judge Orr Road at US Highway 24 per CDOT Hwy 24 PEL Study | Future (the PEL study identified this as a high priority project with a time frame of less than 5 years) | CDOT |
| 1.2 | US Highway 24 at Judge Orr Road | Southwest-bound right-turn deceleration lane on US Hwy 24 approaching Judge Orr Road | As required by other development(s) or with realignment of US Hwy 24/Judge Orr | CDOT or by others |
| 1.3 | US Highway 24 at Judge Orr Road | Construct southwest-bound right-turn acceleration lane on US Hwy 24 at Judge Orr Road | As required by other development(s) or with realignment of US Hwy 24/Judge Orr | CDOT or by others |
| 1.4 | Judge Orr Road at US Highway 24 | Eastbound left-turn lane on Judge Orr Road approaching US Hwy 24 | With realignment of US Hwy 24/Judge Orr | CDOT |
| 1.5 | Judge Orr Road at US Highway 24 | Westbound dual left-turn lanes on Judge Orr Road approaching US Hwy 24 | With realignment of US Hwy 24/Judge Orr | CDOT |
| 1.6 | US Highway 24 at Judge Orr Road | Northeast-bound right-turn deceleration lane on US Hwy 24 approaching Judge Orr Road | With realignment of US Hwy 24/Judge Orr | CDOT |
| 1.7 | Judge Orr Road at US Highway 24 | Eastbound right-turn deceleration lane on Judge Orr Road approaching US Hwy 24 | As required by other development(s) or with realignment of US Hwy 24/Judge Orr | CDOT or by others |
| US Highway 24/Stapleton Intersection | | | | |
| 2.1a | US Highway 24/Stapleton Intersection | Escrow Contribution toward traffic control upgrade - CDOT Escrow for Participation in the cost of future signalization | To be addressed with the Preliminary Plan/Plats and Future Access Permit(s) | Applicant |
| 2.1b | US Highway 24/Stapleton Intersection | Traffic Control Upgrade - Signalization of the intersection | CDOT - Once warrants are met | CDOT is collecting escrow from area developments impacting this intersection. |
| US Highway 24/Elbert Road Intersections | | | | |
| 3.1 | US Highway 24/Elbert Road Intersection (Westbound left-turn) | Lengthening of the westbound left-turn deceleration lane to CDOT standards (800-feet plus storage plus taper) - Existing deficiency. | Depending on the level of site-generated traffic added to this turning movement as development progresses, determination will be made if the project significantly impacts this intersection and this turning movement. If determined with the preliminary plan that site traffic impact is to a level that warrants the need for this project to submit an access permit and participate in some form toward this improvement, there will likely be either identification of an escrow contribution toward a future improvement or a requirement to complete this improvement (to be determined with the preliminary plan). (fee program credit per fee program provisions) | Applicant and/or other developments that may add westbound left-turning movements to this intersection |
| 3.1a | US Highway 24/Elbert Road Intersection | Potential Escrow Contribution toward traffic control upgrade - CDOT Escrow for Participation in the cost of future signalization | To be addressed with the Preliminary Plan/Plats and Future Access Permit(s) | Applicant |
| 3.1b | US Highway 24/Elbert Road Intersection | Traffic Control Upgrade - Signalization of the intersection | CDOT - Once warrants are met | CDOT is collecting escrow from area developments impacting this intersection. |
| US Highway 24/Rex Road (Future) Intersection | | | | |
| 4.1 | US Highway 24/Rex Road Intersection (Future) | New Intersection Construction and Future Signalization | As Per CDOT AP No. 221088 | Permittee (Grandview Reserve Development) |
| Adjacent County Arterial Roadway ROW Requirements | | | | |
| 5.1 | Judge Orr Road Site Frontage | Right-of-Way Dedication Half of 2-Lane Rural Minor Arterial ROW (which is 100' total) Shown in 2024 DRAFT 2045 MTCP | Dedicate adjacent half ROW with plats but to be verified/detailed with the Preliminary Plan. | Applicant |
| 5.2 | Judge Orr Road Site Frontage | Corridor Preservation for 4-Lane Minor Arterial or updated 2065 Classification to be determined in the 2045 MTCP. | ROW preservation to be indicated with plats but to be verified/detailed with the Preliminary Plan. | Applicant |
| El Paso County Roadway Segment Improvements | | | | |
| 6.1 | Judge Orr Road (Short Term) Site Frontage | Widening of the south half to the Rural Minor Arterial cross section as parcels develop (or provide funds toward future widening) | As development occurs - details to be determined at the Preliminary Plan stage | Note: potential for negotiated fee program credit based on construction of the ultimate Rural Minor Arterial half section. This will be subject to submission and review and potential acceptance of a proposed fee program credit agreement by EPC and the Fee Program Committee. |
| 6.2 | Judge Orr Road (Long Term) Adjacent to the site frontage, but on the north side of the roadway | Future widening on the north side, to complete the full Rural Minor Arterial cross section. | Two-lane Rural Minor Arterial Shown in DRAFT 2045 MTCP (note: not yet adopted) | Most likely the property owner on the north side of Judge Orr, if/when that property develops. |
| 6.3 | Judge Orr Road (Long Term) US Highway 24 to Peyton Highway | Rural county road upgrade to Rural Minor Arterial cross section, DRAFT 2045 MTCP Project No. 159 | Two-lane Rural Minor Arterial Shown in DRAFT 2045 MTCP (note: not yet adopted) | Adjacent developments as they occur; any "gaps" may be projects completed by the county with fee program funds; applicant will pay fee program traffic impact fees. |
| 6.4 | Curtis Road (Long Term) Judge Orr Road to Highway 94 | Rural county road upgrade to Rural Minor Arterial cross section, DRAFT 2045 MTCP Project No. 512 | Two-lane Rural Minor Arterial Shown in DRAFT 2045 MTCP (note: not yet adopted) | Adjacent developments as they occur; any "gaps" may be projects completed by the county with fee program funds; applicant will pay fee program traffic impact fees. |
| 6.5 | Rex Road (Long Term) Elbert Road to US Highway 24 | New county road connection - Rural Minor Arterial DRAFT 2045 MTCP Project No. 401 | New two-lane Rural Minor Arterial Shown in DRAFT 2045 MTCP (note: not yet adopted) | Likely with development of the property through which the roadway segment is shown to connect through; any "gaps" may be projects completed by the county with fee program funds; applicant will pay fee program traffic impact fees. |
| Internal Development Roadways | | | | |
| 7.1 | Internal Development Roadways (shown in Figure 10) | Construct to County Standards IAW the classification map (shown in Figure 10); details to be addressed with the preliminary plan. | As development occurs; phasing/timing details to be addressed with the Preliminary Plan. | Applicant |
| El Paso County Intersections and Site Access Intersections | | | | |
| Item # | Improvement | Timing | Responsibility | |
| Judge Orr/Curtis Road Intersection | | | | |
| 8.1 | Judge Orr/Curtis Road Intersection (westbound approach) | Westbound right-turn deceleration lane | Once peak-hour westbound right-turn volume exceeds 50 vehicles per hour. Projections indicate this threshold would be exceeded, based on the 2030 analysis. | Install lane if threshold exceeded due to this development's traffic (to be determined with the preliminary plan) or if already exceeded at the time of Preliminary Plan or escrow a pro-rata share for future construction (fee program credit per fee program provisions) |
| 8.2 | Judge Orr/Curtis Road Intersection (eastbound approach) | Eastbound right-turn deceleration lane | Currently warranted by ECM. The Saddlehorn Filing No. 2 TIS report and MeadowLake Industrial Park Filing NO. 1 TIS reports include narrative for the provision in the "State Highway Access Code" Section 3.5 (5) for low through volumes. Please refer to those reports for details. | This project is not projected to add eastbound right turning traffic to this intersection, so the responsibility is "by others." Note: This project will add eastbound through traffic, which has the potential to affect the timing of need for the right-turn lane (by others) because the eastbound through volume is the key factor in the determination of the timing of this turn lane as described in the "timing" column. |
| 8.3 | Judge Orr/Curtis Road Intersection (northbound approach) | Northbound Left Turn Lane - potential future lengthening (restriping) | Proposed triggers 1) If ECM thresholds for additional stacking length are exceeded AND once (and if) the intersection is signalized or if stop signs are switched to EB and WB. OR 2) while NB stop control remains, if queue reaches lengths which result in operational or safety issues. | This project is not projected to add northbound left turning traffic to this intersection, so the responsibility is "by others." |
| 8.4 | Judge Orr/Curtis Road Intersection (Southbound approach) | Southbound Left Turn Lane = potential future lengthening for additional vehicle storage | Proposed triggers 1) If ECM thresholds for additional stacking length are exceeded AND once (and if) the intersection is signalized or if stop signs are switched to EB and WB. OR 2) while SB stop control remains, if the southbound queues reach lengths which result in operational or safety issues due to queuing - such as queues spilling into the adjacent through lane (this can be evaluated at Preliminary Plan); | Identify potentially Escrow for improvement depending on anticipated need at Preliminary Plan (or possibly construction if determined to be needed based on this development's traffic AND if conditions called out in the "Timing" column warrant the need for this lane extension. (fee program credit per fee program provisions) |
| 8.5 | Judge Orr/Curtis Road Intersection (Intersection Control) | Potentially sign for all-way stop-sign control (AWSC) | Once warrants for AWSC are met (Note: The 2030 Total traffic LOS indicates an E LOS for one of the peak hours (the AM peak); however the PM peak hour shows LOS C; while the AM peak LOS may be an indicator of a possible need for traffic control change, traffic control is not typically changed based on volumes during one hour of the day. Other considerations may include the future safety record, however. This can be reevaluated with the Preliminary Plan and/or Final Plats.) | El Paso County and/or other developments as there are multiple projects in the area that may trigger the change in traffic control due to development traffic |
| 8.6 | Judge Orr/Curtis Road Intersection (Intersection Control) | Long Term: Reconstruct intersection as a modern roundabout (or signalize the intersection) | Once LOS of AWSC drops below acceptable levels (roundabout); or once signal warrants are met (for conversion to a signal or roundabout) | El Paso County and/or other developments as there are multiple projects in the area that may trigger the change in traffic control due to development traffic. This intersection will be fee-program eligible for a signal/roundabout and applicant will pay fee program traffic impact fees. |
| Judge Orr/Elbert Road/West Site Access | | | | |
| 9.1 | Judge Orr/Elbert Road intersection w/ addition of south leg (west Site Access) with this development. | The northbound left-turn and the eastbound right-turn volumes are projected to meet the thresholds requiring auxiliary lanes. These will be required (to be verified with the preliminary plan); a deviation may be submitted with the preliminary plan for the northbound left-turn lane if the northbound approach is likely to be stop-sign controlled through the long term, and if no projected queuing or LOS issues absent this lane; construct this intersection to County Standards; south leg to be added IAW the classification map (shown in Figure 10); details to be addressed with the preliminary plan; construct south leg of the intersection to County Standards IAW the classification map (shown in Figure 10); details to be addressed with the preliminary plan. | As development occurs this can be confirmed with the Preliminary Plan (if this changes with the preliminary plan, requirements and associated phasing/timing details to be addressed at that time) | Applicant and/or other developments that may add turning movements to this intersection |
| Judge Orr/East Site Access | | | | |
| 10.1 | Judge Orr/East Site Access | No Auxiliary Turn Lanes Required (to be verified with the preliminary plan); construct this intersection to County Standards; south leg to be added IAW the classification map (shown in Figure 10); details to be addressed with the preliminary plan. | As development occurs this can be confirmed with the Preliminary Plan (if this changes with the preliminary plan, requirements and associated phasing/timing details to be addressed at that time) | Applicant |

** Note: CDOT Formula taken from recent nearby projects: [sample] The development is required to participate in the cost of the future traffic signal at Stapleton and Hwy 24. Based on the average AM&PM site-generated passenger cars directly impacting the 4-hour warrant, the development would be responsible for ~\$_____, (____ new vehicles / 60 vehicles-to-warrant x ~\$700K/signal cost).
