Subject: [EXTERNAL] Bennett Ranch technical assistance request

This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.

Hello,

Please find attached a technical assistance / effects determination concurrence request for the proposed Bennett Ranch ADU development project located on the west side of Peyton Highway and south of Sweet Road in El Paso County, Colorado. The project plans to develop an additional dwelling on the site. To ensure the project will not adversely affect listed species or their habitat, the County has requested the Service's review and concurrence with our determination that the project is not reasonably certain to affect listed species. We appreciate your review.

Thank you,

Daniel
