April 28, 2017

**Eastholme Bed and Breakfast AL-17-11**

Please accept the following comments from El Paso County Public Health (EPCPH) regarding the project referenced above:

- Permit records show the On-site Wastewater Treatment System (OWTS) on file with El Paso County Public Health (EPCPH) was designed by a licensed engineer. The OWTS alteration/repair design by Michael Orsillo dated October 13, 2016 was approved for 10 bedrooms.
- Water will be provided by Cascade Metropolitan District No. 1.
- Radon resistant construction building techniques/practices, if applicable, are encouraged to be used in this area. The EPA has determined that Colorado, and the El Paso County area, have potentially higher radon levels than other areas of the country
