### **Kum & Go, SP-17-009**

Please accept the following comments from El Paso County Public Health regarding the project referenced above:

- There is a finding for sufficiency in terms of water quality for drinking water obtained from Cherokee Metropolitan District which is a Colorado Department of Public Health and Environment, Water Quality Control Division, regulated central water supply. The water system is assigned PWSID# CO-0121125 by the Colorado Department of Public Health and Environment.
- There is sufficient wastewater treatment capacity at the Cherokee Metropolitan District wastewater treatment facility to treat the projected wastewater flows from this proposed commercial site. A letter from Cherokee Metropolitan District dated 28Aug2018 indicates there is sufficient water and wastewater capacity for this development project.
- This development site has earthmoving activity in excess of one acre, but less than twenty-five acres, and requires a Construction Activity Permit from El Paso County Public Health. Go to <http://www.elpasocountyhealth.org/service/air-quality> for more information.
- Radon resistant construction building techniques/practices are encouraged to be used in this area. The EPA has determined that Colorado, and the El Paso County area have potentially higher radon levels than other areas of the country.
- El Paso County Public Health requires interior finish plans to be submitted for review and approval prior to commencement of construction.
- The water quality detention basin must have mosquito control responsibilities included as a part of the maintenance plan to help control mosquito breeding habitat and minimize the potential for West Nile Virus.
