C/o Lindsay Darden, El Paso County Planning Department
2880 International Circle, Ste 110
Colorado Springs, CO 80910

This is not accurate.
You are requesting to
re-designate a lot as
a non-buildable tract

Re: Letter of Intent - Clear View Industrial Park Filing No. 2A – Replat, Grading, Storm, and Erosion Control Plans

Provide an explanation of
the existing use on the
property.

Ms. Darden:

Please accept this letter of intent from CTR Engineering, Inc. for a replat, grading, storm, and erosion control plans. Our intent is to build a storm water quality facility on lot 4A within the Clear View Industrial Park Filing No. 2A subdivision; convert it to a drainage tract as part of the replat, which will receive storm water flows from all platted lots. No change to platted lots or site development land use is being requested or required.

Site Location, size, and zoning:

This project is located along Clear View Loop, northwest of Hancock Expressway and Bradley Road. The property is surrounded by industrial lots to the north, east and south. Directly west is agricultural land. The current property was platted in 2008 with 4 lots. Lot 3A contains an existing building and vehicle storage area.

Background:

This property was developed in 2008 and subdivided into 4 industrial lots. The developer posted approximately \$60,000 in drainage assurances, but never built any water quality facilities. The purpose of this application is to build a water quality facility on lot 4A that will receive storm water flows from all platted lots. Lots 1A and 2A are undeveloped and will remain undeveloped until sold to a buyer who wishes to build on one of them. At that time, the buyer will then create a site development plan that meet all El Paso County requirements to build on that lot. Each lot buyer will be required to hire a Geotech engineer for their lot and produce a geotechnical report.

Existing and Proposed facilities, structures, roads, etc:

No onsite or offsite roadway improvements are required for this application. Construction of the water quality facility, swales and storm pipe will be built.

Replat – Without Right-of-way modifications

The purpose of the replat is to eliminate lot 4 as a potential developable lot because the overall site water quality pond is proposed there. The previous plat had several storm drainage easements across each lot that need to be removed. Lot 2 and lot 4 will now be combined into one lot with the sole owner of lot 2 being required to own and maintain the water quality pond. No other lot line modifications are being proposed.

Water Supply and Sewer Sanitation Services:

The water and sewer services are being supplied by Security Water and Sanitation District per the approved Site Development Plan from 2008.

Soil or Topographic Conditions:

Existing soil consists of Blakeland Loamy Sand with existing grades from 1% to 2%. It is anticipated that lots 1A and 2A will require some sort of retaining wall to maximize

Please submit a license agreement for the driveway that is located within the unimproved public ROW.

Drainage Improvements:

Construction of the water quality facility, swales and storm pipe will be built.

Access:

Clear View Loop gives access to lots 1A, 2A, and 3A. Clear View Drive right-of-way gives access to lot 4A (drainage tract).

Necessary Service:

All necessary services, including police and fire protection, recreation, utilities, and transportation systems, are available to serve this subdivision and were committed to service back in 2008.

Fire Protection:

Security Fire Protection District is providing the fire protection for this existing subdivision based on their approval of the Site Development Plans from 2008.

Offsite & Public Improvements:

No offsite or public improvements will be required with this grading, storm, and erosion control plan.

Mining Deposits:

No mining deposits existing within this industrial subdivision.

Land Use and the El Paso County Policy:

This development follows the same land patterns as set forth in this area: industrial lots. The site development plan was approved in 2008.

Request & Justification:

The construction of the water quality pond will meet current water quality requirements as set forth by the County. This subdivision is consistent with the subdivision design standards and regulations, and meets all planning, engineering, and surveying requirements of the County for maps, data, surveys, analysis, studies, reports, plans, designs, documents, and other supporting materials.

Include analysis of criteria in LDC Sec. 7.2.3(B). Include each bullet point and a response. Response should include justification, rather than simply responding that the criteria is met:

- The lot line/building envelope adjustment and any resultant lots comply with this Code, and the original conditions of approval associated with the recorded plat;

The purpose of this Section is to provide for a realignment of a lot line or building envelope, or replatting of several lots (e.g., 3 lots into 2 lots), in which the original subdivision is not substantially modified and additional lots are not created; however, tracts may be created provided the declared use of the tract does not include a structure.

- No nonconforming lots are created, and in the case of nonconforming lots, the nonconformity is not increased;
- The lot line/building envelope adjustment is in keeping with the purpose and intent of this Code;
- The lot line/building envelope adjustment will not adversely affect the public health, safety, and welfare; and
- Where the lots or parcels are subject to any CC&Rs or other restrictions, that any potential conflict with the CC&Rs or other restrictions resulting from the lot line/building envelope adjustment has been resolved.

Contact Information

CTR Engineering, Inc. is a full-service planning and engineering firm, representing Clear View Properties I, LLC (property owner). The following is the contact information for both parties.

Owner:	Consultant:
Clear View Properties I, LLC	CTR Engineering, Inc.
Kevin Ferguson, Manager	Jonathan Moore, P.E.
9720 Arroya Lane	16392 Timber Meadow Drive
