### **Meadow Lake Airport Expansion, AASI-18-1**

**Please accept the following comments from El Paso County Public Health regarding the project referenced above:**

- **No public health issues were noted with the planned expansion of the airport. The report covered in detail numerous environmental laws and regulations to consider with the planned turf runway, and there were no environmental non-compliance issues or concerns identified.**
- **If there is earthmoving activity in excess of one acre, but less than twenty-five acres, then a local Construction Activity Permit from El Paso County Public Health is required. Go to <https://www.elpasocountyhealth.org/service/air-quality/construction-activity-application> for more information.**
- **The only public health issue of note, based on past complaints, has been the lack of accessible restrooms for those who have private hangers and spend extended time periods at the airport. It is recommended that access to public restrooms on the site be evaluated and if necessary addressed. It should also be noted that the number of complaints of this type has declined over the past few years.**
