## **Noxious Weed Management Plan**

**Sites:** Orton Borrow Pit and Golden Eagle Ranch Batch Plant

**Duration of Disturbance:** 2 years

**Total Area of Disturbance:** Approximately 20 Acres

**Purpose of Plan:** To prevent the spread or development of noxious weeds during mining operations and following the restoration of the site.

**Planned Actions:**

1. An inspection will be conducted prior to topsoil stripping to verify the absence of noxious weeds. If present the site shall be sprayed for weeds prior to stripping.
2. Following final seeding an inspection will be conducted alongside the required quarterly storm water inspection to check for any noxious weeds, if noxious weeds are present the pit will be sprayed for weeds in the next 30 calendar days.
