DEVIATION REQUEST AND DECISION FORM

Updated: 6/26/2019

PROJECT INFORMATION

Stopping Sight Distance

Project Name : Winsome Filing No 1
Schedule No.(s) : Existing Right of Way
Legal Description : Same

APPLICANT INFORMATION

Company : Winsome LLC
Name : Joe DesJardin
☒ Owner ☐ Consultant ☐ Contractor
Mailing Address : 1864 Woodmoor Drive, Suite 100, Monument, CO 80132

Phone Number : 719 476 0800
FAX Number :
Email Address : jdesjardin@proterraco.com

ENGINEER INFORMATION

Company : Monument Hill CM LLC
Name : Joseph W. DesJardin, PE
Mailing Address : 1864 Woodmoor Drive, Suite 100, Monument, CO 80132

Phone Number : 719 476 0800
FAX Number :
Email Address : jdesjardin@proterraco.com
Colorado P.E. Number : 24207

OWNER, APPLICANT, AND ENGINEER DECLARATION

To the best of my knowledge, the information on this application and all additional or supplemental documentation is true, factual and complete. I am fully aware that any misrepresentation of any information on this application may be grounds for denial. I have familiarized myself with the rules, regulations and procedures with respect to preparing and filing this application. I also understand that an incorrect submittal will be cause to have the project removed from the agenda of the Planning Commission, Board of County Commissioners and/or Board of Adjustment or delay review until corrections are made, and that any approval of this application is based on the representations made in the application and may be revoked on any breach of representation or condition(s) of approval.

DEVIATION REQUEST (Attach diagrams, figures, and other documentation to clarify request)

A deviation from the standards of or in **Section 2.3.6.B** of the Engineering Criteria Manual (ECM) is requested.

Identify the specific ECM standard which a deviation is requested:

- **Section 2.3.6.B. Stopping Sight Distance on Straight Roadways**
- **Table 2-12, Design Controls for Stopping Sight Distances on Crest Vertical Curves**

State the reason for the requested deviation:

- Existing Hodgen Road has a posted speed of 55 mph and does not satisfy: Table 2-12 Design Controls for Stopping Sight Distance on Crest Vertical Curves. The table requires stopping sight distance of 570 feet for design speed of 60 mph. Existing Hodgen Road has a K value of 18 (see Exhibit A) which corresponds to a stopping sight distance of 200 feet. Stopping Sight Distance is measured from the driver's eye (3.5 feet above the road surface) to a stationary object (0.5 feet above the road surface).

Explain the proposed alternative and compare to the ECM standards (May provide applicable regional or national standards used as basis):

- The proposed alternative is to accept Hodgen Road as an interim existing condition. The County is proposing Project U2 in the MTCD to rebuild the existing roadway to accommodate higher speed limit and additional stopping sight distance.
- The existing deficiency only applies to through (east/west) traffic and does not apply to traffic turning to/from Winsome Way.
- The intersection of Winsome Way at Hodgen Road has adequate intersection sight distance using a 665 feet intersection sight triangle. Per the ECM, "The intersection sight distance provides for vehicles to enter traffic and accelerate to the average running speed".
- The proposed west bound acceleration lane leaving Winsome Way is redundant with the intersection sight distance provided above.

LIMITS OF CONSIDERATION

(At least one of the conditions listed below must be met for this deviation request to be considered.)

- ☐ The ECM standard is inapplicable to the particular situation.
- ☒ Topography, right-of-way, or other geographical conditions or impediments impose an undue hardship and an equivalent alternative that can accomplish the same design objective is available and does not compromise public safety or accessibility.
- ☐ A change to a standard is required to address a specific design or construction problem, and if not modified, the standard will impose an undue hardship on the applicant with little or no material benefit to the public.

Provide justification:

- The intersection of Winsome Way was intentionally designed to be at the high point of the vertical curve on Hodgen Road thereby providing superior visibility in all directions.
- The intersection of Winsome Way at Hodgen Road has adequate intersection sight distance using a 665 feet intersection sight triangle.
- West bound traffic on Hodgen Road (3.5 feet eye height) can see vehicles (4.25 feet height) turning to/from Winsome Way at a distance that exceeds the safe stopping distance of 570 feet and vice versa.
- East bound traffic on Hodgen Road (3.5 feet eye height) can see vehicles (4.25 feet height) turning to/from Winsome Way at a distance that exceeds the safe stopping distance of 570 feet and vice versa.

CRITERIA FOR APPROVAL

Per ECM section 5.8.7 the request for a deviation may be considered if the request is **not based exclusively on financial considerations**. The deviation must not be detrimental to public safety or surrounding property. The applicant must include supporting information demonstrating compliance with **all of the following criteria**:

The deviation will achieve the intended result with a comparable or superior design and quality of improvement.

- The inadequate stopping sight distance for through traffic on Hodgen Road is an existing condition. The intersection with Winsome Way exceeds requisite intersection sight distance and stopping sight distance measured vehicle to vehicle. A separate left turn lane has been added to allow vehicles to pause in Hodgen Road to ensure the intersection is clear before turning north.
- The County is proposing Project U2 in the MTCDD to rebuild the existing roadway to accommodate higher speed limit and additional stopping sight distance.
- There are existing MUTCD W2-2 advance warning signs posted on the approaches to the vertical curve. The County could further address the deficiency with a supplemental speed plate if this becomes necessary.

The deviation will not adversely affect safety or operations.

- To enhance the safety of the intersection of Winsome Way with Hodgen Road, the applicant has already widened Hodgen Road by 20 feet to provide a separate eastbound/northbound left turn lane and associated redirect tapers, for the safety of the residents.
- There are existing MUTCD W2-2 advance warning signs posted on the approaches to the vertical curve. The County could further address the deficiency with a supplemental speed plate if this becomes necessary.

The deviation will not adversely affect maintenance and its associated cost.

- The applicant is not proposing any changes to the existing County Road infrastructure with respect to this deviation. There will be no change to maintenance and associated costs.

The deviation will not adversely affect aesthetic appearance.

- The applicant is not proposing any changes to the existing County Road infrastructure with respect to this deviation. There will be no change to the aesthetic appearance.

The deviation meets the design intent and purpose of the ECM standards.

- The proposed alternative is to leave Hodgen Road as is. This is an existing roadway, and this is an existing deficiency. The existing deficiency is related to east/west through traffic rather than traffic turning to/from Winsome Way.
- The County is proposing Project U2 in the MTCD to rebuild the existing roadway to accommodate higher speed limit and additional stopping sight distance.
- There are existing MUTCD W2-2 advance warning signs posted on the approaches to the vertical curve. The County could further address the deficiency with a supplemental speed plate if this becomes necessary.

The deviation meets the control measure requirements of Part I.E.3 and Part I.E.4 of the County's MS4 permit, as applicable.

- Water quality has been provided.

REVIEW AND RECOMMENDATION:

Approved by the ECM Administrator

This request has been determined to have met the criteria for approval. A deviation from Section _____ of the ECM is hereby granted based on the justification provided.

┌

┐

└

┘

Denied by the ECM Administrator

This request has been determined not to have met criteria for approval. A deviation from Section _____ of the ECM is hereby denied.

ECM ADMINISTRATOR COMMENTS/CONDITIONS:

--

1.1. PURPOSE

The purpose of this resource is to provide a form for documenting the findings and decision by the ECM Administrator concerning a deviation request. The form is used to document the review and decision concerning a requested deviation. The request and decision concerning each deviation from a specific section of the ECM shall be recorded on a separate form.

1.2. BACKGROUND

A deviation is a critical aspect of the review process and needs to be documented to ensure that the deviations granted are applied to a specific development application in conformance with the criteria for approval and that the action is documented as such requests can point to potential needed revisions to the ECM.

1.3. APPLICABLE STATUTES AND REGULATIONS

Section 5.8 of the ECM establishes a mechanism whereby an engineering design standard can be modified when if strictly adhered to, would cause unnecessary hardship or unsafe design because of topographical or other conditions particular to the site, and that a departure may be made without destroying the intent of such provision.

1.4. APPLICABILITY

All provisions of the ECM are subject to deviation by the ECM Administrator provided that one of the following conditions is met:

- The ECM standard is inapplicable to a particular situation.
- Topography, right-of-way, or other geographical conditions or impediments impose an undue hardship on the applicant, and an equivalent alternative that can accomplish the same design objective is available and does not compromise public safety or accessibility.
- A change to a standard is required to address a specific design or construction problem, and if not modified, the standard will impose an undue hardship on the applicant with little or no material benefit to the public.

1.5. TECHNICAL GUIDANCE

The review shall ensure all criteria for approval are adequately considered and that justification for the deviation is properly documented.

1.6. LIMITS OF APPROVAL

Whether a request for deviation is approved as proposed or with conditions, the approval is for project-specific use and shall not constitute a precedent or general deviation from these Standards.

1.7. REVIEW FEES

A Deviation Review Fee shall be paid in full at the time of submission of a request for deviation. The fee for Deviation Review shall be as determined by resolution of the BoCC.

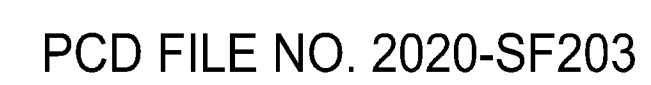

Vertical alignment profile for Hodgen Road. The profile shows the existing ground (dashed line) and the proposed centerline (solid line). The vertical curve is defined by the following data:

- High Point ELEV: 7412.77
- High Point STA: 11+14.45
- PVI STA: 11+54.66
- PVI ELEV: 7415.11
- AD: 11.13%
- K: 18.00
- 200.38' VC

Key points on the profile include:

- BVCS: 10+14.47
- BYCE: 7411.77
- PVI: 9+25.00
- EL: 7407.46
- EVCS: 12+14.85
- EL: 7407.30
- PVI: 13+25.00
- EL: 7401.82

The profile is plotted on a grid with stationing from 7+25 to 15+00 and elevation from 7388 to 7416. The horizontal scale is 1 inch = 60 feet, and the vertical scale is 1 inch = 6 feet.
