Fall Mountain Farm, PPR-22-46

Please accept the following comments from El Paso County Public Health for the request referenced above:

- Drinking water for the request is planned to have water and drinks supplied by outside vendors for individual events. Use of water from the private well is not approved.
- Wastewater service for the project is proposed to be provided by an auxiliary prefabricated mobile restroom. El Paso County Public Health will require the plans to be submitted to the Environmental Health Division for review prior to installation on the site. No portable hand sinks are proposed, nor are they required; however, they are encouraged for customers because of the proposed animal petting area and basic personal hygiene.
- Animal waste must be collected and removed as needed to minimize odors, and insect/rodent attraction.
- The existing residence is connected to an onsite wastewater treatment system (OWTS) installed and approved in 1987 for a 4-bedroom house. Please locate the OWTS soil treatment area to make sure traffic and parking will not be in the proximity to the soil treatment area.
