
FALCON FIELDS – REZONE/MAP AMENDMENT

PROJECT JUSTIFICATION

JUNE 2019

REQUEST

Falcon Fields, LLC requests approval of the following applications:

1. Rezone/Map Amendment to parcels 4307000001 & 4307200015 from RR-5 to CR

LOCATION & DESCRIPTION

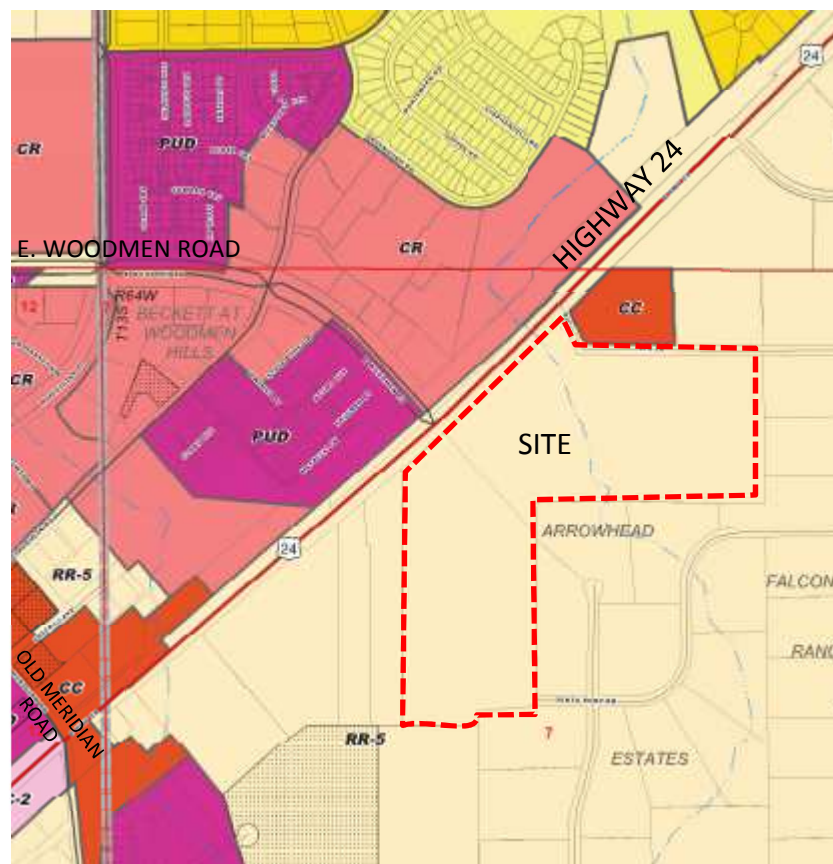

The property is located directly east of the Woodmen Road and Highway 24 Intersection. The sites are currently vacant and zoned RR-5. The proposal addresses the two parcels (4307000001 & 4307200015) directly south of Rio Lane. Parcel 4307000001 is a 33.14-acre parcel & 4307200015 is a 24.53-acre parcel. Access to the site currently is off of Rio Lane and access changes and improvements will be addressed further with future land use applications. The existing topography slopes generally to the south with a smaller portion in the middle near the intersection of Woodmen and Highway 24, sloping to the southwest. The northern most 33.14-acre parcel contains a Zone A Floodplain designation going southeast through the site. Future efforts will address a floodplain map revision and formal CLOMR/LOMR to address channel improvements.

CONTEXT

The site currently is framed largely by Commercial uses to north and northwest with CR and CC zone districts. The properties to the east and south are generally designated for residential RR-5 zone districts. The table below outlines the surrounding zoning and land uses. The noted area is within the Falcon/Peyton Small Area Plans “Falcon Town Site Area” designated as the primary center for commercial business and service activities.

LOCATION	ZONE DESIGNATION	LAND USE	JURISDICTION
North/Northwest	CR PUD	Commercial Mixed Use Commercial/ Residential	County
East	RR-5	Residential - low	County
South	RR-5	Residential - low	County

PROJECT DESCRIPTION

The proposed 57.67ac zone district is located directly southeast of the Woodmen Road and Highway 24 intersection. No major site changes are being proposed at this time as future development will be dictated by subsequent Preliminary and Site Development Plan applications. At this time the proposal addresses a request for to rezone the property, setting the framework for forthcoming entitlement applications.

The proposal for the map amendment looks to rezone the existing RR5 parcels 4307000001 & 4307200015 to a CR zone designation. The CR Zone is defined as follows:

CR, Commercial Regional District

The CR zoning district is intended to accommodate regional centers providing ease of pedestrian and vehicular circulation, unity of architectural design, and best serving the convenience of the public and aesthetic enhancement of the community and region.

The CR zone district will specifically look to incorporate uses seen in mixed use commercial centers to include a potential big box retail and supporting inline opportunities. Considerate of the existing RR5 adjacent, the zone district will look to locate less intensive commercial pad sites with appropriate buffers and transitional uses on the edges of the property. Specific consideration to what those pad site uses entail will further be developed with subsequent Site Plan applications. Attention to proper buffers will be in the way of increased open space and setbacks to ensure the best cohesion between the proposed and existing zone district. The rezone specifically looks to provide adequate services and access to such south of Highway 24 not yet seen in this area and as envisioned in the Small Area Plan

PROJECT JUSTIFICATION

The proposed application is supportive of future development and considerate of the effects on the general health, welfare and safety of neighborhoods in the immediate and downstream neighborhoods that have impact from growth in the area. As mentioned, reports and land use applications will be provided to address the proper mitigation of any impacts the development may have in the area. These studies in addition look at the capacities of existing streets, utilities, public facilities and the like, to lessen the potential burden of the proposed future commercial development moving forward.

The amendment for the CR Zone District will provide opportunity for an enhanced range of commercial opportunities in the region not yet seen on the southern side of Highway 24 and as envisioned in the Falcon/Peyton Small Area plan (*Policy 4.4.5.1*). This proposal further intends to implement the future corridors goals of improvement and enhancement through thoughtful land use planning that strengthens and provides additional diversity in the range of commercial uses. The proposal seeks to locate the Zone District in an area that provides proper connectivity to major corridors and extends services to areas south of Highway 24 with proper access improvements. A separate application for a proposed Service Plan addressing the proposed zone and intended use applications has been submitted in support of the needed improvements to serve the future development.

The intended Zone change strengthens and furthers the intent of the County wide Master Plan and more specific small area plan by continuing the development goals, policies and land use planning efforts envisioned in this area. All necessary site design and supportive reports will be provided with subsequent plans. In addition, application for channel improvements and map revisions further addressing needing drainage improvements are to be pursued with future applications.

The application is compliant with the Criteria for Approval for the Map Amendment as follows:

Chapter 5.3.5.B Map Amendment (Rezoning) - Criteria for Approval

- ***The application is in general conformance with the El Paso County Master Plan including applicable Small Area Plans or there has been a substantial change in the character of the neighborhood since the land was last zoned;***
The proposed zone district and map amendment focus a future use that is consistent with past land use actions for this area. The goals and policies of both the larger County Master Plan and more specific Falcon/Peyton Area Plan, look at the development of this corridor as a strong central node and corridor for activity. The proposed amendment for the CR zone district enhances the policies seen vital to growth in the corridor by continuing the

intent of clustered urban development in areas that can be supportive of such growth. Locating commercial districts as this near supportive infrastructure strengthens the goals of the Master Planned direction and only improves upon the infrastructure in place to lessen potential burden on these systems seen in less centralized corridors. In addition, the proposed land use provides access to goods and services in an area seen vital to the growth of the corridor and more specific Small Area plans goal of growth nodes and Town Centers. Future land use applications will integrate proper policy context in regards to adjacent uses and needs for transitions between such uses for effective growth in the area.

County Master Plan Policy 5.1.9

Encourage appropriate economic development in rural areas of the County as a means of providing local employment opportunities, increasing community tax base, and reducing long commutes.

County Master Plan Policy 6.1.4

Encourage the logical timing and phasing of development to allow for the efficient and economical provision of facilities and services.

County Master Plan Policy 6.3.4

Commercial, office, industrial and, residential development should be compatible with surrounding land uses in terms of scale, intensity and potential impacts.

County Master Plan Policy 6.4.6

Allow for the accommodation of necessary supporting commercial uses within or in proximity to rural residential areas in a manner that preserves the rural character of these areas.

Falcon/Peyton Small Area Plan Policy 3.5.1

Recommend land use patterns that make efficient use of existing transportation infrastructure and limit the cost of future extensions and upgrades.

Falcon/Peyton Small Area Plan Policy 3.5.6

Balance long term transportation infrastructure needs with current requirements.

Falcon/Peyton Small Area Plan Policy 3.5.7

Ensure the coordination of land use and transportation planning.

Falcon/Peyton Small Area Plan Policy 4.4.5.1

Allow for potential commercial development south of Highway 24 near its intersection with Woodmen Road, provided that adequate transportation improvements are made, utility extensions can be made, and adjoining existing land uses are adequately buffered.

• The rezoning is in compliance with all applicable statutory provisions, including but not limited to C.R.S. § 30-28-111 § 30-28-113, and § 30-28-116;

The proposed rezone is in compliance with the applicable statutory provisions that allow County's to establish limit, regulate, or amend zoning within the unincorporated parts of El Paso County in the interests of public health, safety and welfare.

• The proposed land use or zone district is compatible with the existing and permitted land uses and zone districts in all directions; and

The proposal for the zone change supports the Falcon/Peyton Small areas plan for development on the south side of Highway 24. The existing uses to the north and west of the development complement the current zone district application and strengthen future goals of development in the area. The location of the zone district enhances the

accessibility to services and will address future needed improvements to supportive infrastructure. Increased open space and transitional uses between use types will be incorporated for proper buffering of the adjacent zone districts. Proper inclusion of transitional uses and buffering strengthen the needed compatibility by providing access to needed goods and services in a way that balances the need for such with effective implementation.

- ***The site is suitable for the intended use, including the ability to meet the standards as described in Chapter 5 of the Land Development Code, for the intended zone district.***

The site and future land use are suitable for the proposed district with proper access opportunities and support of planned improvements both for the Small area plan goals and future infrastructure goals. Future land use plans will further define and address the zone district requirements for proper buffering and transitional uses proposals that are considerate of the adjoining districts and relevant uses.
