The Trails at Aspen Ridge, SF-19-002

Please accept the following comments from El Paso County Public Health regarding the project referenced above:

- The 55.82-acre site with 180 residential lots planned for the development project will be provided water by Widefield Water and Sanitation District. There is a finding for sufficiency in terms of water quality for this Colorado Department of Public Health and Environment regulated and approved district. (CO0121275)
- Wastewater service will be provided by Widefield Water and Sanitation District. Per the 12Dec18 Letter of Commitment from Widefield Water and Sanitation District, there is adequate capacity at the wastewater treatment facility for the anticipated wastewater flow generated from this development project.
- Radon resistant construction building techniques/practices are encouraged to be used in this area. The EPA has determined that Colorado, and the El Paso County area, have potentially higher radon levels than other areas of the country.
- The water quality detention basins must have mosquito control responsibilities included as a part of a maintenance plan to help control mosquito breeding habitat and minimize the potential for West Nile Virus.
- Earthmoving activities greater than 25 acres requires a Construction Activity Permit from the Colorado Department of Public Health and Environment, Air Pollution Control Division. Go to <https://www.colorado.gov/pacific/cdphe/APENforms> for permit information.
- El Paso County Public Health encourages planned walk-ability of residential communities. Please consider appropriate connections to commercial areas through the use of sidewalks, and bike trails. Walk-ability features help reduce obesity and associated heart diseases.
