

## **Culvert Report**

Based on our discussion with County Staff re: changing the culvert design at Arroya to keep off of Mr. Turner's property to the north, we have revised the culvert crossing to CDOT std. Dual 6'x12' concrete box culverts and associated headwall/wingwalls. Thus, there is no specific culvert design report required, as the culvert design is now incorporated into the CD plan set with site specific details provided and references to the CDOT M Stds.
